## Care of the screen

See Tips, p. 28.

## End of life directives

Philips is paying a lot of attention to produce environmentally-friendly products in green focal areas. Your new TV contains materials which can be recycled and reused. At the end of its life specialized companies can dismantle the discarded TV to concentrate the reusable materials and to minimize the amount of materials to be disposed off. Please ensure you dispose off your old TV according to local regulations.

## Recycling

The materials used in your set are either reusable or can be recycled. To minimise environmental waste, specialist companies collect used appliances and dismantle them after retrieving any materials that can be used again (ask your dealer for further details).

## A Guide to Digital TV

### What is Digital Television (DTV)?

Digital Television (DTV) is a relatively new type of broadcasting that promises to transform television viewing into a whole new experience. Digital technology is used to capture images and sound to deliver a better picture quality. DTV technology is also capable of multicasting and interactive capabilities.

There are many levels of digital television quality. The most common are:

### Standard Definition TV (SDTV)

SDTV is the basic level of quality display and resolution for both analog and digital. Transmission of SDTV can be in the traditional (4:3) or widescreen (16:9) format.

### Enhanced Definition TV (EDTV)

EDTV is better in picture quality than analog television. The formats for EDTV are 480p widescreen (16:9) or traditional (4:3). EDTV is in the middle range quality between SDTV and HDTV.

### High Definition TV (HDTV)

HDTV has the highest quality for digital broadcast formats. Its resolution is widescreen format (16:9). Combined with digitally enhanced sound technology, HDTV sets new standards for sound and picture quality in television.

DTV is by far a more flexible and efficient technology than the analog broadcast system. Analog broadcasts can only provide one program at a time. Digital television can broadcast a high definition program or more than one standard definition program at the same time. This is often referred to as "multicasting". Digital television can also give you interactive video and data services through a single digital channel.

## Preparation

**Note :** Use only a soft cloth to clean the glossy front of the TV.

**Do not insert the power plug in a wall socket before all connections are made.**

Place the TV on a solid surface or place the TV on the supplied stand. For the mounting instructions of the stand, see the Cover Page. For ventilation, leave at least 4" to 6" free all around the TV. Do not place the TV on a carpet. To prevent any unsafe situations, no naked flame sources, such as lighted candles, should be placed in the vicinity. Avoid heat, direct sunlight and exposure to rain or water. The equipment shall not be exposed to dripping or splashing.

### Mounting the TV on the wall

This TV is compatible with the VESA wall mounting standard. Please contact your local electronics retailer for a VESA compliant bracket to wall mount this TV.

**Caution:** Installing the TV requires special skill that should only be performed by qualified personnel. You should not attempt to do the work yourself. Philips bears no responsibility for improper mounting or mounting that results in accident or injury.

## 1 Basic connections to the TV

Your integrated digital TV automatically decodes and displays the four basic DTV picture resolution standards.

- SDTV (Standard Definition TV) are broadcast as 480i (480-line interlaced) or 480p (480-line progressive scan) video.
- HDTV (High-Definition TV) are broadcast either in the 1080i or 720p formats, always with a widescreen picture.

*Note: Progressive scan video (p) is more like that you see in a movie theater. Images are much more distinct and free of flicker, and motion is smoother.*

Next to analog NTSC broadcast reception, your TV has an integrated High Definition TV tuner which receives, decodes and displays terrestrial ATSC and unscrambled cable (QAM) signals.

HDTV quality is only reproduced when a broadcaster or cable provider broadcasts HDTV signals.

There are 2 ways to get HDTV content:

- via cable,
- via antenna.

*Note: This drawing is used wherever you can connect cable or antenna.*

### Watching Cable TV programs that don't require the cable box

Since you've connected the cable TV signal directly to the TV's tuner, you can also watch the unscrambled programs by simply tuning to the desired channel. You must first use Autoprogram, however, to store channels in the TV's memory. See page 18.

*Note: This connection will supply stereo sound to the TV if it is being broadcast by the station you are watching.*

### - Cable TV

Connect the cable TV signal to the CABLE/ANTENNA 75 Ω jack at the bottom of the TV. See page 18 for details on using Autoprogram to store channels in the TV's memory.

*Note: this connection will supply stereo sound to the TV if it is being broadcast by the station you are watching.*

### - Cable box with RF IN/OUT

- Connect the incoming cable TV signal to the cable **IN** jack ① on the back of the cable box.
- Connect a coaxial cable (not supplied) from the **TO TV** jack on the back of the cable box to the CABLE/ANTENNA 75 Ω jack ② at the bottom of the TV.  
*Note: Your cable box may have a different label for the TO TV jack, such as OUTPUT or OUT.*
- Set the **OUTPUT CH** switch ③ of the cable box to **CH 3** or **4** (whichever is correct for your cable box), then tune the TV to the corresponding channel. Once tuned, change channels at the cable box, not the TV.

*Note: This connection will not supply stereo sound to the TV. The reason is that the RF output on a cable box - labeled TO TV, OUT or OUTPUT for example - will not send a stereo signal to the tuner (VHF/UHF) input on a TV.*

### - Cable box with A/V outputs

- Connect the incoming cable TV signal ① to a signal splitter (not supplied). The signal splitter enables you to avoid having to use the TO TV jack on the back of the cable box. This jack will not supply stereo sound to the TV.  
*Note: Your cable box may have a different label for the TO TV jack, such as OUTPUT or OUT.*
- Connect a coaxial cable (not supplied) to a connector on the signal splitter and to the CABLE/ANTENNA 75 Ω jack ② on the TV.
- Connect another coaxial cable (not supplied) to a connector on the signal splitter and to the cable **IN** jack ③ on the back of the cable box.
- Connect A/V cables (not supplied) to the **VIDEO** and **AUDIO L** and **R** outputs on the back of the cable box and to the **AV2** video (labeled **VIDEO**) and **AUDIO** (labeled **L** and **R**) jacks ④ on the back of the TV.
- To view programs from your cable box, first press the **SOURCE** button on the remote control.
- Press the cursor down or up buttons until the **AV2** signal source is selected.
- Press the **OK** button to confirm your selection. The **AV2** input source becomes current for the viewing of cable TV programs through your cable box.

*Note: If your cable box Audio/Video outputs will not supply video and stereo audio to the TV, you will need to make the connection shown above in the example "Cable box with RF IN/OUT".*

- **Cable box with S-Video, component video (YPbPr) or HDMI connectors**

See Connect Accessory Devices, p. 22.

- **Antenna**

Via antenna you can watch whatever DTV programs being broadcast in your area for free.

If you're not sure what HDTV programming is available in your area, contact your local content provider or your local electronics store retailer.

Broadcasters are in the middle of a transition from analog to digital TV. This means that a given broadcaster will have two channels on the air, one analog and one digital.

Connect the incoming antenna signal to the **CABLE/ANTENNA 75 Ω**

⏏ jack at the bottom of the TV. See page 18 for details on using Autoprogram to store channels in the TV's memory.

*Note: This connection will supply stereo sound to the TV if it is being broadcast by the station you are watching.*

- **Direct Broadcast Satellite (DBS)**

Satellite systems offer many of the same premium channels as cable systems, and often at a lower price. To get these channels, you'll need to install a small dish antenna outside.

There are 2 main DBS systems: DirecTV & DishNetwork. These systems require separate, proprietary set top receiver boxes to decode their signals and send them to your digital TV set. These boxes may include a digital TV tuner for off-air DTV broadcasts.

Satellite broadcasters also provide major local channels, depending on the market in which you live.

DBS also provides service in areas not covered by cable because they are in rural areas or other areas not passed by a cable line.

DBS also allows you to watch pay-per-view events.

- ❷ Before installing your TV or before hanging it on the wall, connect all your accessory devices. See p. 22.
- ❸ Refer to the bottom of the set for the correct operation voltage. Insert the power cord in the wall socket.  
Consult your local dealer if your mains supply is different. To prevent damaging the mains (AC) cord which could cause a fire or electric shock, do not place the TV on the cord.
- ❹ Remote control:  
Insert the 2 batteries supplied (Type R6-1,5V). Be sure the (+) and (-) ends of the batteries line up correctly (inside of case is marked.)  
*The batteries supplied do not contain the heavy metals mercury and cadmium. Please check on how to dispose of exhausted batteries according to local regulations.*
- ❺ Turn the TV on:  
Press the power switch  at the side of the TV. You may also press **+CH-** or **POWER** button on the remote control.  
The TV can take up to 15 seconds to power up.  
A blue indicator light on the front of the TV lights up.

## First time installation

Note: **The first time** (and only the first time) you turn on your set you see an installation introduction screen. The **Installation procedure** consists of a series of screens that guide you through the process.

- 1 After an introduction screen, you are asked to select a language of the TV's on-screen-menus. (The text of the header and the info on screen continuously change language.)
- 2 Press the cursor up/down to highlight your language.
- 3 Press the **OK** button.
- 4 Follow the on-screen instructions to proceed.

### Part 1: TV installation

(Please skip this section if you have no cable connected to the Antenna input of the TV, and continue with Part 2.)

**Note - The TV will take approximately 10-15 seconds to start up.**

- 1 Select the desired **Language** and press the green button "**Next**".
- 2 Select **Cable** or **Antenna** in the Installation mode and press the green button "Next".
- 3 Auto Installation may take **20 to 40 minutes** depending on the number of channels that are transmitted by the cable provider or broadcaster.
- 4 When the TV is not receiving any signal from the antenna/cable, the message **CHANNEL NOT AVAILABLE** will appear on the TV screen. When no transmission is received from the broadcaster, a **BLANK SCREEN** will appear on the TV screen.  
Note - The TV will go on to standby after 10 minutes. Press the **POWER** button on the remote control to turn on the TV.
- 5 You will not be able to receive pay channels when using direct antenna/cable connection to the television.
- 6 When the Set-top box is connected to the television using coaxial cable, it is necessary to auto-program the television for the single channel (3 or 4) that the Set-top box outputs and change the channels at the Set-top Box (using the set-top remote control) to view the program. Refer to the manual for more details.  
Note - The newly installed channels maybe sorted in a different sequence on this TV. Use the CH +/- buttons to get to know the new channel. You can also use the OK button to see the list of channels.
- 7 When the Set-top box is connected to the television using one of the AV connections (AV 1/ AV 2/ HDMI 1/ HDMI 2), select that input source (using the Source button) to view the programs and change the channels at the Set-top Box (using the set-top box remote control) to view the program.

### Part 2: Settings assistant

By means of several split screens/full screens you are prompted to select your preferred picture and sound settings, to finally arrive at a complete setting which satisfies you.

