Compact video doorphone

Evolution to meet your home configuration

Install the brand-new Philips WelcomeEye Compact video doorphone. With superior ease of use, it guarantees satisfaction with its very high image quality and wide viewing angle.

A simple and compact video door phone

- Modern and compact interface
- Communicate using monitors in the same family

Compact and modern design

- White LEDs for clear and precise night vision
- Ultra-thin, signature LED monitor with a premium finish

Experience the compact Philips' videodoorphone

- Monitor access to your home with the monitoring function

Highlights

4.3" screen

4.3" screen allows you to respond to your visitors and open your door or motorised gate. The WelcomeEye Compact video doorbell is easy to use.

Talk using the monitors

Simplify communication at home with the Philips video doorphone and its intercom function.

Ultra-flat monitor

Bring a modern touch to your home with the WelcomeEye Touch's ultra-thin monitor and its remarkable signature LED technology.

Colour night vision

The CMOS lens, with an extra-wide viewing angle (H100°/V70°) and white LEDs for precise night vision up to 2.5 m, allows you to recognise your guests even in the dark.

Monitor access to your home

Easily observe what happens in front of your house with WelcomeEye Compact's monitoring function.
