Home screen

Your phone's home screen consists of the following areas:

Status Bar

Shortcut
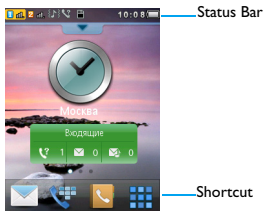

Keys

Learn about the main keys.

Icons	Definition	Function
⬜	Dial	Make or answer a call.
⬜	Home key	Enter the home menu.
⬜	Hang-up/ Power/ Exit	End a call; Hold to turn on/off the phone; Return to home screen.

✳ Tips:
• To unlock homescreen, tap the icon 📥 and slide it to the dot.

Shortcut menu

Learn about the shortcut icons.

Key	Definition	Function
✉	Messaging	Go to Messaging.
☎	Dial	Dial the number.
📞	Contacts	Go to Contacts.
▦	Home menu	Go to home menu.

Icons & symbols

Learn about the icons and symbols on the screen.

Icons	Definition	Function
	Silent	Your phone will not ring when receiving a call.
	Vibration only	Your phone will vibrate when receiving a call.
	Battery	The bars indicate the battery level.
	SMS	You have a new message.
	MMS	You have a new multimedia message.
	Missed call	You have missed a call.
	Bluetooth	Bluetooth is activated.
	Bluetooth headset	The Bluetooth headset is connected.
	Headset	The headset is plugged into the phone.
	Alarm	The alarm clock is activated.
	Roaming	Displayed when your phone is registered to a network other than your own (especially when you're abroad).
	Home zone	A zone designated by your network operator. Contact your service provider for details.
	GPRS attach	Your phone is connected to the GPRS network.
	Blacklist	Indicates that blacklist feature is activated.

Getting started

Insert SIM card and Charge the battery

Learn about installing SIM card and charging the battery for the first use.
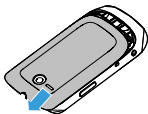

Insert SIM card

1 Remove the back cover.

2 Take out the battery.
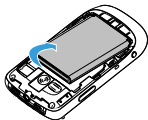

3 Insert the SIM card 1/2.

4 Install the battery.
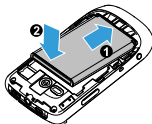

5 Replace the back cover.

Charge the battery

A new battery is partially charged. The battery icon in the upper-right corner shows the battery level of charging status.

✱ Tips:
* You can use the phone while it is charging.
* Keeping the charger plugged to the mobile phone when the battery is fully charged will not damage the battery. The only way to turn off the charger is to unplug it, so it is advisable to use an easily accessible power socket.
* If you do not intend to use your phone for several days, we recommend that you remove the battery.
* If a fully charged battery left unused, it will lost its charge over time.
* If a battery is being used for the first time or the battery has not been used for a prolonged period, it may take longer time to recharge.

Insert a Micro SD card (Memory card)

You can expand the memory of your phone by adding a micro-SD card.

1 Align your micro-SD card with the slot. Put it in place.
2 To remove the micro-SD card, press the card to release it.

Using your phone

Use basic call functions

Learn to make or answer a call and use basic call functions.

Make a call

1 Tap 📞 in the home screen, or tap 📞 in the home menu to display the dial pad.
2 Enter the phone number.
3 Press ⬜ to dial the number.
4 Press ☎ to hang up.

✳ Tips:
• For international calls, tap * two times to enter the "+" sign for the international prefix.

Answer and end a call

1 Press ⬜ to answer the call (Press the side volume key to adjust the volume).
2 Tap **Hfree** to select hands free mode.
3 Press ☎ to hang up.

✳ Tips:
• You can use the supplied headset to answer or end a call.

Make a conference call

If network applicable, you can handle two or more calls, or make a conference call.

1 During a call, tap **Dial pad** to enter a phone number, and then press ⬜ to dial the number. The second number is dialled.
2 The first call is put on hold at this time.
3 You can press ⬜ to swap between 2 calls.
4 Press ☎ to end the call.

Receive and send messages

You can use the **Messages** menu to send text message, multimedia message.

Send a SMS message

1 Press ⬚ to go to home menu.
2 Select **Messages**>**Create Message**.
3 Write your text message.
4 Tap **Send** to send the message.