- 1 Press the green color button on your remote control to enter the **Settings assistant** menu.
- 2 Select your **Location** with the cursor up/down and press the green color button.  
If you choose **Shop** it will skip the Settings assistant. The TV parameters for Picture and Sound will then be set to predefined fixed settings. Press the green color button again to proceed.  
If you choose **Home** it will display the Settings assistant.
- 3 Use the cursor left/right to each time select your preferred screen.
- 4 Press the green color button to each time confirm your selection and to jump to the following screen.  
The following items will be presented sequentially. In the header it is mentioned how many screens have been completed and how many screens there are in total. The Settings assistant will step sequentially through the following settings: Picture, Sound and Ambilight.
- 5 Press the green color button once to store all the settings and to return to the TV installation menu.  
Note: When you skip or stop the Settings Assistant, then the Standard settings Philips selected for you will be chosen.
- 6 Press the red color button to finish the First time installation procedure and to display the first stored TV channel.

## Use of the remote control

Note: For most buttons pressing a button once will activate the function. Pressing a second time will de-activate it. When a button enables multiple options, a small list will be shown. Press repeatedly to select the next item in the list. The list will be removed automatically after 6 seconds or press **OK** to remove immediately.

### POWER

Press to turn on/off the TV from or to standby mode.

The TV is never powered off completely unless it is physically unplugged.

### DEMO Demo menu on/off

See p. 9.

### Color buttons

When functions attached to the color buttons, the color buttons are shown on screen.

### OPTION

To select the Audio language, Closed Captions, Picture format, Equalizer and Clock.

### OK

- to activate a setting
- to display the list of channels stored (according to the selection made in the Installation mode (Antenna or Cable), p. 18.
- starts playing content in the Home Multimedia Browser application, p. 25.

### MENU

Settings menu on/off, see p. 9.  
Exit menu from sub-menu.

### VOL (Volume)

Press + or - to adjust the volume.

### MUTE

Turn off or on sound.

### SOURCE

Press this button repeatedly to select the source - **AV 1, AV 2, HDMI 1, HDMI 2, SIDE or TV** when in TV mode, according to where you connected the accessory devices (p. 22).

### Cursor buttons

Press the cursor buttons up/down, left/right to navigate through the menus.

### CH Channel selection

- To browse through the TV channels.
- To select between Antenna or Cable TV channels, first make your selection in the Settings menu, see, p. 18.

Note: You don't have to start the installation again once you have searched for and stored the available TV channels.

### PREV CH

Press to alternate between the currently viewed channel and the previously viewed channel.

- Press the dot (.) for digital channels.

### INFO

**Display information:** Press to display (when available) information about the selected TV channel and program or accessory device. The quality and accuracy of the information on the information banner are transmitted from broadcasters. You may see a difference in broadcast time if the broadcaster is from a different time zone area.

**Display clock:** Select to activate/deactivate the clock display on the screen.

To be continued.

### FORMAT

Press this button to summon a list of available display formats (depending on the receiving signal). This lets you choose the display format of your preference.

Press this button repeatedly to select another picture format: Automatic, Super Zoom, 4:3, Movie expand 14:9, Movie expand 16:9, Wide screen.

Automatic makes the picture fill the screen as much as possible.

Super zoom removes the black bars on the sides of 4:3 programs with minimal distortion.

When in Movie expand 14:9, Movie expand 16:9 or Super zoom picture format, you can make subtitles visible with the cursor up/down.

*Note: With HD sources not all screen formats will be available.*

### AMBILIGHT

- **Ambilight** Press to switch Ambilight **On** or **Off**. For the Ambilight settings, see TV menus, Ambilight, p.13
- **MODE** Press this button repeatedly to toggle through the Ambilight modes.

### FAVORITES

- **VIEW** To display a list of all channels marked as favorite (incl. subchannels).
- **✓** No function.

## Control Buttons on the TV

Should your remote be lost or broken you can still change some of the basic settings with the buttons on your TV.

Press the power switch to switch the TV on.

Press:

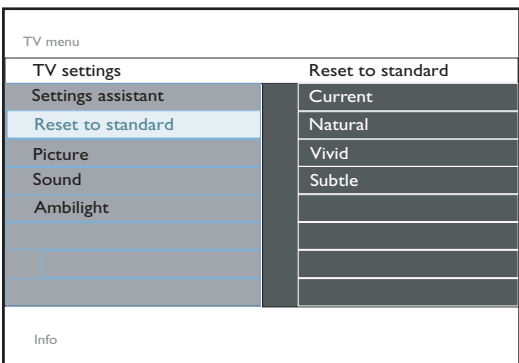

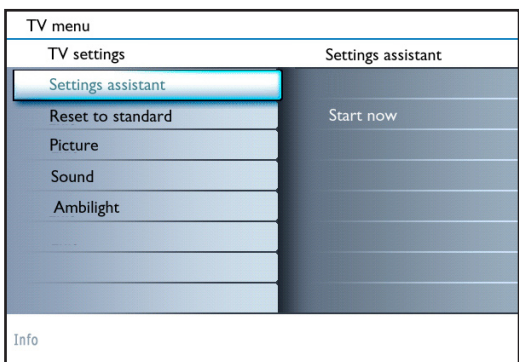

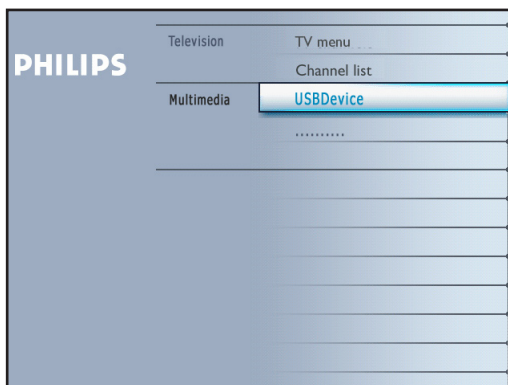

- the + **VOLUME** - button to adjust the volume.
- the + **CHANNEL** - buttons to select the TV channels or sources.

The **MENU** button can be used to summon the Settings menu without the remote control.

Use:

- the + **VOLUME** - buttons to select left/right menu items and the + **CHANNEL** - buttons to select up/down menu items.

## TV settings

### Settings assistant

Each time you have made a selection, press the green color button to confirm your selection.

- 1 Select **Settings assistant** and press the cursor right.  
Note: By means of several split screens/full screens you are prompted to select your preferred picture, sound and ambilight settings to finally arrive at a complete setting which satisfies you.  
See *First time installation*, p. 5.
- 2 Press the green color button to return to the TV menu again.

### Reset to standard

This allows you to reset your settings for viewing and listening to predefined factory settings.

- 1 Select **Reset to standard** and press the cursor right.  
A menu appears which allows you to select one of the standard settings for viewing and listening.  
**Current:** shows your current settings for viewing and listening.  
**Natural :** allows you to set your picture and sound settings to the recommended standard values. In most cases this will give the best balanced viewing experience.  
**Vivid :** allows you to set your picture and sound settings to rich values, making use of the TV capabilities to its full extend.  
**Subtle :** allows you to set your picture and sound settings to the purest representation of the original source content.
- 2 Press the green color button to store the selected setting.

## To use the menus

### Introduction

A lot of guiding instructions, help texts and messages will be displayed on your TV when using the menus or when trying to execute an action. Please, follow the instructions and read the help text which are being displayed on the specific item highlighted.

The color buttons refer to different actions which may be executed depending on the activated device. Press the corresponding color button on the remote control to perform the required action.

TV menu	TV settings
TV settings	Settings assistant

	Ambilight
Info	

### How to navigate through the TV menu

The TV menu allows you to access and change settings and preferences.

- Press the **MENU** button on the remote control to summon the TV menu.
  - On the left panel the highlight can be set on a menu item with the cursor up/down. The right panel shows the content of the highlighted menu item in the left panel.
 

*Note: Sometimes not all the menu items are visible on the screen. Use the cursor down to reveal all items.*
  - Use the cursor right to enter the right panel. The content of the right panel is moved to the left panel and the right panel shows the content of the newly highlighted item in the left panel.
 

*Note: In some cases it is important that the picture can be watched while adjusting the settings. This means that when the highlight is on the right side panel, the other menu items hide away. When the cursor left is pressed again, the hidden menu items re-appear and the highlight moves to the left panel.*
- Press the cursor left to go one menu level up again.
  - Press the **OK** button on the highlighted item to activate and to dismiss the menu.
  - Press the **MENU** button again to exit the Settings menu.
 

*Note: The menu is also dismissed by pressing one of the color buttons (if present) referring to certain actions which may be executed.*

### Demo

TV menu	
Features	Demo
Caption service	Pixel Plus
Digital caption service	Ambilight
Digital caption options	Settings assistant
Sleeptimer	Active control
Child lock	
Set PIN	
On timer	
Demo	
Info	

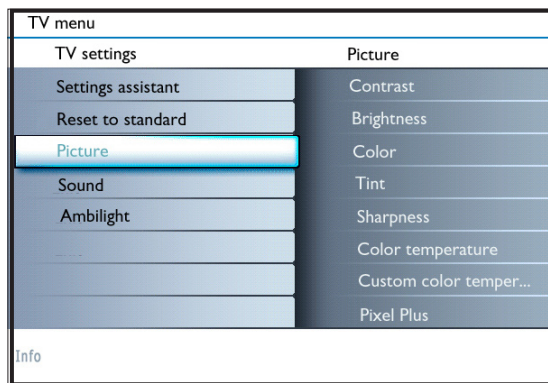

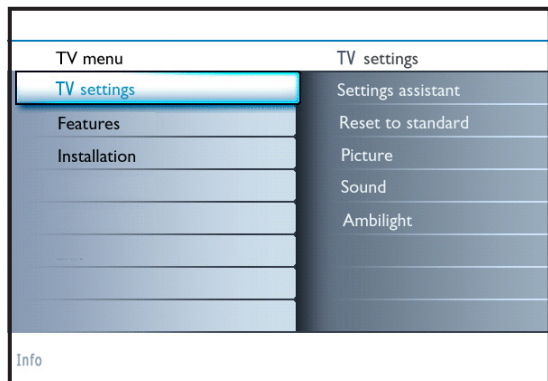

The **Demo** menu allows the user to get an idea of the features that are part of the television.

- Select **Demo** in the Features menu and press the cursor right.
- Highlight a desired demo with the cursor up/down.
- Press **OK** to start playing the highlighted demo. Press the red color button to stop the function. Press the red color button again to exit the demo and to return to TV mode.

*Note: The selected demo is played once.*

*The demos require no user interaction except for starting the demo.*

## Picture menu

Press the **MENU** button on the remote control to summon the TV menu. The TV menu gives you an overview of the menus you can select.

*Note: Depending on the input signal, one or more menu items may not be selectable.*

### Picture menu

*Note: Some menu items are not available in case of HD sources.*

- ❶ Press the cursor right to select **Picture**.
- ❷ Press the cursor right again to enter the Picture menu.
- ❸ Select the menu items with the cursor up/down.
- ❹ Adjust the settings with the cursor left/right or enter the list of submenu items with the cursor right. Select a submenu item with the cursor up/down.

#### Contrast

This will adjust the intensity of bright parts in the picture but keep the dark parts unchanged.

#### Brightness

This will adjust the light output of the complete picture, which will mainly affect the darker areas of the picture.

#### Color

This will adjust the saturation level of the colors to suit your personal preference.

