Highlights

Wi-Fi connection to door locks

After connected to the network through the Philips gateway, the Philips smart lock can be controlled through the Philips EasyKey APP to realize remote door lock management, remote setting, and adding user PIN codes.

Low-power Bluetooth

The Philips gateway uses low-power consumption Bluetooth technology to keep the smart lock with low consumption and lasting for longer.

No need for extra installation

Just plug in the power socket, open the Philips EasyKey APP to bind the gateway and the Philips smart lock, you can start the journey of remote controlling smart lock.
