# Highlights

## Dual tone design

Dual tone design combines a glossy black strip located in the middle of the bottom bezel with a silver front bezel to make the front bezel appear slimmer. The subtle contrast between the two elements adds a lively spirit, eye appeal and interesting, unique elements to a room's decor.

## Clean-look design

Convenient, unobtrusive controls are integrated with the brand banner, placing them at your fingertips when you need them, but making control buttons inconspicuous when not required to create an integral, crisp and clean look with simple, yet stylish aesthetic appeal.

## 'Hug' bezel design

A 'hug' bezel is a specially designed slanting surface that joins front and rear design elements in warm embrace, creating a warm, harmonious and smoothly flowing overall appearance.

## Windows Vista ready

Philips Vista-ready monitors are empowered for vibrant, exciting display of this new, visually sophisticated and demanding Windows operating system, designed to enhance your entertainment experience, make you more

productive and help you control your computing experience at home and in the office, making viewing, finding and organizing information for work or play quick, efficient and easy.

## 5ms on/off response time

On-Off response time is the period required for a liquid crystal cell to go from active (black) to inactive (white) and back to active (black) again. It is measured in milliseconds. Faster is better: Lower response time means faster transitions and, therefore, results in fewer visible image artifacts in the display of transition of texts and graphics. On-Off response time is a more important measure in the display of business content like documents, graphs and photos.

## Flame retardant cabinet

PC/ABS plastic composite is the industry's best and toughest flame-retardant casing material; and is a space-age compound deployed in the aerospace and automotive industries as well as in fire detectors that is compliant with most stringent fire safety standards.

## Lead-free

Lead-free display products are designed and produced in compliance with strict European

Community Restriction of Hazardous Substances (RoHS) standards that restrict lead and other toxic substances that can harm the environment.

## Dual input

Dual input provides connectors to accommodate input of both analog VGA and digital DVI signals.

## SmartControl

PC software for fine tuning display performance and settings. Philips offers users two choices for display setting adjustment. Either navigate the multilevel On Screen Display menu through buttons on the display itself or use the Philips SmartControl software to easily adjust the various display settings in a familiar way.

## Embedded power supply

An embedded power supply is a power adaptor built into the body of a display device that replaces a bulky external power adaptor.

## Cable clip

A clip shipped with monitors that manages cables by clipping them together for a tidy work space.