#### Tint

Allows you to select the color mix (hue) of the picture.

#### Sharpness

This will adjust the sharpness of fine details in the picture.

#### Color temperature

This will increase or decrease **Warm** (red) and **Cool** (blue) colors to suit personal preferences.

Select **Cool** to give the white colors a blue tint, **Normal** to give the white colors a neutral, **Warm** to give the white colors a red tint.

#### Custom color temperature *(only when Color temperature is set to Custom)*

Fine tunes the white point (**WP**) and black level (**BL**) of the picture.

- ❶ Select **Custom color temperature** and press the cursor right.
- ❷ Use the cursor buttons to select and adjust the settings of:
  - R-WP**: allows you to customize the color temperature by adjusting the red whitepoint of the picture.
  - G-WP**: allows you to customize the color temperature by adjusting the green whitepoint of the picture.
  - B-WP**: allows you to customize the color temperature by adjusting the blue whitepoint of the picture.
  - R-BL** : allows you to customize the color temperature by adjusting the red blacklevel of the picture.
  - G-BL** : allows you to customize the color temperature by adjusting the green blacklevel of the picture.
- ❸ Use the color button to reset to the predefined settings.
- ❹ Press the cursor left to return to the Picture menu.

#### Pixel Plus

for everyday viewing, Pixel Plus is the most ideal setting, as it fully processes the image to make every single pixel the best it can be, improving contrast, sharpness, picture depth, and color reproduction and brilliance from every source, including High Definition.

TV menu   TV settings	
Picture	Active Control
Custom color temperature	Off
Pixel Plus	On
Dynamic contrast	
DNR	
MPEG artifact reduction	
Color enhancement	
Active control	
Picture Format	
Info	

### Dynamic contrast

Automatically makes the contrast in the darker and the brighter picture areas more noticeable as the image on the screen changes. Normally select **Maximum**. It may be preferred to select **Minimum**, **Medium**, **Maximum** or **Off**.

- 1 Press the cursor right to enter the list.
- 2 Select one of the settings with the cursor up/down.
- 3 Press the cursor left to return to the picture menu.

### DNR (Digital Noise Reduction)

Automatically filters out and reduces the image noise and improves picture quality when receiving weak video signals.

- 1 Press the cursor right to enter the list.
- 2 Select **Off**, **Minimum**, **Medium** or **Maximum** according to the image noise.
- 3 Press the cursor left to return to the picture menu.

### MPEG artifact reduction

**MPEG artifact reduction On** smoothenes the transitions on digital content.

- 1 Select **On** or **Off**.

### Color enhancement

When activated, this feature automatically controls green enhancement and blue stretch. It makes the colors more vivid.

- 1 Press the cursor right.
- 2 Select **Off**, **Minimum**, **Medium** or **Maximum** in order to activate/de-activate Color enhancement with the cursor right.

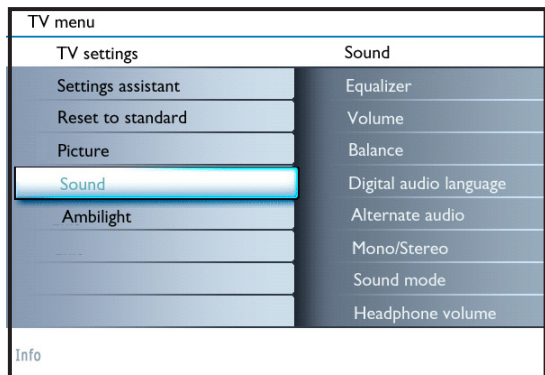

### Active Control

The TV continuously measures and corrects all incoming signals in order to provide the best picture possible.

- 1 Select **Active Control**.
- 2 Press the cursor right to enter the list of Active Control values.
- 3 Press the cursor right repeatedly to select the Active Control values **Off** or **On**. The picture settings are being optimized continuously. Those menu items can not be selected.
- 4 Press the **OK** button or wait for the time out to dismiss the Active Control display.

### Picture format

This menu item performs the same as the **FORMAT** button on the remote control. See Use of the remote control, p. 6.

## Sound menu

- 1 Select **Sound** in the TV Settings menu.
- 2 Press the cursor right to enter the sound menu.
- 3 Select the menu items with the cursor up/down and adjust the settings with the cursor left/right.  
Remember, control settings are at normal mid-range levels when the bar scale is entered.

### Equalizer

Allows you to change the frequency response of the sound to match your personal taste.

### Volume

This will adjust the sound output level.

### Balance

This will adjust the output of the right and left speakers to obtain the best stereo reproduction for your listening position.

### Digital audio language *(only selectable with digital broadcast signals)*

This allows you to select your language preference in case of multilingual audio track programs if available with digital broadcast signal.

*Note: The default language for the digital channels is the installed menu language.*

### Alternate audio *(only selectable with analog broadcast signals)*

This gives you the possibility to swap between the Main and Second audio Program (SAP) when it is available.

### Mono/Stereo

This selects, per TV channel, Mono or Stereo sound when analog stereo broadcasts are available.

### Sound mode

This selects the modes for stereo or surround sound reproduction dependent on the broadcast signals or signals from external inputs received.

### Headphone volume

This controls the level of sound through the headphones.

### AVL (Automatic Volume Leveler) *(only available with analog broadcast and non-Digital signals)*

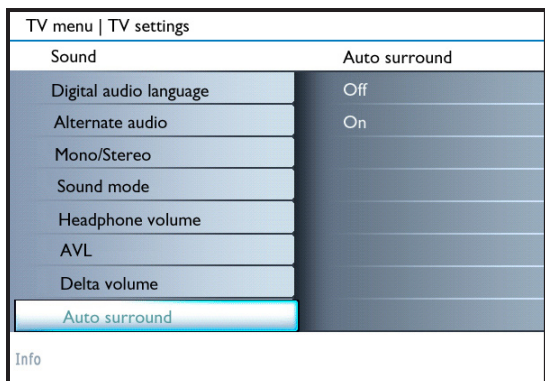

This automatically reduces the volume differences between channels and programs, providing a more constant overall level. This will also reduce the dynamics of sound.

### Delta volume

This allows you to correct for any permanent volume differences between TV channels or external sources.

### Auto surround

Sometimes the broadcaster transmits special signals for Surround sound encoded programs. The TV automatically switches to the best surround sound mode when **Auto surround** is switched **On**.

### CAUTION: Infrared interference

To avoid bad infrared remote control reception, place your peripheral equipment out of sight of the ambient lights of your TV. Ambilight does not function well when the room temperature is less than 59°F/15°C.

## Enjoy Ambilight

The ambilight menu contains the settings for controlling the ambient lighting. Using ambient light gives a more relaxed viewing experience and improves perceived picture quality. Analysis of the picture content adapts the colors continuously. But the lights can also be set to any fixed color and many shades of white.

- 1 Press the **MENU** button on the remote control.
- 2 Use the cursor down to select **TV settings** in the TV menu.
- 3 Use the cursor right to enter the **TV settings menu**.
- 4 Select **Ambilight** and press the cursor right.

### Ambilight

**Off:** will switch off the ambient lights and downlight all other menu items.

**On:** the ambient lights will be on. Refine the light settings in the menus below.

### Brightness

To adjust the light output of the ambient lights.

### Mode

**Color:** this will show constant light according to the settings in the Ambilight color menu. See below.

**Relaxed:** the rate of brightness and color change is smoothly and soft which gives you a more immersive yet relaxed viewing.

**Moderate:** the rate of brightness and color change as predefined in the factory.

**Dynamic:** will influence the dynamic impression.

Notes: - The rate of change is limited, as not to cause uncomfortable sensations.

- According to the selection made, some Ambilight menu items will be downlighted and can not be selected.

### Color

Select **Color** and press the cursor right.

**Warm white:** The color is matched to that of most normal lightbulbs. Select this setting if you want the Ambilight to fit best with normal living room lighting.

**Cool white:** The color is matched to that of normal daylight (6500K). Select this setting if you prefer more cool lighting.

Note: The 6500 K is the SMPTE recommended setting for ambient backlighting of displays.

**Blue:** The blue color is preferred by most consumers to create a cool, modern and/or mystical atmosphere. Select this setting according to your personal taste or mood.

**Red:** preferred by most consumers to create a cosy, special atmosphere. Select according to your personal taste or mood.

**Custom:** select if you want to customise the ambilight colour.

**Custom Color** (only available when Custom has been selected in the Colour menu.)

Allows you to customise the ambilight colour.

**Palette:** to adjust the general colour of the light output.

**Saturation:** to adjust the colourfulness of the light.

### Separation

Allows you to define the stereo effect when one of the following options is selected on the Mode menu: Relaxed, Moderate or Dynamic.

Select **Off** for a mono behavior which means that all lamps will behave equally.

Select **Minimum**, **Medium** or **Maximum** to define the Ambilight stereo effect spread over the available lamps.

### Color Boost

Allows you to adjust the color level of light intensity.

### Balance

Allows you to adjust the color level of light intensity on the sides of the picture.

### Features menu

- ❶ Select **Features** in the TV menu.
- ❷ Press the cursor right to enter the features menu.
- ❸ Select the menu items with the cursor up/down and adjust the settings with the cursor left/right.

### Closed captions

This displays the transmitted CC- or CS-text on the screen according to your chosen CC or CS service in the **caption service**. This text can either be permanently displayed (assuming that the service is available in the broadcast) or only when mute is active.

- ❶ Press the cursor right after having selected Closed captions.
- ❷ Select **On**, **Off** or **On during mute**.

### Caption service

This allows you to select the Closed Captions service levels of analog broadcasting to be displayed.

Closed Captioning allows you to read the voice content of television programs on the TV screen. Designed to help the hearing impaired, this feature uses on-screen 'text boxes' to show dialogue and conversations while the TV program is in progress. Captions will appear on the screen during captioned broadcasts.

- ❶ Select **Captions service**.
- ❷ Press the cursor right.
- ❸ Select the desired Caption service:
  - **CC 1, 2, 3 or 4**  
Dialogue (and descriptions) for the action on the captioned TV program shows on screen.  
Usually **CC 1** is the most used. **CC 2** may be used for alternate languages if they are being transmitted.
  - **T 1, 2, 3 or 4**  
Often used for channel guide, schedules, bulletin board information for Closed Captions programs, news, weather informations or stock market reports.  
Not all Caption services are necessarily being used by a TV channel during the transmission of a Closed Caption program.
- ❹ See Closed Caption in the TV, **Features menu**, **see above**, to turn the Caption service On or Off.

*Note: This television provides display of television closed captioning conforming with the EIA-608 standard and in accordance with Sections 15.119 of the FCC rules.*

#### How to switch on.

To switch ON the closed caption feature, go to feature ==> closed caption and select 'On' or 'On during mute'.

