Play all your movies and music

- Easily enjoy local media from you home network

PHILIPS

4K Ultra HD Blu-ray Player

4K Ultra HD Blu-ray playback BD/DVD/CD playback, BD / DVD Upscaling to 4K

Highlights

3D

Be enthralled by 3D movies in your own living room on a Full HD 3D TV. Active 3D uses the latest generation of fast switching displays for real life depth and realism in full 1080x1920 HD resolution. By watching these images through special glasses that are timed to open and close the left and right lenses in synchronization with the alternating images, the Full HD 3D viewing experience is created. Premium 3D movie releases on Blu-ray offer a wide and high quality content selection.

4K Upscaling

Your Standard Definition and High Definition videos have never looked better. 4K upscaling processor delivers images that are crystal clear. Movies in standard definition and high definition can now be enjoyed in 4K Ultra HD, ensuring more details and more true-to-life pictures.

Dolby Audio

Dolby Audio for the ultimate movie experience

DTS2.0 Digital Out

DTS2.0 Digital Out

HDMI 1.4b Audio output

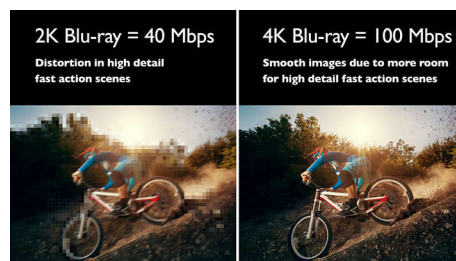

A convenient HDMI 1.4b audio output to connect to legacy audio receivers if they do not support HDMI 2.0a pass-through.

High Dynamic Range 4K BDP

High Dynamic Range technology in Blu-ray Players when connected to a compatible 4K HDR television lets you experience more detail and captivating colors for an even more engaging television experience. More perceivable shades of blacks, whites and all other colors. This boils down to greater perceived brightness and contrast with darker shadows creating a breathtaking image.

Higher peak bitrate 4K BDP

4K Blu-ray format supports more than twice the peak bitrate of 2K Blu-ray which comes in especially handy when watching action movies which have fast paced scenes with a lot of detail. The 100 Mbps peak bitrate of 4K Blu-ray provides enough headroom to store the extra data required to encode high detail fast action scenes and avoid block artifacts.

BDP5502/F7

Wide Color Gamut (BT.2020)

Wide Color Gamut televisions with BT.2020 video input support, reproduce rich colors almost twice as saturated as a standard television, which look more vivid and life-like to enhance the TV viewing experience.

Enhanced Accessibility

Enhanced Accessibility enabled products provide a more user friendly experience for visually and hearing impaired people to enjoy Philips televisions and home video players. With features such as a voice guide menu, easy to read and navigate user interface, raised guide dots on key remote control buttons and large format support information so visually impaired people can reach customer care; Philips cares about accessibility and wants everyone to enjoy television.

HomeNetwork Multimedia Browser

With support for a vast number of formats such as H.264, AAC, MP3, JPEG, HEVC*, VP9* (* on 4K TVs) and more, conveniently enjoying your personal media via Home Network Multimedia Browser has never been easier.

Specifications
