- Nipple made of 100% food-grade silicone
- Natural oral development
- Natural feel for baby

### **Quality assured**

- Designed and produced in the Netherlands

# Highlights

## Lets baby's skin breathe

Extra-large airholes ventilate your baby's skin, keeping it dryer while soothing.

## 98% teat acceptance\*

When we asked parents how their little ones respond to our textured, silicone teats, an average of 98% said that their baby accepts the Philips Avent ultra soft and ultra air soothers.

## Nipple made of 100% silicone

We consciously chose silicone material for our ultra soft and ultra air teats since it's a safe and inert material, widely used in medical

applications, and free from hazardous chemicals, endocrine active substances (e.g. BPA) and allergens.

## Orthodontic teat

Our orthodontic, symmetrical soft silicone nipples are designed for natural oral development.

## Natural feel for baby

Our textured silicone teat is designed to mimic the feel of mum's breast.

## Sterilise in 3 minutes

The travel case that comes with our ultra soft and ultra air soothers doubles as a steriliser. All you need to do is add some water and pop it in the microwave. Then rest easy that it's clean for the next use.

## Produced in the Netherlands

Our ultra soft and ultra air soothers are designed and produced in the Netherlands.

# Specifications

**What is included**

ultra air soother: 4 pcs

\* 2016-2017 US consumer tests show an average of 98% teat acceptance of the textured Philips Avent teat used in our ultra air and ultra soft soothers.

\* \*For hygiene reasons, replace soothers after 4 weeks of use