Send a MMS message

1 Press ⬚ to go to home menu.
2 Select **Messages**>**Create Message**.
3 Edit contents, and press **Options** to add multimedia contents (picture, sound etc.).
4 Tap **Send** to add a contact.
5 Tap **Send** to send the Multimedia message.

Note:
• Copyright protected pictures and sound cannot be sent by MMS.

Send an E-mail

1 Go to **Menu**>**Messages**>**E-mail**>**Start to create account**.
2 After setting up a new account, tap to enter it.
3 Go to **New E-mail**, enter the address (**To**), **Subject** and **Content**.
4 Tap **Options** to select the **Priority** and other setting.
5 Press **Options**>**Send** to send the E-mail.

Note:
• Consult your mail service provider for the mail server configuration.

Receive E-mails

You can check received E-mails in the **Inbox**.

To receive E-mails automatically:

1 Choose an E-mail account, tap **Options**>**Settings**>**Advance settings.**
2 Go to **Account settings**>**Check interval** to set the time span, then your mail box will be checked automatically after each time span.

Enter text

Your mobile phone supports different virtual keypads for inputing.

Introduction of input methods:

Input method	Function
English input	Press the keys that are marked with the letter you wish to enter. Press once to get the first letter on the key, press twice quickly to get the second letter and so on until the letter you want is displayed on the screen.
T9® predictive text input	You need to press only once on the key corresponding to each letter needed to spell a word: keystrokes input are analyzed and the word suggested by T9® is displayed at the pop-up window.
Numeric input	Press the numeric key to enter a number.

⊜ Note:
• Depending on the language you select for your phone, the supported input methods may vary.

Manage your phonebook

Learn about basic phonebook function.

Add a new contact

1 Tap 📞 in the home screen, or tap 📞 in the home menu to go to **Contacts**.
2 Tap **Options >Add contact** to add a new contact.

✵ Tips:
• For contacts on the smart phonebook, you can add detailed information, like home number, office number, contact pictures and ringtones.

Search for a contact

1 Go to **Contacts**.
2 Enter the first few letters of the name in the search bar.
3 Select the contact from the list.

Set group

You can group your contacts as different groups, you can send messages to a group.

Add contacts to a group:

- Select **Contacts>Group**, tap **Add** to add a group and edit the group name, picture and ringtone, tap OK to save it.
- In **Group**, tap **Add** to add members for the group.

Media player

Media player

Save AMR, MP3, WMA, WAV, AAC and AAC+ music files under the **Audio** folder on your phone and memory card.

Play music

1 Press ⬚ to go to home menu.
2 Go to **Muisc>Options>Tracks**, select your desired song in the folder.
3 Using the following keys to control playback:

Function	Definition
▶	Start playing.
⏸	Pause playing.
⏮	Select previous track.
⏭	Select next track.
▮▮▮	Press side volume key to adjust volume.
⬚	Go to the home screen.

To turn off the music player on the home screen, tap ⬚ and select **Yes** , or tap ▮ on the Music player widget

🔘 Note:
• When listening to music, adjust the volume to a moderate level. Continuous exposure to high volume may impair your hearing.

9

Camera

Learn about camera function. Let you take photos as desired by using your phone.

Take a photo

1　Press ⌷ to go to home menu.
2　Go to **Camera**, select camera mode.
3　Aim the lens at the subject.
　- Tap + or - to zoom in /zoom out, adjust the brightness.
4　Press side camera key to take a photo.
5　Tap 🔄 to exit.

✳ Tips:
- All the photos taken are saved to **My files**>**Phone** or **Memory card**>**Pictuers**.

View photos

Go to ⚙>**View picture**,

1　View photos: tap ◂ or ▸ to select a photo.
2　Zoom in/out photos: tap 🔍 or 🔍 to zoom in or out a photo. After zooming in a photo, slide the screen to adjust the photo.
3　Set as full-screen wallpaper: tap ▱.