*Note: The captions do not always use correct spelling and grammar. Not all TV programs and product commercials are made for broadcast with Closed Caption informations included. Refer to your area's TV program listings for the TV channels and times of Closed Caption shows. The captioned programs are usually noted in the TV listings with service marks such as 'CC'.*

### Digital caption service

This allows you to configure the way you choose to view the digital captioning. Select one of the digital service channels made available by the caption provider. There are 6 standard services. Service 1 is designated as the Primary Caption Service. This service contains the verbatim, or near-verbatim captions for the primary language being spoken in the accompanying program audio. Service 2 is designated as the Secondary Language Service. This service contains captions in a secondary language which are translations of the captions in the primary Caption Service. The other service subchannels are not pre-assigned. It is up to the discretion of the individual caption provider to utilize the remaining service channels.

Info	

### Digital caption options

This allows you to modify how digital captions are displayed on your TV. Select from the following options to change the visual characteristics of your TV's digital captioning.

- **Reset to default**  
Select this option to reset the digital caption options back to the captions provider default settings.  
Press the **OK** button to confirm.
- **Size**  
Select this option to select the size of caption display according to your own preference.  
Select **Default (Automatic)**, **Small**, **Standard** or **Large** and press the **OK** button to confirm.
- **Style**  
Select this option to select the font style of caption display according to your own preference.  
Select **Default**, **Monospaced serif**, **Serif**, **Monospaced sans serif**, **Sans serif**, **Casual**, **Cursive** or **Small caps...**
- **Text**  
Select this option to select the text color or the opacity of the text box of caption display according to your own preference.  
Select a color and one of the opacity options.
- **Background**  
Select this option to select the character background color or one of the background opacity options of caption display according to your own preference.  
Select a color and one of the opacity options.
- **Edge**  
Select this option to select the edge color or type options of caption display according to your own preference.  
Select a color and one of the type options.

### Sleeptimer

This sets a time period after which the TV automatically turns to standby.

- 1 Select **Sleeptimer**.
- 2 Press the cursor right to enter.
- 3 Select a value with the cursor up/down. The list will have values from **0** to **180 minutes**.  
When **0** is selected, the sleeptimer is turned off.  
You can always turn off your TV earlier or select another time set.

## Child lock menu

TV menu	
Features	Child lock
Closed captions	Lock after
Caption service	Channel lock
Digital caption service	TV ratings lock
Digital caption options	Movie ratings lock
Sleeptimer	
Child lock	
Set PIN

Info	

### Child lock menu

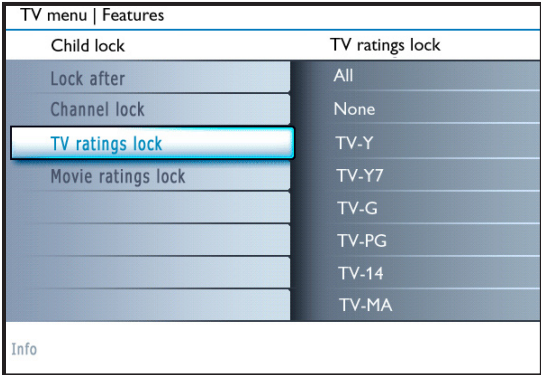

This menu can control special functions for the TV channels.

- 1 Select **Child lock** in the Features menu with the cursor up/down.
- 2 Press the cursor right to enter the child lock menu.
- 3 You will be summoned to enter your PIN (See below). Follow the instructions on screen.

#### Set/Change PIN

- 1 Select **Set** or **Change PIN** with the cursor down.
- 2 If no PIN-code exists yet, the menu item is set to **Set PIN**. Follow the instructions on screen.  
If a PIN-code has previously been entered, the menu item is set to **Change PIN**. Follow the instructions on screen.  
All number combinations from 0000 to 9999 are valid numbers.
- 3 The **Menu preferences menu** reappears with a message confirming that the PIN has been created.

Age-based Rating	Content-based Rating
All	none
None	none
TV-Y	none
TV-Y7	(FV) Fantasy Violence
TV-G	none
TV-PG	(D) Dialog (L) Language (S) Sex (V) Violence
TV-14	(D) Dialog (L) Language (S) Sex (V) Violence
TV-MA	(L) Language (S) Sex (V) Violence

## Lock after

*Note: Lock after is only selectable if time is known. See Clock menu, p. 21.*

This allows you to prevent the viewing of the channels after a selectable time delay. Locked channels can still be tuned, but the picture is blanked and the audio is muted.

- 1 Press the cursor right and select **Timer** or **Time**.
- 2 Select **Time/Timer** and press the cursor right. This allows you to set the time after which the lock is set.
- 3 Select **AM** or **PM** to select the correct period of the day.
- 4 Enter the time with the digit or the cursor buttons and press **OK** to confirm.

## Channel lock

This allows you to completely lock a certain TV channel or external source. Select the channels or subchannels you want to lock and press **OK** to confirm.

## TV ratings lock

Your TV is equipped with a V-chip. This allows you to control access to individual programs based on their movie and TV ratings. All settings apply to all AV inputs, except HDMI. The program content advisory data are sent by the broadcaster or program provider.

- 1 Select **TV ratings lock** with the cursor down.
- 2 Press the cursor right to enter the list.
- 3 Select an age-based TV rating with the cursor up/down, and enter, if present, the list with content-based ratings with the cursor right, and select one content-based rating.
- 4 Press **OK** to activate/de-activate the selected rating.
- 5 Select another content-based rating if you like and press **OK** again.

You need only enter your PIN-code once while the menu is active.

You can lock/unlock any number of ratings on the list without re-entering your code.

Each ratings item has a box-graphic in front of it to indicate whether or not programs carrying that rating are currently locked:

- box with a 'X': all items in the contents-based list are locked as well;
- empty box: the item is unselected;
- box with a '/': some content-based ratings are selected/unselected.

When **All** has been selected, all items in the age-based and in the contents-based lists are locked.

If, while **All** is selected, any other item, either an age-based or content-based item, is unselected, then **All** is automatically unselected.

**None** is the selection for items that either have no rating information or have a rating of **None**. Both will be locked.

When an item on the age-based list is selected, all items below that item of the same group are locked as well.

When you select a content-based rating, all identical content-based ratings in the younger age-based categories are also selected.

**TV-Y** appropriate for children of all ages with themes and elements suitable for children aged 2-6

**TV-Y7** programs designed for children age 7 and older

**TV-Y7-FV** programs include fantasy violence more intense than other programs in the TV-Y7 category

**TV-G** programs suitable for all ages. These programs contain little or no violence, no strong language and little or no sexual dialogue or situations

**TV-PG** programs contain elements that some parents may find unsuitable for younger children and which may need parental guidance. The program may contain moderate violence, sexual dialogue and/or situations and some strong language.

**TV-14** programs contain elements that may not be suitable for children under 14 years of age. These programs include one or more of the following: intense violence, intense sexual situations, suggestive dialogue and strong language.

**TV-MA** programs are designed to be viewed by adults and may be unsuitable for children under the age of 17. These programs may contain graphic violence, explicit sexual activity and/or crude or indecent language.

TV menu   Features	
Child lock	TV ratings lock
Lock after	All
Channel lock	NR
TV ratings lock	G
Movie ratings lock	PG
	PG-13
	R
	NC-17
	X
Info	

**NR** not rated

**G** movies with a mild content, suitable for all ages

**PG** movies for which parental guidance is recommended. They may contain a few racy or violent scenes or maybe some bad language

**PG-13** movies for which parental guidance may be recommended if under age 13

**R** restricted. The movies usually contain offensive sex or bad language and may be unsuitable for children under the age of 17. Parental guidance or permission needed.

**NC-17** even with parental permission, forbidden under age 17. More offensive sex, violence or bad language.

**X** movies which generally focus on sex, violence and/or bad language. Also known as pornography.

Channels lock	Please enter your PIN
TV ratings lock	
Movie ratings lock	
Region ratings lock	
Info	

### Movie ratings lock

This function allows you to control access to individual movies based on their MPAA ratings (Motion Picture Association of America).

- 1 Select **Movie ratings lock** with the cursor down.
- 2 Press the cursor right to enter the list.
- 3 Select a movie rating with the cursor up/down.
- 4 Press **OK** to activate/de-activate the selected rating.

Each rating item has a box-graphic in front of it to indicate whether or not programs carrying that rating are currently locked:

- box with a 'X': movies with this rating are locked;
- empty box: movies with this rating are unlocked.

When **All** has been selected, all items on the movie ratings list become selected. (All movies are locked.)

If, while **All** is selected, any other item is unselected, then **All** is automatically unselected.

When **NR** has been selected, no other item is selected.

When any other item has been selected, all ratings below are selected as well, thus all movies with those ratings will be locked.

### Region ratings lock

This function allows you to control access to digital programs based on downloaded Region Ratings.

- 1 Select **Region ratings lock** with the cursor down.
- 2 Press the cursor right to enter the list.
- 3 Select a Region rating with the cursor up/down, and enter, if present, the list with content-based ratings with the cursor right, and select one content-based rating.
- 4 Press **OK** to activate/de-activate the selected rating.
- 5 Select another content-based rating if you like and press **OK** again.

Each ratings item has a box-graphic in front of it to indicate whether or not programs carrying that rating are currently locked:

- box with a 'X': all items in the contents-based list are locked as well;
- empty box: the item is unselected;
- box with a '/': some content-based ratings are selected/unselected.

### Set/Change PIN

- 1 Select **Set** or **Change PIN** with the cursor down.
- 2 If no PIN-code exists yet, the menu item is set to **Set PIN**. Follow the instructions on screen.  
If a PIN-code has previously been entered, the menu item is set to **Change PIN**. Follow the instructions on screen.  
All number combinations from 0000 to 9999 are valid numbers.
- 3 The **Menu preferences menu** reappears with a message confirming that the PIN has been created.

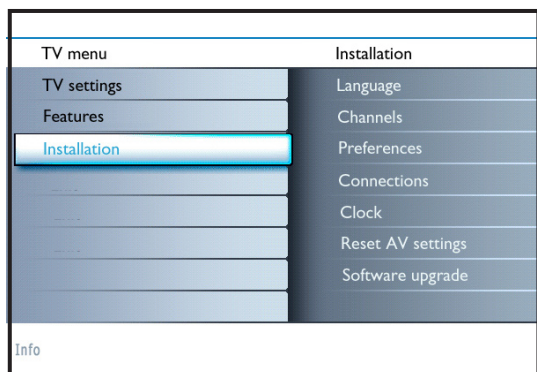

Note: - From now on, every week, your TV will automatically switch to the selected channel, on the selected day, at the selected time, until the On timer function is switched off again.  
- Only one On timer can be set.

### On timer

From standby, this automatically switches the TV to the specified channel number, at a specified time.

- ❶ Select **On timer**.
- ❷ Press the cursor right to enter the On timer menu.
- ❸ Select **Timer** and press the cursor right.
- ❹ Select **On**.
- ❺ Select **Channel** and then the TV channel you want your TV to switch to on a selected time and day.
- ❻ Select **Day** and then a day of the week or select **Daily**.
- ❼ Select **Time** and enter the time with the digit keys or with the cursor up/down.
- ❽ Press the **OK** key to activate.
- ❾ Press the cursor left to return to the Features menu or press the **MENU** key to switch off the menu.

