

PHILIPS

Two-Player Full-Screen Gaming Glasses

for Easy 3D TVs

PTA436

Enjoy two-player games in full screen

The ultimate gaming experience

In 2D two-player games, each gamer usually sees their game on only half of the screen. By wearing these 3D glasses, both gamers will only see their own game, but they will see it on the full screen. Two gamers can now sit together, play on the same TV and enjoy maximum enjoyment.

Enjoy maximum excitement with a friend

- Switch from full screen to normal view easily
- Your game in full screen

Comfortable gaming experience

- Lightweight for hours of comfort
- Adjustable nose bridge for best personal comfort
- Optimum lens coverage even for existing eyewear users
- Sharp and flicker free images

Highlights

Lightweight for long comfort

Easy 3D glasses do not contain any electronics and batteries. They are lightweight and comfortable for long hours of wear.

Adjustable nose bridge

The nose pads of these 3D glasses are adjustable to fit any nose. Even when wearing prescription glasses behind them, your personal viewing comfort is guaranteed.

Optimum lens coverage

The wide lens and subtle curvature fit most faces even for existing eyewear users. The additional hook at the top edge of the frame also helps to secure the Easy 3D glasses to your personal glasses.

Full screen to normal view

With 2 clicks of a button, you can easily switch from full screen to normal view to change game settings or other options easily.

Your game in full screen

With 2D two-player games, each gamer usually sees their game on half the screen. Philips expands the functionality of 3D TVs to enable gamers to enjoy their two-player games in full screen at the same time. By wearing the 3D glasses, each gamer will only see their game in full screen so two gamers can sit together, play on the same TV and enjoy maximum excitement.

Sharp and flicker free images

Powered by FPR technology (Film Pattern Retarder) an advanced 3D polariser that is fully integrated in the TV screen, the full screen two player gaming features sharp images and low ghosting to give you all the sensorial excitement of the game.
