- For additional security

Exquisite craftsmanship ensures security
- Leave no hidden risk and give full security
- Solid for better protection

Attention to detail offers better convenience
- Make ease use at night
- For added convenience
- Give full-time protection

PHILIPS

Highlights

30 mm diameter bolts
The door and walls of this secure cabinet are constructed with high-quality low-carbon alloy steel. Combined with its 30 mm diameter solid steel bolts, SBX301 is made to provide safe protection.

Abnormal alert

Abnormal alert

SBX301 supports 4 types of alerts including shock alert, false alert, low battery alert and door left open alert. It responds to those situations with high-pitch sound, giving your valuables all-day protection.

Ample space

Ample space

The downside cabinet can be unlocked with fingerprints or PIN codes. Upon successful recognition, the door pops open, offering better convenience. The cabinet is designed with divider and has big storage capacity, meeting various safekeeping needs.

Back up system
To avoid items being permanently locked inside because of system crash, SBX301 is designed with 2 independent unlocking systems. The backup system ensures normal unlocking in case the primary system is down.

Built-in LED light
The downside cabinet has a built-in LED light, making each use at night easy and convenient.

Hidden unlocking panel
You can unlock the downside cabinet with fingerprints or PIN codes. The unlocking panel is designed hidden inside the drawer upside for more security. The matte panel is scratch resistant and unlikely to leave fingerprints, making each unlocking worry-free.

Hooks for keys and small items
Enjoy ease-of-use brought by hooks especially designed for keys and small items. You will no longer have to rummage through the cabinet for those small objects.

One-piece cabinet
SBX301 has an one-piece cabinet with minimized gap between door and frame, making it solid and secure.

Slide drawer with organizer

Slide drawer with organizer

Slightly push and the drawer will pop out open, a design that makes each opening easy and convenient. The drawer has separate sections for organized storage. Its soft fabric interior protects stored items against bumps and scrapes, giving assuring storage experience.

Wireless charger

Wireless charger

Most phones on the market can use the wireless charging function of SBX301. Simply put your phone on the top wireless charging area to get your phone charged. There is also an USB port at the top left corner to provide you more charging options.

Specifications
