- FotoTalk adds voice to your MMS pictures
- ${\boldsymbol{\cdot}}$ Special effects for creative picture personalization

Maximize your Multimedia Experience

- ${}^{\textstyle \bullet}$ Mix your own polyphonic melodies and ringtones with BeDJ
- 32-tone rich polyphonic melodies

Highlights

Integrated VGA digital camera

The integrated digital camera with VGA resolution (640x480 pixels) allows you to take high-quality pictures anytime, anywhere with your phone, then send them via MMS or email, or store the pictures in your phone's memory.

Digital zoom x4

Easily zoom the picture in and out up to 4 times, composing better and more meaningful pictures by capturing the right detail from the overall scene. In preview mode, activate the zoom function to take pictures of distant objects or to concentrate attention on a specific part of the picture.

65K color TFT display

Brilliant 65K color TFT display offers high contrast and high brightness with 65,536 gorgeous colors and ultra fine pitch for clear, bright color graphics and photos.

MMS messaging

MMS (Multimedia Messaging Service) allows you to use your mobile phone to send and receive pictures, video, and audio files with your text messages.

FotoTalk

FotoTalk allows you to instantaneously send pictures and recorded voice messages via MMS to friends and family. Access the camera application via camera hard key or multimedia menu to choose FotoTalk, then take a picture, record your voice, and go to MMS to finalize and send the message.

Special effects

Special effects provide you with several modifications that can be applied in order to personalize camera images: sepia, gray scale, edge, digital, embossed, or negative colors. Choose one of the special effects in camera

preview mode, take the picture, then save the photo in phone screen resolution format e.g. 128x160 pixels.

BeDJ

The amazing BeDJ feature allows you to easily create, enjoy, and share your own music mixes anytime, anywhere for unlimited creativity with this real, portable mixing studio. Create your own sounds using predefined styles provided by famous international DJs, your phone's own polyphonic ring tones, or by downloading content via WAP, infrared, or MMS to mix up to 9 different tracks in real time.

32-tone polyphonic melodies

32-tone polyphonic melodies can create simultaneous tones of different notes using MIDI format for more natural and realistic musical results, sounding just like a small orchestra of different instruments for outstanding sound effects.