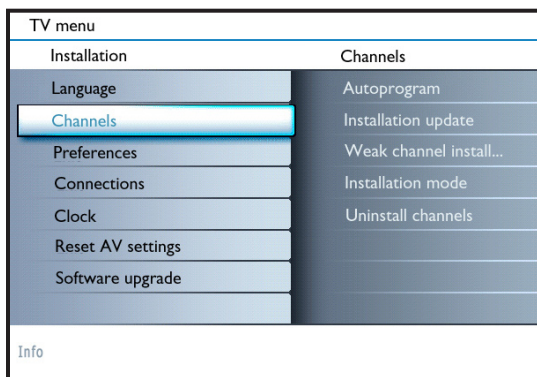

## Installation menu

### Select the menu language

- ❶ Press the **MENU** button on the remote control.
- ❷ Use the cursor down to select **Installation** in the TV menu.
- ❸ Use the cursor right to enter the Installation menu.
- ❹ Select **Language** and enter the list of available languages with the cursor right.
- ❺ Select your language with the cursor up/down and press the **OK** button to confirm your selection.
- ❻ Proceed with the Installation menu.

## Channel menu

### Store TV channels

- ❶ Select **Channels** in the Installation menu.
- ❷ Use the cursor right to enter the Channels menu.
- ❸ Select **Autoprogram** in the Channels menu.
- ❹ Use the cursor right to enter the Autoprogram menu.
- ❺ Press the **OK** button.
- ❻ Select **Cable** or **Antenna** in the Installation mode.

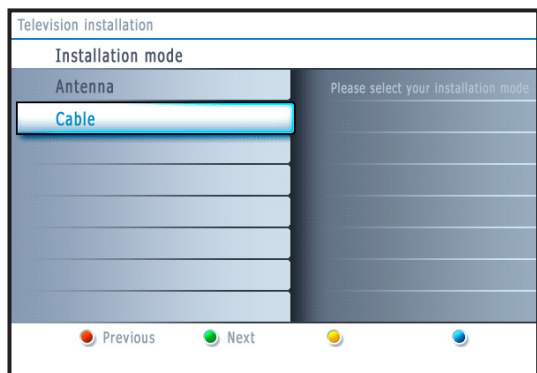

When **Antenna** is selected, the TV will detect antenna signals and will search for antenna TV (NTSC and ATSC) channels available in your local area.

When **Cable** is selected, the TV will detect cable company supplied signals and will search for cable TV (NTSC, ATSC, QAM modulated) channels available in your area.

Make sure that registration with your cable TV provider and connection of equipment are completed.

- ❼ Press the green button "**Next**" on the remote control.  
Note: All channels must be unlocked in order to autoprogram. If requested, enter your PIN code to unlock all channels. See Set/Change PIN, p. 17.
- ❽ Press the green button "**Start**" to start autoprogramming.  
The menu screen disappears and the progress of autoprogramming is displayed. The progress bar indicates the number of analog and digital TV channels found.

When Autoprogramming is complete, a message appears confirming the completion. Press the red button "Finish" and the TV returns to the Installation menu.

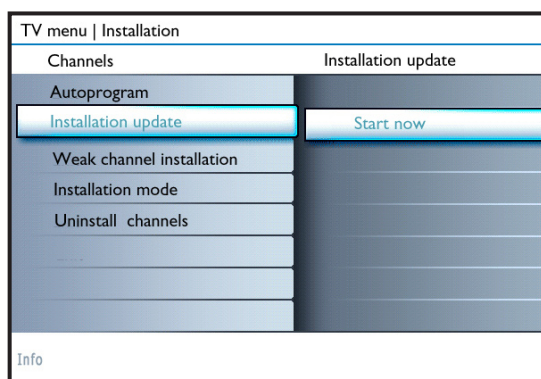

**Notes:**

- When you have locked TV channels while initiating autoprogram, a message appears asking to enter your PIN code in order to complete autoprogramming.
- When interrupted, the updated channel information is retained as well as the not yet updated old channel information.
- Background autoprogramming occurs only when the TV is turned on.
- Channel information of an ATSC channel is updated only for the ATSC channel currently tuned.
- If an NTSC channel is tuned, then in Background Autoprogramming the TV shall scan all the possible ATSC frequencies and update information.
- Weak channel installation : This allows you to manually tune weak ATSC channels in order to adjust the antenna and thus optimize signal quality for that channel. (See Installation menu, Weak channel installation, p. 19.)
- Once you have searched for the available Antenna as well as the Cable TV channels, they are stored in the memory.

**Note: Digital Channel selection delay**

Due to the tuning complexity of subchannel digital programming, the time to select and view a digital channel may take slightly longer than what the viewer is normally accustomed to (as compared to analog channel programs).

Digital channel broadcasts contain program and system data information that must be processed before the channel selection can be displayed.

**Channel tuning**

Available channels:

- Cable (analog NTSC or digital QAM): max. from 1 to 125
- Antenna (analog NTSC or digital ATSC): max. from 2 to 69

If a tuned channel is not yet in the master channel map, the TV will attempt to tune the channel and it will be added to the map.

If the channel is not acquired, a message will appear that the channel is not available.

When you tune an audio-only digital subchannel, a display appears with the message **Audio only**.

**Note: Subchannel selections**

- The new standards employed with digital broadcasting make it possible to receive multiple program channels under a single major channel number which can be selected by pressing the digit remote control direct-access channel number entry.
- The number of channels shown at installation includes paid channels but you may not be able to see all of them unless you sign up with cable TV operators.

**Important:**

After the installation of the TV channels has been done, always make a selection in the Installation menu between Antenna or Cable whether you want to watch Antenna TV channels or Cable TV channels.

If you make use of a signal splitter do not forget to put the switch in the corresponding position.

**Installation update** (only with Digital TV broadcasting)

This allows you to automatically tune to and update all available digital channels.

- Notes:
- this will not reinstall uninstalled channels;
  - digital channels that are not encountered any longer will be removed;
  - new channels found will not be added to any favorite list;
  - already installed channels will not be renumbered.

**Weak channel installation**

This enables you to do a weak ATSC digital channel installation. This is only available for TV channels installed via an antenna connection (see p. 4).

- 1 If a certain channel you expect to see is not tuned or is weak, you can install it manually. Call your local broadcasting station to know what channel it is being transmitted on.
- 2 Select that channel in the displayed list of TV channels (in the antenna mode).
- 3 The signal strength is displayed and updated continuously as you rotate the antenna.

**Installation mode**

This allows you to select the already stored terrestrial or cable TV channels. Choose for Antenna or Cable whether these signals are present.

**Uninstall channels**

This allows you to uninstall a stored channel so that it is no longer possible to tune to. This also allows you to reinstall an earlier uninstalled channel.

- 1 Select the channel you want to uninstall.
- 2 Press the green color button to uninstall the selected channel.  
The uninstalled channel is indicated in the list by an icon in front of the uninstalled channel.
- 3 Press the green color button again to reinstall the uninstalled channel.

Note : Uninstalled channels are not reinstalled during an installation update.

## Preferences menu

Note: Emergency Alert Signalling is not possible:

- when content browsing;
- with analogue video sources.

Notes:

- You always have the possibility to remove the message from the screen.
- The message display will overlap whatever menu element or other message is on the screen.

## Preferences

- 1 Press the **MENU** button.
- 2 Select **Installation** with the cursor down and press the cursor right to select the **Preferences** menu.

### Location

This allows you to select the location of your TV. If you choose for Shop it will result in fixed settings of picture and sound. The location Home will give full flexibility to change any predefined settings for picture and sound.

### OSD

- 1 Select **OSD**.
- 2 Press the cursor right to select **Normal** or **Minimum**.  
**Normal** to activate the continuous display of the channel number (for max. 10 minutes) and extended display of TV channel and program information on screen. E.g. information on the main or auxiliary program, input signal quality of connected accessory devices, the display format, sound mode, availability of Closed Caption service, the audio language, the rating, sleep timer setup.  
**Minimum** to activate the display of reduced channel information.

Note: When Closed Captions is switched on, continuous display of the channel number and clock is not possible. Volume indication bar will not be visible.

### Show emergency alerts (EAS)

This allows you to select the alert priority level of the information disseminated by the cable operator. The standard SCTE18 defines an Emergency Alert signalling method for use by cable TV systems to signal emergencies to digital devices such as digital set-top boxes, digital TVs and digital VCRs.

The Emergency alert signalling scheme defined in the standard allows a cable operator to disseminate emergency alert information related to state and local-level emergencies and warnings in a cost-effective and efficient way, while minimizing disruption of programming.

An Emergency alert message will have one of the following priorities: **Low**, **Medium**, **High** or **Maximum**.

The Emergency alert message with priority **High** or **Maximum** will always be presented. **Low** or **Medium** will be present or ignored depending on the selected setting.

**Important:** When the TV clock is undefined (See Clock, p. 21), the Emergency Alerts will be ignored.

The Emergency Alert message display will contain following information:

- The Emergency Alert text
- The start time + date
- The end time + date.

- 1 Select **Show Emergency Alerts** in the Menu preferences menu.
- 2 Press the cursor right and select one of the Emergency alerts options:
  - Always, when you always want the Emergency alert messages to be displayed when available;
  - Skip low priority, when you want the messages with low level to be ignored;
  - Skip low/medium priority, when you only want the messages with high priority to be displayed.

**Important: If you have forgotten your PIN!**

- 1 Select **Change PIN** in the Menu preferences menu and press the cursor right.
- 2 Press the cursor right to enter the overriding PIN code **0-7-1-1**.
- 3 Press the cursor again and enter a new personal 4-digit PIN code. The previous code is erased and the new PIN-code is stored.

TV menu	
Installation	Connections
Language	AV1
Channels	AV2
Preferences	HDMI 1
Connections	HDMI 2
Clock	SIDE
Reset AV settings	Audio In L/R
Software upgrade	
Info	

Note: - Adjusting the clock is necessary for the correct working of Lock after (See Child lock menu, p. 16) features.

- Closed captioning will not be displayed when the clock is being displayed. Press the clock key again to switch off the clock if you want to see closed caption.

TV menu	
Installation	Clock
Language	Auto clock mode
Channels	Time
Preferences	Day
Connections	Time zone
Clock	Daylight saving
Reset AV settings	
Software upgrade	
Info	

Most of the TV channels do not transmit clock information. There are a few cable channels who do but they are at the end of the channel ring. There is no clock transmission in antenna channels. In such cases, either clock extraction takes a long time, or there is no clock.

**Download rating table**

This allows you to add region ratings lock options next to your current ones.

- 1 Select **Download rating table** with the cursor down.
- 2 Press the cursor right to enter the list. You are asked to enter your code. (see page 17 ). If the code is correct, you can choose to on/off to download the rating table.
- 3 Select on/off to download the rating table.
- 4 Press **OK** to activate/de-activate the selection.

Note: - Before activating, please ensure regional ratings are broadcasted.