Camera settings

While using the camera, tap ⚙ to select settings:

Icon	Option	Function
⬇	**View picture**	View the photos you have taken.
▨	**Capture mode**	Switch the picture mode.
🏔	**Scene mode**	Select a scene to take a photo.
🖼	**Image size**	Select image size.
😊	**Face detection**	Turn on to get the best condition for taking a photo for face.
⟳	**Self-Timer**	Select a time span for auto photographing.

10

	White balance	Remove the effects on colors by surroundings.
	Effects	Add special effects to the photos.
	Adv.settings	Go to advanced settings.
	Storage	Select default storage location.
	Image Quality	Set image quality.
	Time stamp	Select to show the taking time of photo.
	Shutter sound	Adjust the shutter sound.
	Anti-flicker	Select a band to avoid the impacts on photos caused by flickers from lighting sources.
	Restore default	Restore to default settings.

Video recorder

Learn about video recorder function. Let you record a video clip as desired by using your phone.

Record a video

1 Press 🔲 to go to home menu.
2 Go to **Camera**, select video recorder mode.
3 Aim the lens at the subject.
   - Tap + or - to zoom in /zoom out, adjust the brightness.
4 Press side camera key to record a video clip.
5 Tap ↩ to exit.

❇ Tips:
• All the videos recorded are saved to **My files>Phone** or **Memory card>Videos**.

Play a video clip

Go to ⚙>**View video,**

1 Tap ▽ or ⊟ start or pause playing a video clip.
2 Press side volume key to adjust volume.
3 Tap ↩ to exit.

Video recorder settings

While using the video recorder, tap 🔅 to select settings:

Icon	Option	Function
▦	**View video**	View the videos you have recorded.
◉	**Record limit**	Select time and size limit for the file.
🔇	**Record audio**	Select to record the voice or not.

Other settings, see Camera settings.

FM radio

Lear about listening to radio programs by using a FM radio.

Listen to a radio station

1 Plug the supplied headset into your phone.
2 Press ▭ to go to home menu.
3 Go to **FM radio**, tap **Options>Auto search**. It starts scanning automatically and save the available channels.
4 Tap ◀◀ or ▶▶ to select a channel, press side volume key to adjust the volume.
5 Tap ⏻ to turn off FM radio.

To turn off the FM radio on the home screen, tap ▭ and select **Yes**, or tap ▮ on the FM radio widget.

Record radio programs

You can record a radio program when listen to it.

1 Go to **Options>Record** to start recording.
2 Tap **Stop** to stop recording and edit the filename.
3 Tap **Ok** to save the file.

❉ Tips:
• The files recorded are saved to **My files>Phone** or **Memory card>Audio**.

Business applications

Manage your calendar

You can create your to-do list and make a plan on your calendar.

Create your to-do list

1 Press ⬚ to go to home menu.
2 Go to **Calendar** select a date, and then tap **Options**>**Add event**.
3 Edit reminder settings.
4 Tap **OK** to save the task.
5 To change your to-do list, select the task, and then tap **Edit** to edit the task.

Check your to-do list

You can check your to-do list in weekly or monthly view. Go to **Calendar**>**Options**>**View** to check your to-do list.

Alarm

Learn about how to set and use an alarm. You can set up to five alarms.

Set an alarm

1 Go to **Alarm**.
2 Select an alarm, tap to open it and then tap **Edit** to edit the alarm.
3 Tap **Done** to finish setting the alarm.

Turn off an alarm

1 Go to **Alarm**.
2 Select the alarm you want to turn off.
3 Tap to turn off.

Stop an alarm

When the alarm rings,

Select **Stop** : The alarm stops.

Select **Snooze**: The alarm will sound again after the set **Snooze** interval, you can set snooze interval in **Edit** menu.

Bluetooth

Your phone can connect to a compatible Bluetooth device for exchanging data.

Connect to a Bluetooth device

1 Go to **Connectivity>Bluetooth>Power**, turn on the Bluetooth function.
2 Select **Search devices**, a list of available Bluetooth devices appears.
3 Select the device you wish to connect.
4 The pairing is made if your pairing request is accepted by the other part.

Send files via Bluetooth

1 Go to **My files**, long tap the file you want to send.
2 Tap **Send>Via Bluetooth** on the bar.
3 Select a device.
4 Tap **Ok** to start sending the file.

