# Highlights

## Privacy mode

Organizations invest heavily to prevent information leakage. Visual hacking is low-tech, but hard to prevent in open spaces. Philips Privacy Mode offers an integrated solution for privacy without the hassle of the clumsy screen protector. Simply press a button to enter Privacy Mode, your screen appears dark and barely seen from both sides, but keep clear visuals at the center. You can secure confidential, sensitive, or private data from visual hacking. A convenient switch allows you to quickly toggle between Privacy Mode and wide-viewing mode. Greatly boost up work productivity.

## Flicker-free technology

Due to the way brightness is controlled on LED-backlit screens, some users experience flicker on their screen which causes eye fatigue. Philips Flicker-free Technology applies a new solution to regulate brightness and reduce flicker for more comfortable viewing.

## LowBlue Mode

Studies have shown that just as ultra-violet rays can cause eye damage, shortwave length blue light rays from LED displays can cause eye damage and affect vision over time. Developed for wellbeing, Philips LowBlue Mode setting

uses a smart software technology to reduce harmful shortwave blue light.

## EasyRead mode

EasyRead mode for a paper-like reading experience

## SmartErgoBase

The SmartErgoBase is a monitor base that delivers ergonomic display comfort and provides cable management. The base can swivel, tilt and rotate to various angles to ensure maximum comfort. The height adjustable stand guarantees the optimal viewing level, reducing the physical strains of a long workday, while cable management reduces cable clutter and keeps the workspace neat and professional.

## Built-in stereo speakers

A pair of high quality stereo speakers built into a display device. It can be visible front firing, or

invisible down firing, top firing, rear firing, etc depending on model and design.

## IPS technology

IPS displays use an advanced technology which gives you extra wide viewing angles of 178/178 degree, making it possible to view the display from almost any angle - even in 90 degree Pivot mode! Unlike standard TN panels, IPS displays gives you remarkably crisp images with vivid colors, making it ideal not only for Photos, movies and web browsing, but also for professional applications which demand color accuracy and consistent brightness at all times.

## SmartImage

SmartImage is an exclusive leading edge Philips technology that analyzes the content displayed on your screen and gives you optimized display performance. This user friendly interface allows you to select various modes like Office, Photo, Movie, Game, Economy etc., to fit the application in use. Based on the selection, SmartImage dynamically optimizes the contrast, color saturation and sharpness of images and videos for ultimate display performance. The Economy mode option offers you major power savings. All in real time with the press of a single button!