**Connections**

This menu allows you to name/label the accessory devices you have connected to the external inputs/outputs.

- 1 Select **Connections** in the Installation menu.
- 2 Press the cursor right to enter the list of types of devices connected to the selected input.
- 3 Select the accessory device with the cursor up/down.

When you select **AV1**, **AV2**, **HDMI 1**, **HDMI 2**, **Side** or **Audio in L/R**, a list appears allowing you to identify which type of accessory device is attached to this input.

Note : If the accessory device has DVI output only, use a DVI to HDMI adapter cable to connect to the HDMI connector. You need to also connect the audio cable to **L** and **R AUDIO** jacks. Next, go to **Menu => TV menu => Installation => Connections => Audio in L/R => AV1**.

**Clock**

This allows you to use your TV as a clock.

**Auto clock mode**

- 1 Select **Clock** in the TV menu.
- 2 Press the cursor right to select the **Auto clock mode**.
- 3 Press the cursor right to instruct the TV to get the time automatically or manually.

**Auto clock channel** (only available when Auto clock mode is set to Automatic)

With the cursor buttons, select the channel number where time can be found by the TV. Typically time can be found on PBS as well as some other channels.

Note: If Manual has been selected in the Auto clock mode, the Auto clock channel menu item can not be selected.

**Time - Day** (only available when Auto clock mode is set to Manual)

With the cursor buttons, select and enter the correct time and day.

If **Auto clock mode Manual** has been selected, and no clock search has been done, the system will keep the entered time and day.

**Time zone** (only available when Auto clock mode is set to Automatic)

This function allows you to select your local time zone. Broadcasted time information will correct the clock display for your local time.

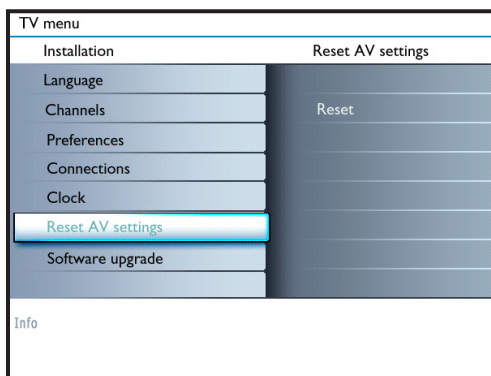

- 1 Select **Time zone** with the cursor down.
- 2 Press the cursor right to select your local time zone.

**Daylight saving** (only available when Auto clock mode is set to Automatic)

Daylight saving time is automatically set by specially broadcasted signals.

This menu item allows you to disable the automatic setting of daylight saving time. This is useful if you live in an area or state where daylight saving is not applied, but you receive channels from other areas where daylight saving signals are broadcasted.

- 1 Select **Daylight saving** with the cursor down.
- 2 Press the cursor right to select **Automatic** for automatic clock correction for daylight saving time, based on specially broadcasted signals.
- 3 Select **Off** to disable automatic clock correction based on the specially broadcasted signals.

### Reset AV settings

This function allows you to reset most of the picture and sound settings to their predefined factory states.

- ❶ Select **Reset AV settings** with the cursor down.
- ❷ Press the cursor right.
- ❸ Press the **OK** button to erase settings and reset them to their default values.

### Software upgrade

This menu allows you to upgrade your TV software using a USB device.

### USB upgrade

It is possible to initiate an upgrade procedure from a USB portable memory. The memory device must be filled with the appropriate upgrade image (and structure) which can be found on the [www.philips.com/usasupport](http://www.philips.com/usasupport) website. How to upload a new software version on your portable memory device, see Annex 1, p. 31.

## Connect Accessory Devices

### 1a Set Top Box to TV

#### Using HDMI

- ❶ Connect RF cable from wall to input at back of the cable box. Set output switch on set-top box to CH 3 or 4 and tune TV to same channel.  
*In some cases, cable box will automatically tune to channel 3 or 4. Just change channels until picture appears.*
- ❷ Connect cable box to TV using HDMI cable.  
*Note : If the accessory device has DVI output only, use a DVI to HDMI adapter cable to connect to the HDMI connector. You need to also connect the audio cable to **L** and **R AUDIO** jacks. Next, go to **Menu => TV menu => Installation => Connections => Audio in L/R => AV1.***

#### Using RF Cable

- ❶ Connect RF cable from wall to input at the back of the cable box.
- ❷ Use second RF to connect the cable box to the TV's antenna input.  
*This connection gives mono sound. For stereo sound use also composite audio/video connection (Refer to panel 3).*

### 1b Set-Top Box to TV

#### Using Component Video Input

- ❶ Connect Component Video cable to input at back of the cable box.
- ❷ Turn on TV and DVD Player/DVD recorder. Press CH+ or CH- on remote control to tune to the video supplied by AV2.

Insert a prerecorded DVD into DVD player/DVD recorder and press PLAY to verify correct connection.

## 2a Progressive Scan DVD Player or DVD Recorder to TV

### Using HDMI

- Connect DVD player/DVD recorder to the TV using HDMI cable.
- Turn on TV and DVD Player/DVD recorder. Press CH+ or CH- on remote control to tune to the video supplied by HDMI.

Insert a prerecorded DVD into DVD player/DVD recorder and press PLAY to verify correct connection.

## 2b Progressive Scan DVD Player/Recorder to TV

### Using Component Video Input (YPbPr)

- Insert Component Video connectors into their corresponding jacks on both DVD player/DVD recorder and TV (Y, Pb and Pr).
- Connect red/white audio cables into the audio output jacks on DVD player/DVD recorder and audio AV inputs on TV.
- Turn on TV and DVD Player/DVD recorder. Press AV on remote control until the connected source appears on TV screen.

Insert a pre-recorded DVD into DVD player/DVD recorder and press PLAY to verify correct connection.

## 3 DVD Player/DVD Recorder/VCR to TV

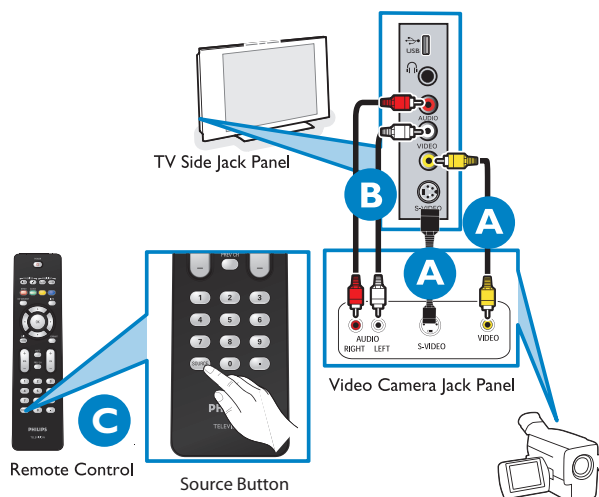

### Using composite audio-video

- Connect composite video cable to Video input on back of TV and Video output on the back of DVD/VCR player or recorder.
- Connect audio cables (red/white) to audio AV inputs on back of TV and Audio outputs on back of DVD/VCR player or recorder.
- Turn on TV and DVD/VCR player or recorder. Press **SOURCE** button on the remote control until AV1 or AV2 appears on TV screen.

Insert pre-recorded videotape/DVD into DVD/VCR player or recorder and press PLAY to verify correct connection.

Next, go to **Menu** => **TV menu** => **Installation** => **Connections** => **Audio in L/R** => **AV1**.

## 4 Video Camera/Games Console to TV

### Using Composite Audio/Video Input

- A** Connect the video cable (yellow) from the video output on camera (or other device) to the video input (yellow) located on the side of TV.  
OR  
Connect S-video cable to S-video input on side of TV and to the output.
- B** Connect audio cables (red/white) from audio outputs on device to audio inputs (red/white) on the side of the TV.
- C** *Tip: For mono devices, connect only white audio cable from device's audio output to white audio input on the side of TV.*  
Turn on the TV and the device. Press the **SOURCE** button on the remote control until **SIDE** appears on TV screen.  
Press **PLAY** on the device to verify connection.  
*Note: Interference will occur when S-video and Composite audio/video are connected.*

## Side connections - USB/Headphone

### Headphone

- 1 Insert the plug into the headphone socket as shown.
- 2 Press the **MUTE** button on the remote control to switch off the internal loudspeakers of the TV.  
*The headphone impedance must be between 8 and 4000 Ohm. The headphone socket has a 3.5 mm jack.*  
In the Sound menu select **Headphone volume** to adjust the headphone volume.

### Viewing content from a USB device

#### Inserting a USB device

*Note: USB devices are not supplied with this TV.*

Insert a USB device in the **USB** connector at the side of the TV.  
When a USB device is inserted, the Multimedia browser menu is displayed automatically, see further.

#### Removing the USB device

- 1 First switch off the menu. To do so, navigate to the Multimedia browser menu and press the **MENU** button to exit the menu.
- 2 Remove the USB device.

## Digital Surround receiver

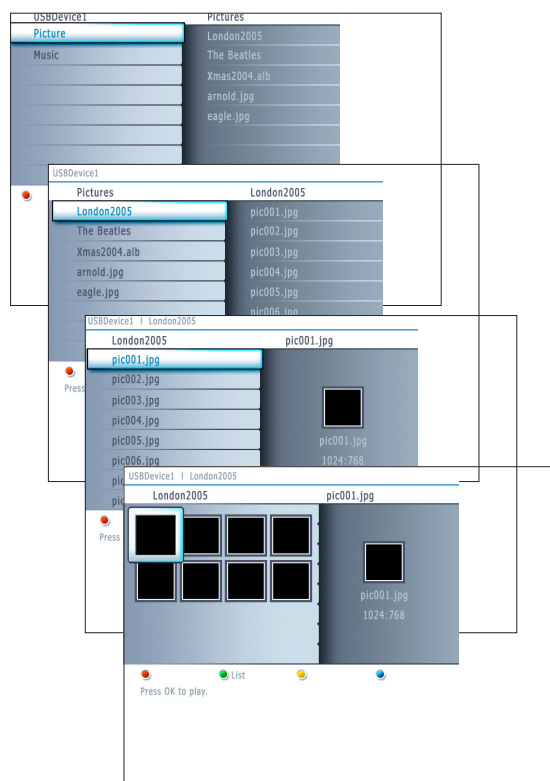

Connect a Digital MultiChannel Surround receiver to the AUDIO OUT (**DIGITAL**) connector at the bottom of the TV.

The TV can output Digital audio via the AUDIO OUT (**DIGITAL**) connector to an external amplifier or receiver.

If your amplifier or receiver has a matching connector for Digital Audio In, you can connect it with a single cable to the TV's AUDIO OUT (**DIGITAL**).

See Connect Accessory Devices, p. 22.

## Multimedia browser

### Notes:

- **Your TV supports slide shows with background music.** See Annex 2, p. 33.
- The playback will continue to play even if temporarily switched to browser screens. The audio will be stopped when another song starts playing, or when the end has been reached.
- Progressive JPEG files are not supported.
- The length of the files should not exceed 128 characters.
- Do not use a dot "." in folder naming.
- More technical remarks can be found in Annex 3, p. 35.

