

Push pull lock

## 9000 series

Intuitive push-pull use

**Auto Locking Function** 

Indoor infrared sensor unlock

Link with IoT gateway

DDL193LAFBG

## Smart life

## Safety under control in the age of IoT

Enjoy the extreme convenience brought by the intuitive fingerprint verification, full auto switch, and infrared sensor. Link with IoT gateway and smart door viewer makes security assured at your fingers.

## Extraordinary design brings outstanding experience

· Unlock swiftly at one go

## Multiple protection in one for overall home safety

- · Instant alert upon inside unlocking
- · Protect your password security in real time
- · Higher lock reliability and better home security
- $\boldsymbol{\cdot}$  Care more about safety of children and pets

## Life is more than convenient

- Unlocking once detects the hand
- Enjoy the reassurance after closing the door

## Smart life lock with excellence

- better security assured by IoT
- · Provides linkage to future life

Push pull lock DDL193LAFBG/97

# Highlights

### **Auto locking**

Philips 9300 push-pull smart door lock employs full automatic mortise. Without the need for any extra action, the deadbolt will spontaneously pop up after closing the door. If the door is not locked up, the mortise will give an alert to remind you of the door lock status.

#### C-grade lock cylinder

The lock cylinder is the key component that controls the opening of the lock. The C-grade lock cylinder employs multiple anti-theft technologies with a unique design of pin tumbler and vane structure, that can provide high deterrence against technical lock-picking.

## **Functional buttons**

[Open]: Double click the button within one second could unlock the door, which prevents accidentally unlocking by children and pets effectively. [Close]: Click once on the button could lock the door. Long pressing the button could enable inside deadlock. You could use the master PIN code or mechanical key to disable inside deadlocking. Simultaneously press the [Open] and [Close] buttons could enable or disable the inductive unlocking function.

#### Gateway & smart door viewer\*

You can remotely view unlocking records and distribute a one-time PIN code at any time via the gateway. The smart door viewer will take photos or videos, then upload them to the App under the abnormal alert, when it is binding with the door lock, so that users could get to know various situations from the inside and outside of the door.

#### **Hidden PIN code**

Features with hidden PIN code technology, Philips smart door lock allows you to enter any random number combinations to successfully get identified as there is consecutive input of the correct password. This feature can effectively prevent peeping and disclosing your real password.

## Indoor infrared sensor

Features with the touch sensor and infrared sensor, when touching the touch sensor and the infrared sensor detects an obstruction, the door will be unlocked.

## **Instinctive fingerprint**

The fingerprint sensor is integrated with the push-pull handle so that when you hold the handle, your finger will naturally fall on the sensor. You can simply reach out and touch the sensor, then push to open after a successful fingerprint verification. The one-step unlocking feature will bring you a fast and convenient door opening experience.

#### **Outside forced lock**

Before leaving home, you can enable the outside forced locking by touching the functional button, under which mode, opening from the inside will trigger an alert. This feature can effectively remind you of security risks and upgrade the level of home security.

## Wireless network extension

you can remotely manage the access of door locks, monitor the status of door locks in real-time, view the access logs at any time, and achieve personalized management of smart door locks.

## Specifications

#### **Access Solution**

Bluetooth Card/Key Tag Fingerprint Mechanical Key Password/PIN Code

#### **Smart Lock Functions**

Alarm Function: Anti-prying alarm, Outside

forced lock alarm

Locking Function: Electronic deadlock, System

locking