Receive files via Bluetooth

1 Go to **Connectivity>Bluetooth>Settings>Visibility**, make your phone visible to other Bluetooth devices.
2 Tap **Yes** to start receiving the file. The files received are saved to **My files>Phone** or **Memory card>Others**.

✿ Tips:
• If you do not use the Bluetooth feature for some time, you should deactivate it in order to conserve battery power.

WLAN

Learn to use your device's wireless networking. The availability and strength of the Wi-Fi signal will vary depending on objects, such as

buildings or simply a wall between rooms, the Wi-Fi signal has to pass through.

Turn on Wi-Fi and connect to a WLAN

1 Go to **Connectivity>WLAN**, tap **Yes** to turn on the WLAN first, then the detected networks will be listed in the **Available networks** section.

❄ Tips:
• If the wireless network that you want is not listed, tap **Options>Add** to manually add it.

2 Choose the Wi-Fi network you want to connect to, tap **Connect**.

3 If you selected a secured network, you will be asked to enter the network key or password.

File management

Use your files

1 Set a photo as contact picture:
   - Open **My files>Pictures**, select a photo.
   - Hold this photo icon, and tap **Use as>Adjust for Wallpaper** or **Adjust for Contact ID** on the bar.
2 Set an audio file as ringtone:
   - Select an audio file.
   - Hold this audio file icon, and tap **Use as>Caller ringtone/ Message ringtone**.

❄ Tips:
• To set photos you have taken as contact picture, select **240x400** in **Image size**.

Manage your files

You can create, copy or delete a file in a folder.

1 Open a folder, tap **Options>New folder/Copy/Delete**.
2 Tap to mark one or multiple files.
3 Go to **Options** to finish copying or deleting.

⊜ Note:
• The insecurity audio, video files and pictures are not recommended to save to your phone.

Use blacklist

Learn about how to set the blacklist; you can reject the incoming calls or messages from those included in the blacklist.

Activate blacklist

1 Go to **Blacklist>Blacklist switch**.
2 Tap it to activate blacklist function.

Add a phone number to blacklist

1 Go to **Blacklist>Blacklist numbers**.
2 Edit the blacklist, add contacts by entering a phone number or select a contact from phonebook.

Check world clock

Learn about how to check time & date of cities in other countries.

Set world clock

Select **World clock**,

1 In **Local settings/Foreign settings**, tap ◄ or ► to select a city.
2 Tap **Options** to turn on/off **Daylight saving time**.
3 In **Switch local/foreign**, switch clock.

🔵 Note:
• Alarms, reminders, programmed events are time zone independent.

Back-up your contacts or messages

1 Press ⬚ to go to home menu.
2 Go to **Backup>Phonebook Backup&Restore>Backup** or **Backup&Restore>SMS backup**.
3 Select one folder from the phone or memory card, hold this folder and tap **Select** from the pop-up list to finish backup.

Restore your contacts

1 Press ⬚ to go to home menu.
2 Go to **Backup>Phonebook Backup&Restore>Restore.**

3 Select the file need to be restored, tap **Use UDX file** to finish restore.

Check your backup your messages

Go to **My Files,** find .txt files on the SMS_Backup folder, you can read the backup messages.

Currency converter

1 Go to **Currency converter**, enter the rate.
2 Enter the sum of money in **Local**. Tap **Ok** to confirm.

Note:
• The result of the calculator is indicative only.

Web applications & Java

Opera Mobile

You can use this function to browse the Internet. Consult your network operator for the service subscription, data account information, and settings.

Java applications

Learn about how to use Java applications and play games. Your phone is preloaded with some Java games and applications.

Install Java games

1 Connect your phone to a PC via supplied Micro USB cable.
2 Save .jar file to **My files**>**Others**.
3 Install the Java games.

Play Java games

1 Press ⬛ to go to home menu.
2 Go to **Applications**>**Java**
3 Select a game from the list.

4   Tap to start playing the game.

📄 Note:
• To run some Java applications (entrusted third party software) on your phone, you may need to adjust the Java settings. Tap **Settings**.