### Following icons may appear:

- folder
- pictures
- music
- self made playlist/album

Multimedia browser lets you display pictures or play audio stored on a USB device.

The Multimedia browser application is invoked from the main menu (press the **MENU** button) by selecting the USB device and pressing the cursor right.

### Notes:

- Following file formats can be reproduced:
  - For pictures: JPEG
  - For audio: MP3, MP3 Pro
- Only FAT/DOS-formatted memory devices are supported.
- If your digital camera is not supported, make sure your camera is switched on and verify if its configuration settings are correct (see the manual of your camera).
- Philips cannot be responsible if your USB device is not supported.

## Multimedia Browser menu

- 1 Insert a USB device.
- 2 Select the USB device under Multimedia with the cursor up/down. The Multimedia browser will allow the user to browse content stored on the inserted USB device. Press the cursor right.
- 3 The 2-panel browser will be shown with the left panel containing the content types (Music, Picture). The right panel will display the content that is available of the selected content type.
- 4 Press the cursor up/down to select a content type and press the cursor right to enter the content.
- 5 Press the cursor up/down to select a file or a directory.
 

*Note: Press the green color button to display all the image files in the current directory as thumbnails when browsing pictures. Press the green button again to display the image files in a list.*
- 6 In case a **file** is selected, press the **OK** button to display a picture file or to play an audio file.
 

In case a directory, album or playlist is selected, press the cursor right to enter the content or press the **OK** button to start a slide show or a playback of the files present in the directory, album or playlist.
- 7 Press the cursor left to keep music playing and switch back to the Multimedia menu.
- 8 Press one of the color buttons on the remote control to perform the corresponding function mentioned at the bottom of the screen. The blue color button can be used to let the color re-appear.
- 9 To stop playing content, press the **MENU** button on the remote control.

*Note :* - It may work with certain memory devices but not with most camera devices.  
 - USB devices are not supplied with this for TV. Use a USB device which is less than 25mm wide for best connection.

### Function buttons at the bottom of the screen

<b>Details</b>	to display a description of the selected file or directory;
<b>Transitions</b>	to select if a transition during a slide show should be applied;
<b>Slide time</b>	to select the duration a picture will be displayed in a slide show;
<b>Rotate</b>	to rotate a picture;
<b>Repeat one/all</b>	to repeat the playback of a music file;
<b>Shuffle</b>	to shuffle music collections in a random way;

## Record with your recorder

### Record a TV program

You can record a TV program using your recorders tuner without affecting your TV.

- 1 Select the channel number on your recorder.
- 2 Set your recorder to record.  
See the handbook for your recorder.

*Switching channel numbers on your TV does not disturb recording !*

## To select connected devices

- 1 Press the **SOURCE** button repeatedly or select **Connections** in the Settings menu (see p. 21) to select **AV1, AV2, HDMI 1, HDMI 2, Side or TV**, according to where you connected your devices.
- 2 Press the cursor up/down.
- 3 Press **OK**.

### Regulatory Notices - Federal Communications Commission Notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio or television technician for help.

#### Modifications -

The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by Philips Consumer Electronics may void the user's authority to operate the equipment.

#### Cables -

Connections to this device must be made with shielded cables with metallic RFI/EMI connector hoods to maintain compliance with FCC Rules and Regulations.

#### Canadian notice -

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

#### Avis Canadien -

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

### Kensington Security Slot (if present)

Your TV is equipped with a Kensington Security Slot, to prevent it from getting stolen.

An anti-theft Kensington lock has to be purchased separately.

The Kensington lock is a plastic-coated steel cable with a lock. One end has to be fixed to the opening of the TV and locked with a special key. The other end is attached to a fixed point.

® Kensington and MicroSaver are registered US trademarks of ACCO World Corporation with issued registrations and pending applications in other countries throughout the world. All other registered and unregistered trademarks are the property of their respective owners.

## Troubleshooting Tips

Symptoms	Possible Causes	What you should do
<b>No display on screen</b>	<ul style="list-style-type: none"> <li>Faulty power supply</li> <li>TV's Power not turned on</li> <li>TV go to standby after 10min without video.</li> <li>Faulty aerial and cable</li> <li>Wrong source selected.</li> </ul>	<ul style="list-style-type: none"> <li>Check whether power cord is properly connected into the mains socket. If there is still no power, disconnect plug. Wait for 60 seconds and re-insert plug. Turn on TV again.</li> <li>Press the POWER key on the TV and wait for 10-15sec.</li> <li>Press the POWER key on the remote control.</li> <li>Check whether euroconnector cables or aerial sockets are properly connected.</li> <li>Check whether the source is correctly selected. Press <b>Source</b> button to enter Source list and select the correct source.</li> </ul>
<b>Poor reception (snowish picture and noise)</b>	<ul style="list-style-type: none"> <li>Faulty antenna connection</li> <li>Weak transmission</li> </ul>	<ul style="list-style-type: none"> <li>Faulty antenna connection</li> </ul>
<b>Reddish picture in AV1/2</b>	<ul style="list-style-type: none"> <li>Wrong setting of DVD player</li> </ul>	<ul style="list-style-type: none"> <li>Set the DVD player to the correct output video format.</li> </ul>
<b>No sound</b>	<ul style="list-style-type: none"> <li>Zero volume level</li> <li>Sound muted</li> <li>Wrong audio selection</li> </ul>	<ul style="list-style-type: none"> <li>Try increasing volume. (You will not see the volume indication if OSD set to minimum)</li> <li>Check that the sound is not muted.</li> <li>Aim remote control directly at sensor on front of TV.</li> <li>Press <b>MENU</b> =&gt; <b>TV menu</b> =&gt; <b>Installation</b> =&gt; <b>Connections</b> =&gt; <b>Audio in L/R</b> =&gt; select <b>AV1</b></li> </ul>

**If your problem is not solved**

Turn your TV off and then on again once.

**Never attempt to repair a defective TV yourself.**

Check with your dealer or call a TV technician.

**Telephone number Philips Customer**

**Care Center: 1-888-PHILIPS (744-5477)**

Please, have the Model and Product number which you can find at the back of your television set ready, before calling.

## Tips

**Care of the screen**

Do not touch, push or rub or strike the screen with anything hard as this may scratch, mar or damage the screen permanently. Do not rub the screen with chemically treated cloths.

Do not touch the surface with bare hands or greasy cloth (some cosmetics are detrimental to the screen). Unplug the TV before cleaning the screen.

When the surface becomes dusty, please wipe gently with absorbent cotton or other soft materials like chamois soaks.

Do not use acetone, toluene and alcohol because they cause chemical damage. Do not use liquid cleaners or aerosol cleaners. Wipe off saliva or water drops as soon as possible. Their long time contact with the screen causes deformations and color fading.

**How to dispose of batteries?**

The batteries supplied do not contain the heavy metals mercury and cadmium. Nevertheless in many areas batteries may not be disposed of with your household waste. Please ensure you dispose of batteries according to local regulations.

Examples of stationary images (this is not an all-inclusive list, you may encounter others in your viewing):

- **TV and DVD menus:** listings of DVD disk content;
  - **Black bars:** when black bars appear at the left and right side of the screen, it is recommended to change to a picture format so that the picture fills the entire screen;
  - **TV channel logo:** present a problem if they are bright and stationary. Moving or low-contrast graphics are less likely to cause uneven aging of the screen;
  - **Stock market stickers:** presented at the bottom of the TV screen;
  - **Shopping channel logos and pricing displays:** bright and shown constantly or repeatedly in the same location on the TV screen.
- Examples of still pictures also include logos, computer images, time display, teletext and images displayed in 4:3 mode, static images or characters, etc.

Notes:

- reduce contrast and brightness when viewing
- once burn-in occurs it will never disappear completely.

## Glossary

<b>DVI</b> (Digital Visual Interface)	:	A digital interface standard created by the Digital Display Working Group (DDWG) to convert analog signals into digital signals to accommodate both analog and digital monitors.
<b>VGA</b> (Video Graphics Array)	:	a common standard graphics display system for PCs.
<b>RGB signals</b>	:	These are the three video signals, Red Green Blue, which make up the picture. Using these signals improves picture quality.
<b>S-VHS signals</b>	:	These are 2 separate Y/C video signals from the S-VHS and Hi-8 recording standards. The luminance signals Y (black and white) and chrominance signals C (colour) are recorded separately on the tape. This provides better picture quality than with standard video (VHS and 8 mm) where the Y/C signals are combined to provide only one video signal.
<b>NICAM sound</b>	:	Process by which digital sound can be transmitted.
<b>16:9</b>	:	Refers to the ratio between the length and height of the screen. Wide screen televisions have a ratio of 16/9, conventional screen TV sets have a ratio of 4/3.
<b>HDMI</b> (High-Definition Multi-media Interface)	:	Provides an uncompressed, all digital audio/video interface between the TV and any HDMI-equipped audio/video component, such as set-top box, DVD player and A/V receiver. HDMI supports enhanced or high-definition video plus two-channel digital audio.
<b>System</b>	:	Television pictures are not broadcast in the same way in all countries. There are different standards: BG, DK, I, and LL'. The System setting (p. 5) is used to select these different standards. This is not to be confused with PAL or SECAM colour coding. PAL is used in most countries in Europe, Secam in France, Russia and most African countries. The United States and Japan use a different system called NTSC. The inputs EXT1 and EXT2 are used to read NTSC coded recordings.
<b>HDCP</b> (High-bandwidth Digital-Content Protection)	:	A specification developed by Intel for protecting digital entertainment that uses the DVI interface. HDCP encrypts content the transmission of digital content between the video source or transmitter such as a computer, DVD player or set-top box and the digital display or receiver such as a monitor, television or projector.
<b>YPbPr</b>	:	The analog component video signal.

## Specifications

	32PFL7332D	37PFL7332D	42PFL7332D

### Introduction

Philips offers software upgrade capability for your TV using USB portable memory. After you have completed a software upgrade, your TV will typically perform better.

What improvements are made depends on the upgrade software you are using as well as the software your TV contained before the upgrade.

You can execute the software upgrade procedure yourself.

Be aware that the content of this document is addressing technical or software skilled users.

### Preparing a portable memory for software upgrade

For the procedure you will require:

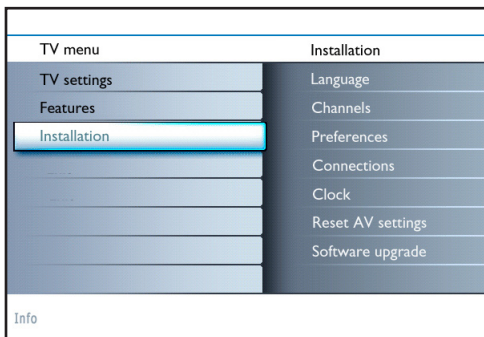

- A personal computer with web browsing capability.
- An archive utility that supports the ZIP-format (e.g. WinZip for Windows or StuffIt for Mac OS).
- A preferably empty USB memory stick.

