Reduces colic and discomfort*

Designed for uninterrupted feeding

Our Anti-colic bottle is designed to keep air away from your baby's tummy to reduce colic and discomfort, while also minimizing feeding interruptions. With its integrated anti-colic valve, air is vented away from the baby's tummy.

Other benefits

- Soother with soft & flexible shield for fewer skin marks
- Compatible range from breastfeeding to cup
- This bottle is BPA free
- A range of flow rates are available for your growing baby

Clinically proven to reduce colic and discomfort*

- Teat shape designed for secure latch
- Ribbed texture prevents collapse for uninterrupted feeding
- Unique anti-colic valve – designed to reduce air ingestion

Easy to use, clean and assemble

- Leak-free design
- Easy to clean and assemble with few parts
- Wide neck bottle with rounded corner for easy cleaning
- Easy to hold

Highlights

Leak-free design

Our Anti-colic bottle is designed to prevent leakage whilst feeding, for a truly enjoyable feeding experience.

ultra soft soother

Delicate skin needs extra care. Our ultra soft soother with FlexiFit technology lets this shield follow the natural curves of your baby's face for a comfortable fit. Your little one will experience fewer skin marks and less irritation.

Easy to assemble

Our Anti-colic bottle has few parts for quick and simple assembly.

Easy to clean

With its wide neck and fewer parts, our bottle is easier to assemble and to clean quickly and thoroughly.

Growing up with your baby

Mix and match our breast pump, bottle and cup parts, and create the product that works for you, when you need it!

Easy to hold

The unique bottle shape makes this bottle easy to hold and grip in any direction.

Secure latch

The nipple is designed not to collapse, for a secure latch and uninterrupted feeding.

Uninterrupted feeding

The teat shape allows secure latch and the ribbed texture helps prevent teat collapse for uninterrupted, comfortable feeding.

Unique Anti-colic valve

Our clinically proven* Anti-colic valve is designed to reduce colic and gas. Clinical studies have shown that the Philips Avent bottle reduces colic and fussing. Fussing is significantly reduced at night as babies fed with Philips Avent anti-colic bottles experienced 60 % less fussing than babies fed with a leading competitor's vented bottle.

BPA free

Philips Avent Anti-colic bottle is made of BPA free material (PP).

Choose the right flow

Philips Avent Anti-colic teats are available in different flow rates, to keep up with your baby's growth. We recommend replacing teats every 3 months for hygiene reasons. Use Philips Avent Anti-colic bottles only with Philips Avent Anti-colic teats.

Development stages

Stage: 0-12 months

* 0% BPA, following EU regulation 10/2011

** At 2 weeks of age, babies fed with a Philips Avent bottle showed less colic, and significantly less fussing at night compared to babies fed with another competitor bottle.

*** Teat design proven to prevent teat collapse and associated air ingestion and feeding interruptions.

**** What colic is, and how it affects babies? Colic is caused in part by swallowing air while feeding, which creates discomfort in a baby's digestive system. Symptoms include crying and fussing.