Java settings

Go to **Applications>Java settings**.

Function	Definition
Java audio	Set the volume level.
Java vibration	Turn the vibration on or off.
Network settings	Select a Java network (service subscription-dependent).
Heap size	Display allowed maximum size for Java memory.

Settings

Preferences	Select your preferred network.
Connections	The menu allows you to define the Internet access profiles of your phone. Consult your network operator for details.
Java settings	see "Java settings" on page 18.

Safety & Precaution

Precaution

Keep your phone away from small children

Keep your phone and all accessories out of the reach of small children. Small parts may cause choking or serious injury if swallowed.

Radio Waves

Your phone transmits/receives radio waves in the GSM frequency (900/1800/1900MHz).

Check with the vehicle manufacturer that electronic equipment used in your vehicle will not be affected by radio energy.

Switch off your phone...

Turn off the phone when in an aircraft. The use of mobile phones in an aircraft may be dangerous for the operation of the aircraft, disrupt the mobile phones network and may be illegal.

In hospitals, clinics, other health care centers and anywhere else where you may be in the close vicinity of medical equipment.

In areas with a potentially explosive atmosphere (e.g. petrol stations and also areas where the air contains dust particles, such as metal powders).In a vehicle transporting flammable products or a vehicle powered by liquefied petroleum gas (LPG).In quarries or other areas where blasting operations are in progress.

Your mobile phone and your car

Avoid using your phone while driving and obey all regulations that restrict the use of mobile phones while driving. Use hands free accessories to increase your safety when possible. Ensure that your phone and car kit do not block any air bags or other security devices fitted in your car.

Handle your phone carefully and sensibly

For the optimal and satisfactory operation of the phone you are recommended to use the phone in the normal operating position.

- Do not expose your phone to extreme temperatures.
- Do not immerse your phone in any liquid; if your phone is damp, switch it off, remove the battery and let them dry for 24hrs before using them again.
- To clean the phone, wipe it with a soft cloth.
- In hot weather or after prolonged exposure to the sun (e.g., behind a window or a windscreen), the temperature of your phone's casing might increase. Be very careful in this case when picking up your phone and also avoid using it with an ambient temperature over 40° C.

Protect batteries from damage

You should only use Philips Authentic Accessories, as the use of any other accessories may damage your phone and may be dangerous, and will make all guarantees for your Philips phone null and void. The use of an unspecified type of battery may also cause an explosion.

Make sure damaged parts are replaced immediately by a qualified technician and that they are replaced with genuine Philips replacement parts.

- Your phone is powered by a rechargeable battery.
- Use specified charger only.
- Do not incinerate.
- Do not deform or open the battery.
- Do not allow metal objects (such as keys in your pocket) to short circuit the battery contacts.
- Avoid exposure to excessive heat (>60° C or 140° F), moisture or caustic environments.

Environmental care

Remember to observe the local regulations regarding the disposal of the packaging materials, exhausted batteries and old phone and please promote their recycling.Philips has marked the

battery and packaging with standard symbols designed to promote the recycling and appropriate disposal of your eventual waste.

❀ :The labeled packaging material is recyclable.

♺ :A financial contribution has been made to the associated national packaging recovery and recycling system.

△ :The plastic material is recyclable (also identifies the type of plastic).

WEEE Marking in the DFU: "Information to the Consumer"

Disposal of your old product

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

When this crossed-out wheeled bin symbol is attached to a product it means the product is covered by the European Directive 2002/96/EC

Please inform yourself about the local separate collection system for electrical and electronic products.

Please act according to your local rules and do not dispose of your old products with your normal household waste. The correct disposal of your old product will help prevent potential negative consequences for the environment and human health.

This device may contain commodities, technology or software subject to export laws and regulations from the US and other countries. Diversion contrary to law is prohibited.

Tips

Pacemakers

If you have a pacemaker:

- Always keep the phone more than 15 cm from your pacemaker when the phone is switched on, in order to avoid potential interference.
- Do not carry the phone in a breast pocket.
- Use the ear opposite to the pacemaker to minimize the potential interference.
- Switch off your phone if you suspect that interference is taking place.