*Note: Only FAT/DOS-formatted portable memory is supported.*

New software can be obtained from your dealer or can be downloaded from the [www.philips.com/usasupport](http://www.philips.com/usasupport) website:

- 1 Go to **www.philips.com/usasupport** using the web browser on your PC.
- 2 Follow the procedure to find the information and the software related to your TV.
- 3 Select the latest software upgrade file and download it to your PC.
- 4 Decompress the ZIP-file and copy the file "autorun.upg" to the root directory of the USB portable memory.

*Note: Only use software upgrades that can be found on the [www.philips.com/usasupport](http://www.philips.com/usasupport) web site.*

### Verifying the version of the TV software

Before starting the software upgrade procedure, it is advised to check what the current TV software is.

- 1 Select **Software Upgrade** in the Installation menu.
- 2 Press the cursor right.  
The Software Upgrade menu moves to the left panel.
- 3 Select **Current Software Info** to observe the version and the description of the current software.

## Automatic software upgrade procedure

For an automatic software upgrade copy the “autorun.upg” file in the root directory of the USB portable memory.

- ❶ Power off your TV and remove all memory devices.
- ❷ Insert the USB portable memory that contains the downloaded software upgrade.
- ❸ Switch on your TV with the power switch  at the right side of the TV.
- ❹ At startup the TV will scan the USB portable memory until it finds the update content. The TV will automatically go to the upgrade mode. After a few seconds it will display the status of the upgrade procedure.

### Warning:

- You are not allowed to remove the USB portable memory during the software upgrade procedure!
- In case of a power drop during the upgrade procedure, don't remove the USB portable memory from the TV. The TV will continue the upgrade as soon as the power comes back.
- If you try to upgrade to a software version lower than the current version, a confirmation will be asked. Downgrading to older software should only be done in case of real necessity.
- If an error occurs during the upgrade you should retry the procedure or contact your dealer.

- ❺ When the software upgrade was successful, remove the USB portable memory and restart your TV with the power switch  at the right side of the TV.

Your TV will start up with the new software.

Note: Once the upgrade is finished use your PC to remove the TV software from your USB portable memory.

## Manual software upgrade procedure

For a manual software upgrade copy the “autorun.upg” file in a directory called “Upgrades” located in the root of the USB portable memory.

- ❶ Insert the portable memory that contains the downloaded software upgrade.
- ❷ The TV will automatically start the content browser menu. Exit the menu by pressing the **MENU** key.
- ❸ Select **Software Upgrade** in the Installation menu. Go to **Local upgrades**. The TV will list all compatible images available on the USB portable memory and display the data for each selected upgrade image.
- ❹ Select the correct upgrade image and press the red color button to start the upgrade.  
Your TV will restart and will automatically go to the upgrade mode. After a few seconds it will display the status of the upgrade procedure.

### Warning:

If you try to upgrade to a software version equal or lower than the current version, a confirmation will be asked. Downgrading to older software should only be done in case of real necessity.

- ❺ When the software upgrade was successful, remove the USB portable memory and restart your TV with the power switch  at the right side of the TV.  
Your TV will start up with the new software.

## Annex 2 - Philips TV Slideshow Format with background music

### Notes:

- The latest version of this document can be found on the Philips support website ([www.philips.com/usasupport](http://www.philips.com/usasupport)). Use the type number of your TV (e.g. 32PFL7332D/37) to find this documentation and other related files.
- Philips can't be held responsible for any problems that may occur as a result of the content in this document. Errors reported to Philips will be adapted and published on the Philips support website as soon as possible.

### Introduction

This document explains how to make a Philips slideshow file with background audio.

Be aware that the content of this document is addressing technical or software skilled users.

To start the slideshow open the slideshow file in the Home network Browser of your TV.

- 1 Press the **MENU** button on the remote control after having inserted a USB device and switched on the TV.
- 2 Go to where you stored the slideshow file (.alb) on your portable memory.
- 3 Select the slideshow file and press the **OK** button to start the slide show.
- 4 To stop a slide show, press the **■** button.

### General Rules

- The slideshow will use plain ASCII XML syntax to allow the creation and editing of the slideshow files using simple tools.
- All references to network content must be based on the global address of the content.
- Content on a Portable Memory (PM) doesn't have a global address; as a result content from a PM can never be referenced from a slideshow not stored on the PM itself.
- To maintain portability, a slideshow stored on a PM should ONLY reference content on the same PM. Referencing global addresses can result in inconsistencies if the PM is used on a non-networked CE device. The latter is however not forbidden, it is only a recommendation.
- It is preferable that URL's referencing PM content are based on a relative path starting from the directory where the slideshow is stored. This path includes the device or drive name of the PM.  
An absolute path to content will also be supported.
  - relative path: pictures\test1.jpg, tamper.jpg, ..\new\bird.jpg, ...
  - absolute path: USB1:\pictures1\foo\_bar.jpg, C:\f1.jpg, \organization.jpg, ...

### General Format

The format and syntax below should be used to create the slideshow file (simple ascii text) with the extension .alb (.ALB)

Examples: slshow1.alb, summer\_holiday\_2004.ALB, test.alb, ...

The following syntax should be used to create the text file:

```
<?xml version="1.0" encoding="ISO-885h9-1" ?>
<philips-slideshow version="1.0" >
  <title>Title of the slideshow</title>
  <audio>audio_url</audio>
  <slide-duration>30</slide-duration>
  <slides>
    <slide>slide_1_url</slide>
    <slide>slide_2_url</slide>
    <slide>slide_3_url</slide>
    <slide>slide_4_url</slide>
    <slide>slide_5_url</slide>
    <slide>slide_6_url</slide>
    ...
    <slide>slide_N-1_url</slide>
    <slide>slide_N_url</slide>
  </slides>
</philips-slideshow>
```

## Supported XML-tags

The following table gives a description of the XML syntax.

Tag Name	Use	Description
<i>philips-slideshow</i>	mandatory	Philips slideshow signature including the version.
<i>title</i>	optional	The title of the playlist.
<i>audio</i>	optional	The audio-URL following this tag will define the music playing in the background during the slideshow. A single song or playlist (.m3u & .pls) are the only valid audio references. Other reference will not result in any audio playback. If a single song is referenced the song will be repeated forever. If a playlist is referenced the playlist will be played in sequence with a repeat at the end of the playlist.
<i>slide-duration</i>	optional	The default display time (in 0,1 second) of a slide. The TV application isn't obliged to support this tag. The TV application can force the use of one or multiple predefined display times.
<i>slides</i>	mandatory	Identifies the slides to show.
<i>slide</i>	optional	Identifies the URL of the individual slide.

### Examples:

See on this CD in the directory Files/Slideshow/....

Copy the directory with the slideshow files to your portable memory.

```
<?xml version="1.0" encoding="ISO-885h9-1" ?>
<philips-slideshow version="1.0" >
  <title>Philips AlbumFile</title>
  <audio>Music\Nature.mp3</audio>
  <slide-duration>50</slide-duration>
  <slides>
    <slide>Images\Image01.jpg</slide>
    <slide>Images\Image02.jpg</slide>
    <slide>Images\Image03.jpg</slide>
    <slide>Images\Image04.jpg</slide>
    <slide>Images\Image05.jpg</slide>
    <slide>Images\Image06.jpg</slide>
    <slide>Images\Image07.jpg</slide>
    <slide>Images\Image08.jpg</slide>
    <slide>Images\Image09.jpg</slide>
    <slide>Images\Image10.jpg</slide>
    <slide>Images\Image11.jpg</slide>
    <slide>Images\Image12.jpg</slide>
  </slides>
</philips-slideshow>
```

### Notes:

- The latest version of this document can be found on the Philips support website ([www.philips.com/usasupport](http://www.philips.com/usasupport)).
- The software of your TV is upgradeable. If you have problems first check if you have the latest software installed on your TV. The latest software, together with instructions, can be found on the Philips support website.  
Use the type number of your TV (e.g. 32PFL7332D/37) to find this documentation and other related files.
- Philips can't be held responsible neither for any errors in the content of this document nor for any problems as a result of the content in this document. Errors reported to Philips will be adapted and published on the Philips support website as soon as possible.

### Digital Content Issues

- Only FAT (DOS) formatted (initialized) portable memory is supported. Errors in this formatting can result in unreadable content. If such problems appear try to re-format the card. Be aware that formatting the card will also delete all the content on it (pictures, music, ...).
- The following file types are supported: .jpg, .jpeg, .mp3, .alb, .m3u and .pls.
- Only linear JPEG picture formats are supported. Progressive JPEG and JPEG2000 encodings are not supported.
- The length of a filename or directory name is limited to the length specified by the FAT12/16/32 file systems.
- Max. levels of nested directories is 19.
- Never use the supported file type extensions (.jpg, .jpeg, .mp3, .alb, .m3u and .pls) as extensions for directories as these directories will be treated as corrupted files.
- The MP3 decoder does not support MPEG1 Layer 1 or Layer 2 playback.
- MP3 Pro files can be played with normal MP3 quality.
- The access and response time of the content on a device can differ depending on the type or brand of the device.
- The access and response time of the content on a device will decrease the more unsupported or corrupted files are on the device.

### Digital Camera Issues

If a USB connection between your digital camera and the TV isn't working, you can try the solutions below to resolve your problem.

- Make sure your digital camera is switched on and verify if the configuration of your digital camera is correct (see the manual of your digital camera for more information).
- Some digital cameras allow you to switch off the USB interface. Make sure that the USB interface is switched on before connecting to the TV.
- If you have a digital camera with only internal memory (no removable memory) you can try to copy the content manually to a USB memory device (e.g. Philips KEY product) using a personal computer.
- Some digital cameras allow you to switch between PTP (Picture Transfer Protocol) or "PC Link" and USB Mass Storage or "PC Drive". Make sure that you select USB Mass Storage or "PC Drive" on your digital camera.
- If your camera supports different interface settings be sure to try them one by one or contact the reseller of your camera to find out the correct setting.

### USB Memory Device Issues

- Devices connected to the USB port of your TV must be "Mass Storage Class" compliant. If your device (digital camera, MP3 player, portable harddisk, ...) is not "Mass Storage Class" compliant it will not be detected by the content browser of the TV.
- The following subsets of the Mass Storage Class specification are supported:
  - The implementation of the TV is based on the "Universal Serial Bus Mass Storage Class Specification Overview" (v1.2, June 23, 2003) including all documents referenced by the document. The document can be found on the USB standardisation website ([www.usb.org](http://www.usb.org)).
  - Full support of the USB Mass Storage Class Bulk-Only Transport (bInterfaceProtocol = 50h).
  - Full support of SubClass Code = 05h; SFF-8070i spec.
  - Full support of SubClass Code = 06h; SCSI transparent command set.
- For large USB memory devices, when you are in the Content Browser, it may take a long time before you can access your files.
- When using a USB portable harddisk: Due to the high power consumption of the harddisk, it is advised to use the external power supply of the portable harddisk to guarantee proper working under all conditions.
