# Highlights

## 100% Ceramic grinders

Our grinders are made of high-tech ceramic: exceptionally hard and precise. Fresh beans are gently ground, without risk of overheating: extracting all the best flavors and aroma, delivering a superior coffee taste for at least 20,000 cups.

## External Endorsement

Saeco technology allows you to extract the best flavors from your favorite coffee beans for intense and authentic aroma and taste (roasted, chocolaty, nutty, fruity, flowery, spicy)

## High-Performance boiler

Flawless coffee calls for perfect temperatures. Our high performance Thermoblock is made with light aluminum and a stainless steel body, which heats up to the optimal temperatures, fast

## AquaClean Filter

## AquaClean

AquaClean is our patented water filter, designed to improve the quality of your coffee by purifying water. It also prevents scale buildup in the water circuit of your coffee machine: make up to 5000\* cups without descaling by replacing the filter regularly.

## LattePerfetto

LattePerfetto technology, reduces the size of milk froth pores and produces dense milk foam with fine texture for your milk based coffees. The precise geometry of the frothing system ensures ideal temperature and outstanding foam to milk ratio.

## Removable Brewing Unit

Removable brewing unit guarantees visual hygiene reassurance. Alternatively, Saeco

brewing unit offers automatic cleaning with our specialized cleaning tablets.
