PHILIPS

Mobile Phone E-GSM 900/1800/1900

PHONE FEATURES

• TV SlideShow

to share with your family and friends pictures (and emotions) you have captured with the integrated camera. These pictures can be pre-selected in a slideshow or chosen one-by-one and displayed on a TV screen (TV Link accessory required).

• Demo mode

Animations and sounds to demonstrate the screen and sound capabilities to your friends.

• Philips Colour Carousel

The unique Philips colour carousel concept, with coloured animated icons, allows intuitive navigation.

• Clamshell management

When activated, this feature allows you to answer an incoming call by simply opening the phone

• **Ultra fine pitch colour displays** with high contrast and high brightness (100Cd/m²), 65,000 colours, 128*160 pixels, 8 lines of text. Ultra fine pitch: 120 DPI, for clear bright colour images. (4,000 colours and 96*64 pixels on sub-display)

• Integrated colour camera

Take pictures with the integrated camera, send those pictures via MMS / e-mail / IrDA or store your pictures in your photo album or slideshows. You can take pictures in low light condition, thanks to the low light mode (low sensitivity: 5 lux). This camera has the following characteristics: CMOS / VGA definition / Digital zoom (x2, x4) / Preview frame rate: up to 15 images / sec.

• Picture applications

Colour pictures, screen-savers and wallpapers. Thanks to the embedded photo album or with pictures taken with the integrated colour camera, you'll always have the best fitting picture for FotoCall or wallpaper applications. Exchange those pictures via MMS, e-mail or using your PC and the Mobile Phone Tool software provided.

• Frames selection

Creatively personalise your pictures with a large selection of frames. These frames can be added in preview mode as well as in post processing application.

• Special effects

to modify pictures you have taken with the integrated camera using special effects such as sepia, grey scale, edge, digital, embossed and negative colours.

• Incredible storage capacity

You can store up to 1000 images in your phone album and use them for slideshows, wallpaper or even send them via MMS. (Depending on picture format and memory available).

• File manager

to allocate the available memory in the phone between voice tags, voice memos, names, pictures, games, melodies, etc.

• FotoCall

Using photos taken with the integrated camera or downloaded, you can associate them with groups / names in your phonebook. When the phone rings the colour picture of the person calling will be displayed to show who is calling.

• Polyphonic ringtones

32 polyphonic ringtones with 30 melodies.

• Downloadable ringtone melodies

(network dependent) Select the melodies you prefer on the Internet or WAP and download them into your phone.

• FotoTalk

With the FotoTalk feature, you can send instantaneously pictures and recorded voice messages via MMS.

• Hands free

Switch to handsfree to let your friends join in the conversation or set up your own conference call.

• Colour games

4 embedded colour games. With Infusio V2 (operator dependent) a wide choice of new downloadable colour games are at your disposal. When you play a game, you can publish your score via SMS, challenge other players and win prizes! Thanks to new Java applications, a wide choice of new downloadable colour games is also at your disposal.

• MMS

to receive and send messages composed of text, sounds and pictures (taken with the camera) and use received melodies as ringtones and images as wallpaper.

• Email

For direct access to email services from the phone. You will also be able to attach pictures.

• EMS release 4

to receive and send formatted texts, melodies, images and use received melodies as ringtones.

• SMS / Quick SMS

to read and answer SMS very quickly. When quick SMS mode is selected, SMS received are automatically displayed and you can answer them with a single key press.

• Concatenated SMS

to write long SMS by connecting 5 pages & attachments when sending (up to 50 pages - SIM dependent on receipt).

• WAP 1.2.1. Wireless Application Protocol.

Access a world of services wherever you are. Also, you are able to download new images or ringtones.

• GPRS Class 10 (General Packet Radio Service)

is a transmission protocol, which allows you to send/receive data at higher speeds compared to GSM (up to 54 kbps in download).

• T9™ Text Input

Predictive text input to write emails, SMS, EMS and MMS - Chinese and most European languages are available.

• Java 2.0

To enhance your phone by downloading personal applications such as graphic applications, information tools, and interactive games.

• Voice recognition & Voice recording

Voice dial/command: just say a name or a word to dial a number from the names list or to activate a specific function of your phone. Memo and Voice recording are also available. Use the record you made as ringtone, SMS alert or even send it via MMS.

• Smart Phonebook

Under each name, up to 5 phone numbers (mobile, fax, data, note, e-mail, pager; home, work) can be stored. You can synchronise it with your PC.

• Personal organiser

to plan all your meetings and events in your calendar and set your phone to remind you of them. Synchronise it with your PC or your PDA.

• Infrared integrated

The mobile can communicate wirelessly with compatible IrDA devices.

I : Battery life measurements are approximate and depends on the operator's network configuration. Specifications Provided based on BS_PA_MFRMS = 9, I Rx (standby mode), PWL=15 and No DTx (talk time).
