Easy to use

- Headgear designed for easy application and removal
- Radial diffusion leak ports provide quiet operation

Cushion seal

- Perimeter seal for maximum comfort

Comfortable fit

- Total face mask designed for comfort

Highlights

Perimeter seal for maximum comfort

A soft, silicone cushion creates a perimeter seal, helping to adjust evenly around the face.

Headgear designed for easy application and removal

The FitLife headgear is available in small and large sizes. It has EZ tabs that allow for quick, easy adjustment and removal of the headgear. Snap clips help simplify the removal of the mask.

Radial diffusion leak ports

Leak ports deflect exhaled air away from the bed partner.

Total face mask designed for comfort

FitLife provides optimal pressure distribution to less pressure-sensitive areas of the face, while allowing an unrestricted view. The large surface area adjusts pressure inside the mask to help minimize eye irritation - providing you with a comfortable seal.