Hearing aids

If you are a user of a hearing aid, consult your physician and hearing aid manufacturer to learn whether your particular device is susceptible to cellular phone interference.

How to prolong the battery life of your phone

To have your mobile phone function properly, sufficient battery power is important. For the power-saving purpose, do the following, if applicable:

- Turn off the Bluetooth function of your phone.
- Set the backlight level and duration of your phone to a low value.
- Turn on the auto keypad lock, turn off the key sounds, tap vibration, or vibration alerts.
- Establish GPRS connection when needed. Otherwise, your phone will keep searching for GPRS connection, and drain your battery power.
- Turn off your phone if there is no coverage. Otherwise, the phone will keep searching for network, and drain your battery power.

Troubleshooting

The phone does not switch on

Remove/reinstall the battery. Then charge the phone until the battery icon stops scrolling. Unplug the charger and try to switch the mobile on.

The display shows BLOCKED when you switch on the phone

Somebody tried to use your phone but didn't know the PIN code nor the unblocking code (PUK). Contact your service provider.

The display shows IMSI failure
This problem is related to your subscription. Contact your operator.

Your phone doesn't return to idle screen
Long press the hang-up key or switch off the phone, check that the SIM card and the battery are installed correctly and switch it on again.

The network symbol is not displayed
The network connection is lost. Either you are in a radio shadow (in a tunnel or between tall buildings) or you are outside the network coverage area. Try from another place, to try to reconnect to the network (especially when abroad), check that the antenna is in place if your mobile has an external antenna, or contact your network operator for assistance/information.

The display doesn't respond (or the display responds slowly) to key presses
The display responds more slowly at very low temperatures. This is normal and does not affect the operation of the phone. Take the phone to a warmer place and try again. In other cases please contact your phone supplier.

Your battery seems to over heat
You might be using a charger that was not intended for use with your phone. Make sure you always use the Philips authentic accessory shipped with your phone.

Your phone doesn't display the phone numbers of incoming calls
This feature is network and subscription dependent. If the network doesn't send the caller's number, the phone will display Call 1 or Withheld instead. Contact your operator for detailed information on this subject.

You can't send text messages
Some networks don't allow message exchanges with other networks. First check that you have entered the number of your SMS centre, or contact your operator for detailed information on this subject.

You can't receive and/or store JPEG pictures
A picture may not be accepted by your mobile phone if it is too large, if its name is too long, or if it doesn't have the correct file format.

You feel that you have missed some calls
Check your call divert options.

When charging, the battery icon shows no bar and the outline is flashing
Only charge the battery in an environment where the temperature does not go below 0°C (32°F) or above 50°C (113°F).
In other cases please contact your phone supplier.

The display shows SIM failure
Check that the SIM card has been inserted correctly. If the problem persists, your SIM card may be damaged. Contact your operator.

When attempting to use a feature in the menu, the display shows NOT ALLOWED
Some features are network dependent. They are only available, therefore, if the network or your subscription supports them. Contact your operator for detailed information on this subject.

The display shows INSERT YOUR SIM CARD
Check that the SIM card has been inserted correctly. If the problem persists, your SIM card may be damaged. Contact your operator.

The autonomy of your phone seems lower than indicated on the user guide
The autonomy is linked to your settings (e.g., ringer volume, backlight duration) and the features you use. To increase the autonomy, and whenever possible, you must deactivate features you do not use.

Your phone doesn't work well in your car

A car contains many metallic parts that absorb electromagnetic waves which can affect the phone's performance. A car kit is available to provide you with an external antenna and enables you to make and receive phone calls without handling the handset.

Note:
• Check with the local authorities whether or not you are allowed to use the phone while driving.

Your phone is not charging

If the battery is completely flat, it might take several minutes of pre-charge (up to 5 minutes in some cases) before the charging icon is displayed on the screen.

The picture captured with the phone camera is not clear

Make sure that the camera lens on both sides is clean.

