

Philips
Sports massage gun

12 mm massage amplitude
8 massage head set
Full metal body

PPM7502BK

Powerful functions

Professional functions with many massage head sets

Designed for sports, it uses an aluminum alloy body and provides up to 15kg of strong thrust. The one-key operation is easy to use. The massage head set is made of sports medical materials for muscles relaxation.

Powerful massage performance

- Durable aluminum body
- Strong thrust output up to 15kg
- Human-computer interaction make massage easier

Easy to use

- Non-slip design handle, make it easy to grasp
- High intensity plastic hardshell case for full protection.
- Separate base for charging and storage

Professional massage components

- 8 different massage heads meet all your needs
- Enhance the massage amplitude & comfort level
- Made of titanium alloy, it yield wave yet avoid skin allergy

PHILIPS

Sports massage gun
12 mm massage amplitude 8 massage head set, Full metal body

Specifications

General specifications

- Net weight: 980g
- Product Dimension (LxWxH): 78×48×142 mm
- Main materials: Aluminum alloy, Silicone
- Color: Titanium gray

Main parameters

- Working voltage: 22.2V
- Massage amplitude: 12mm
- Massage frequency: 1600Hz-3200Hz

- Maximum thrust: 15kg
- Battery: 1600 mAh
- Charging port: DC 26V 1A

Country of origin

- Made in: China

Service

- Warranty period: 2 years

PPM7502BK/90

Highlights

Aluminum body

The device shell adopts aviation aluminum alloy, which reduces the weight, and ensure stable structural strength at the same time. Strong and durable.

Easy to grasp

45mm reasonable handle width, combined with non-slip silicone, make massage more convenient.

Strong performance

SuperDynamic all-metal power system, providing 15kg professional thrust. The massage waveform is more stable and effective

Human-computer interaction

Intelligent strength feedback display, The control of massage strength is intuitive and precise. Improve the massage effect of warm-up and recovery, while avoiding excessive pressure.

Pro-physiotherapy massage head

Eight massage heads carefully designed based on the principles of physiotherapy. Taking into account the actual needs of massage in different positions of the body, it can meet the different needs of different users for the intensity and depth of the massage gun.

High elastic rubber ball head

The high elasticity of the rubber is matched to the percussion frequency of the massage gun, which penetrates deep into the muscles for the best possible massage effect. The soft rubber surface is completely enclosed for easy cleaning, so that bacteria and harmful substances cannot penetrate during long-term use. It can protect the skin's health.

Separate charging base

With a separate charging base for storage, it is both attractive and practical.

Physio titanium surface head

The professional titanium physiotherapy head is popular with physiotherapists. It enables the impact of the fascial gun to reach deep into the muscles. It targets the deep fascial layers that ordinary massage heads cannot reach and completely soothes muscle groups. Titanium is also the most friendly metal to the body and does not cause discomfort to people with skin allergies.

Anti-shock portable case

The small and portable case features a high-strength plastic shell with anti-drop and anti-crush properties for providing full protection for the machine.
