- Dialed-in mechanical cyan switches for fast reaction

PHILIPS

Wired mechanical gaming keyboard
7-way ambiglow lighting High-speed mechanical keys, Full key N-rollover, Black alloy surface

SPK8413/00

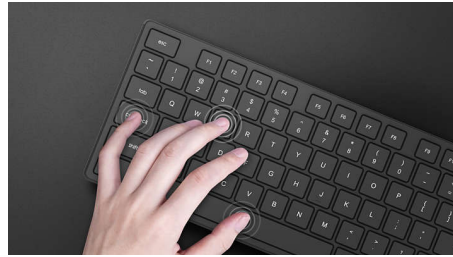

Highlights

Full n-key rollover

Fast complex gaming key strokes demand advanced performance. With full N-key rollover every key is registered independently without confusion so that each keystroke is correctly registered regardless of how many other keys are being pressed or held down at the time.

50 million keystroke lifespan

How long does it take to get to 50 million keystrokes? A long time. Familiar and reliable this keyboard is built to last for many years of fast action.

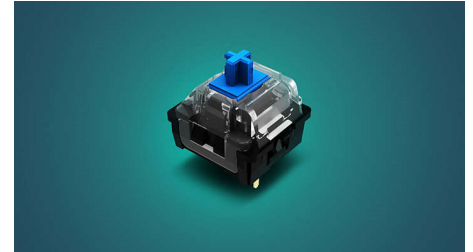

Alloy surface design

Everything about this keyboard is built to last for rugged high performance use, even down

to the keyboard surface. The Alloy surface is designed for high durability, superior rigidity and looks great too.

Fast mechanical switches

The most popular mechanical switches for gaming keyboards, Cyan mechanical switches offer gamers a light tactile clicky key for rapid activation and performance.

Ambiglow game lighting

Ambiglow game lighting for more immersive gaming