Specific Absorption Rate Information

International standards

THIS MOBILE PHONE MEETS THE INTERNATIONAL RECOMMENDATIONS FOR EXPOSURE TO RADIO WAVES

Your mobile phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the limits for exposure to radio frequency (RF) energy defined by the international standards. These recommendations have been established by the International Commission on Non-Ionizing Radiation Protection (ICNIRP) and, the Institute of Electrical and Electronics Engineers (IEEE) that forecast a substantial safety margin for assuring the protection of all persons, regardless of age and health.

The exposure recommendations for mobile phones use a measurement unit known as the Specific Absorption Rate (SAR). The SAR limit recommended by the ICNIRP for the mobile phones used by the general public is **2.0W/kg averaged over ten grams of tissue and, is 1,6W/kg averaged over one gram of tissue** by IEEE Std 1528 for the head.

Tests for SAR have been conducted using recommended operating positions with the mobile phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR levels of the mobile phone while operating are generally below the maximum SAR value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a base station antenna, the lower the power output.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the international protection standards for exposure to radio waves.

The highest SAR value for this Philips Xenium X331 model phone when tested for compliance against the standard was 0.553 W/kg for ICNIRP recommendation.

For limiting the radio waves exposure, it is recommended to reduce the mobile phone call duration or to use a headset. The purpose of those precautions is to take the mobile phone away from the head and the body.

Declaration of Conformity

We,

Shenzhen Sang Fei Consumer
Communications Co., Ltd.
11 Science and Technology Road,
Shenzhen Hi-tech Industrial Park,
Nanshan District, Shenzhen 518057
P.R.China

declare under our sole responsibility that the product

Xenium X331
Philips GSM/GPRS 900/1800/1900
TAC number: 8635 4601

to which this declaration relates, is in conformity with the following Standards:

```
SAFETY : EN 60950-1:2006+A11:2009+A1:2010
         IEC 60950-1:2005+A1:2010
HEALTH: EN 50360:2001
        EN 62209-1:2006
EMC:    ETSI EN 301 489-1 v1.8.1
        ETSI EN 301 489-7 v1.3.1
        ETSI EN 301 489-17 v2.1.1
SPECTRUM: ETSI EN 301 511 v9.0.2
          ETSI EN 300 328 v1.7.1
```

We hereby declare that (all essential radio test suites have been carried out and that) the above named product is in conformity to all the essential requirements of Directive 1999/5/EC.

The Conformity assessment procedure referred to in Article 10 and detailed in Annex III or IV of Directive 1999/5/EC has been followed with the involvement of the following Notified Body(ies):

British Approvals Board for Telecommunications TUV SUD Group Balfour House Churdhfield Road-walton-on-Thames Surrey - KT12 2TD United Kingdom.

Identification mark: **0168**

Tips & tricks

Optimizing your Philips Xenium battery performance

Here are some steps to help you optimize your Philips Xenium's battery performance.

How to optimize the standby and talk time of your phone?

- Always ensure that your phone profile is appropriately set to meet your actual usage. Profile setting significantly impacts the phone's battery performance. In general, Outdoor Mode is the most power-draining setting while Silent Mode consumes the least amount of power.
- If you're using a Xenium phone with a dual SIM feature, try to activate the 2 SIM cards only when absolutely necessary. If you are in a country with single coverage, deactivate the non-covered SIM to prolong battery usage.
- If you're not using applications like Bluetooth, WIFI, GPS and JAVA, turn them off. And be sure to lock your phone to prevent accidental pressing of the keys with the auto-lock feature.
- Adjust the intensity and duration of your display screen's backlight to low or medium level and for the shortest duration. In general, the lower the backlight level and the shorter the duration, the more power you will save.
- Avoid using or placing your phone near magnetic objects (eg. a radio or television) or on metal surfaces, which will impact the network connection and ultimately drain power from your battery.

How to extend your battery's life?

- Full charging and full running down of your battery will extend its life. Charge the battery once the low-battery warning comes on.
- Temperature will impact battery usage. Over time, heat will degrade your battery's performance. Keep your phone out of the sun or a hot car. If in low temperature, place your phone in a warmer place (eg. your pocket), as battery capacity decreases as the temperature drops.
- Always use authentic accessories as they enable your battery to perform at its peak. Non-authentic accessories (eg. chargers) can damage your battery and even your phone.
