- TFT display with 65,536 gorgeous colors
- External LCD screen with 4096 vibrant colors

Stylish design

- Stylish 180° opening position

Maximize your Multimedia Experience

- 32-tone rich polyphonic melodies
- Java 2.0 technology

Highlights

TV SlideShow

TV SlideShow allows you to display pictures from your phone's photo album directly on a TV screen for the fun of sharing pictures from your phone's camera with friends and family. Simply connect your mobile phone and TV with the TV Link accessory to run an automatic or manual slideshow.

Integrated VGA digital camera

The integrated digital camera with VGA resolution (640x480 pixels) allows you to take high-quality pictures anytime, anywhere with your phone, then send them via MMS or email, or store the pictures in your phone's memory.

Giant photo album

Giant photo album with extended internal memory capacity allows you to store up to 1,000 pictures in your phone to use for

slideshows, wallpaper, and screensavers simply by taking a picture and saving it in your phone's memory.

Digital zoom x4

Easily zoom the picture in and out up to 4 times, composing better and more meaningful pictures by capturing the right detail from the overall scene. In preview mode, activate the zoom function to take pictures of distant objects or to concentrate attention on a specific part of the picture.

65K color TFT display

Brilliant 65K color TFT display offers high contrast and high brightness with 65,536 gorgeous colors and ultra fine pitch for clear, bright color graphics and photos.

4K color external display

4K vibrant-color external display enriches your mobile phone experience with color pictures and other graphics built from 4096 colors.

When the external screen is activated by turning on the phone, events such as incoming calls switch on the backlight to illuminate the display.

180° opening position

A unique hinge design allows the clamshell to open to a 180° position for a stylish design with pure lines.

32-tone polyphonic melodies

32-tone polyphonic melodies can create simultaneous tones of different notes using MIDI format for more natural and realistic musical results, sounding just like a small orchestra of different instruments for outstanding sound effects.

Java 2.0

Java 2.0 technology allows you to enhance and personalize your phone with new games and applications simply by downloading them.
