- 2,200x513x194 mm

## Net weight of product

- 11.5 kg

## Drop distance

- 0-1,100 mm

## Maximum load

- 35 kg

## Power supply

- Input voltage: 220 V
- Rated power of product: 88 W
- Rated power of LED lamp: 18 W

SDR601ABW0/97

# Highlights

## 35 kg load capacity

SDR601 has 36 hanging holes and an impressive 35 kg load capacity, allowing more clothes to dry at one time. If clothing weigh more than 35 kg, the motor would stop automatically and initiate an alert to warn you, thus ensuring your safety in use.

## 4 split level rods

The 2 clothes rods have well-distributed holes for hanging, ensuring sufficient ventilation and sunshine for clothes to dry off. 2 more split level rods can dry both clothes and quilts, so you no longer have to worry about how to dry your bedding.

## Adjustable rods

With its 1.2+1 m adjustable rods, the drying rack adapts to many family use scenarios. It gives more drying space when extended and save space when retracted, making it perfectly fit for small-sized balconies. You can also install it at two sides of your balcony to avoid influencing your leisure activities and the look of the balcony.

## Remote control

Enjoy one click on remote control to monitor clothes drying. The DC motor lets the drying rack move quietly and fast. It takes only 20 seconds for the rack to go up or down. Without too much waiting, you can enjoy an efficient life as you like.

## Obstacle sensing

Gently hold the descending rack to stop it. After hanging clothes up, slightly push with your hands, and the rack will go up automatically. No need to turn around for remote control, clothes drying becomes much easier.
