PHILIPS
sense and simplicity

Highlights

Up to 1 month standby time

The phone can be on and in standby mode continuously for up to 1 month on a single charge.

Up to 8 hours talk time

The phone can support up to 8 hours conversation on a single charge.

Extra talk time

Now you can enjoy peace of mind when using your phone on the go, without worrying about missing a call when your battery is low. Simply

insert an AAA battery* which is readily available anywhere to instantly power up your phone. With the recommended Energizer® Lithium battery, you can enjoy up to 2.5 hours of extra talk time.

Backuppower

With backuppower, enjoy the convenience of instantly powering up your Philips mobile phone. Simply insert a variety of AAA batteries* in the phone's smartcavity. Now, you're ready to go.

Smartcavity

Smartcavity is an easily accessible battery cavity in your Philips mobile phone. It can automatically detect the kind of AAA battery inserted in your phone. This allows you to use a variety of AAA batteries* depending on your needs. The rechargeable battery will be automatically charged when you have access to your wall charger giving you total freedom to use a variety of batteries for backuppower while on the go.

* To maximize backup power, use an Energizer Lithium AAA battery. Also works with disposable Alkaline and Lithium batteries and rechargeable Nickel Metal Hydride (NiMH) batteries.

* Specification indicated based on initial full battery charge tested in laboratories with Bluetooth switched off. Actual performance is dependent on network service provider and usage.
