Ambilight without limits. Liberate the light

Philips Ambilight+hue app

Experience Ambilight all around you with Philips Ambilight+hue app. Let your Ambilight TV and hue bulbs 'talk' to each other via the app to enjoy the emotion, power and color of Ambilight throughout your home. Adjust to suit your style.

Create a one of a kind Ambilight experience

- Bulb selector button—to select and position your hue bulbs

Adjust to suit your style and preference

- Color intensity button for an adjustable color experience
- Dynamic brightness slider to adjust selected hue bulbs

Highlights

Bulb selector button

to play with the color intensity. Sliding to the left creates softer tones, while moving the slider to the right creates a more immersive experience.

Easily choose which hue bulbs in your room do-and which don't-mirror your Ambilight TV experience. Those bulbs not selected to mirror Ambilight return to their pre-set color, or can be adjusted to any color in the hue spectrum.

Color intensity button

Dynamic brightness slider

Set the brightness of your individual hue lamps with the swipe of fingertip using the dynamic brightness slider. Once the chosen lamps have been selected by tapping the lamp icons that appear on your screen, you simply slide it to the left, or the right, to make the experience more or less immersive depending on your personal preference.

Your Ambilight TV may create music with color, but you orchestrate it. By sliding the color intensity button from right to left, you are able
