Highlights

Clean Air HEPA filter

The High Efficiency Particulate Air filter filters fine dust from the air. This guarantees more dust is captured.

4-layer filtration system

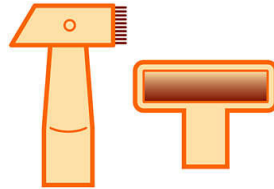

The filtration system consists of four individual layers. This makes sure all the dust is captured inside the vacuum cleaner.

S-bag

This dust bag has multiple layers and clogs less fast than ordinary dust bags. This guarantees longer lasting cleaning performance.

Small nozzle and 2-in-1 tool

The small nozzle and the 2-in-1 cleaning tool - which consists of a brush and a crevice tool in one - help you to clean your furniture and delicate surfaces.

Big rubber wheels

The big wheels are made with soft rubber on the outside, so they will not damage your floor during usage.
