# Highlights

## Unique OneBlade Technology

It's fast. Like really fast. Philips OneBlade First Shave uses a revolutionary cutter to power through any length of hair. 6000 movements per minute give you a fast, clean shave while caring for skin.

## Dual protection system

Glide coating and rounded tips to protect your skin. A protective plate on top of the cutter and rounded tips makes the blade glide smoothly and protect skin from nicks & cuts while shaving.

## Anti-friction blade\*\*

It's smooth. Like really smooth. We added a layer of micro-glass beads to dial down friction while you shave. And because that helps reduce razor burn, you don't need foam or water.

## Shave it off

Make quick work of your shave by moving against the grain. While you do that, OneBlade 1st Shave helps keep your shave clean and comfy because it never gets too close.

## Durable OneBlade

The blades are designed for lasting performance. For optimal performance, you will only need to replace each blade every 4 months\*. Replacement is easy and hassle free. \* For best shaving experience. Based on 2 full shaves per week. Actual results may vary.

## Wet & dry

OneBlade is fully waterproof, so it is easy to clean: just rinse it under the tap. You can shave wet or dry, even in the shower - whichever you prefer. No shaving foam needed.

## Long lasting battery

Rechargeable battery delivers 30 minutes of constant performance after an 8 hour charge.

## Dual-sided blade

OneBlade follows the contours of your face, allowing you to easily and comfortably shave all areas. Use the dual-sided blade to style your edges and create clean lines by moving the blade in any direction.

## USB-A charging

Can be charged at home or on the road, perfect for your daily routine and for travel.
