DDL709NCAGBW

Smart capturing Face ID

Enjoy a touchless door opening experience

Experience touchless door opening with Philips facial recognition door lock. With 3D face unlock technology, the lock captures facial features to provide fast and convenient unlocking as you approach the door.

Secure protection, smart embedded

- Your instant house guarding assistant
- Instantly protect home security at all times

Easy life goes beyond this

- Clearer view of the doorway
- Eliminates the hassle of manually locking upon closing
- Door unlocks when it detects your hand
- Say goodbye to the key-only era

Smart life "locked" with excellence

- With touch-free convenience
- Keeping you informed of outdoor situations at all times
- Stay connected to your home from anywhere
- Encrypted data is less likely to be lost

PHILIPS

Highlights

3D face unlock

With dual cameras that simulate human eye imaging and obtain 3D features on people's faces, our lock can effectively identify individuals in photos, videos, and even with makeup. The ultrasonic sensor* initiates facial authentication as you approach within 1 meter of the lock, retracting the latch bolt automatically upon successful recognition. Walk right in without any extra steps!

Realtime Wi-Fi connection

The Philips facial recognition door lock supports Wi-Fi connection, allowing you to stay informed with real-time updates. After binding with the WeChat Mini Program, it allows you to view access history, remotely send temporary PIN codes, and check the live situation at the doorway with just a tap on the video button.

With remote video intercom

Our smart lock sends an instant notification to your WeChat Mini Program when a visitor

rings the doorbell. With just a tap, you can engage in a real-time, two-way intercom and remotely view the outdoor situation. Plus, the lock automatically takes a photo or records a video when the doorbell is pressed, allowing you to always check visitor information through the access history, even if disconnected.

Cloud storage*

If the lock detects anything unusual outside, it will capture a video and upload it to a cloud storage server with encryption. Even if the lock is damaged or not working, the information stored on the cloud server is less likely to be lost and can be accessed at any time through the WeChat Mini Program.

Smart motion tracking

Equipped with an ultrasonic sensor, the Philips DDL709-FVP-7HW door viewer automatically performs motion tracking and sends notifications to the WeChat Mini Program when someone moves within 2 meters* of the front door. The facial recognition module also starts working when someone approaches the door from less than 1 meter away, providing quick authentication without any delays.

Multiple alerts

Equipped with anti-dismantling, system locking, low battery level, and abnormal bolt alerts, this smart lock instantly protects your home security and keeps you informed of its status in real-time, allowing you to know that your home is always secure with Philips.

4-inch IPS screen

Experience easy viewing of your doorway and access history with our 4-inch IPS screen on the indoor assembly. Simply tap the button for a clear view outside, and turn off the screen with another tap, which is convenient for elderly and children. Additionally, you can adjust the screen's brightness and sleep mode timeouts via the WeChat Mini Program.

Specifications

Design & Appearance

- Color: Obsidian black
- Handle: Push-pull handle
- Main Material: Aluminium alloy
- Fingerprint Sensor: Semiconductor

Access Solution

- Fingerprint
- Password/PIN Code
- Card/Key Tag
- Mechanical Key
- Face Unlock

Power Specification

- Battery Type: Li-polymer Battery
- Time of Use: 3 months*
- Emergency Power Supply: 5V power bank

Easy Operation

- Voice Guide: Human voice guide

Smart Lock Functions

- Mortise: C grade lock cylinder, Full auto mortise

Installation

- Door Thickness: 38-60 mm, 60-90 mm, 90-120 mm, Other range*
- Door Opening Direction: Left inward opening, Left outward opening, Right inward opening, Right outward opening
- Door Type: Wooden door, Copper door, Antitheft door

www.philips.com

* Ultrasonic sensor: it is a proximity sensor that is enabled by default and has a sensing distance of 1 meter (tolerance of +0.05 meter) when activated by facial recognition wake-up.

* Cloud storage: Only users who have subscribed to the cloud storage service can access stored video history. Other users can only view high-definition snapshots.

* 2 meters: the maximum distance detected by the ultrasonic sensor in case of abnormality. The loitering alarm function is disabled by default, but can be enabled through the WeChat Mini Program and set the detection distances to 1 meter, 1.5 meters, or 2 meters.

* 3 months standby time: It comes from laboratory data, and the actual battery time may vary upon the frequency of use.

* The effect of the digital keypad showed in the photos of this product may be inconsistent with the actual display effect. Please be subject to the digital keypad displaying status under the actual usage scenarios.
