## Only one step to lock or unlock

Full auto, full smart life

Everything starts here: The convenience brought by one-touch unlock and auto lock; Solid security ensured by dual verification and Bluetooth unlock; Sense of sci&tech presented by ergonomic design and streamlined body.

### Easy life doesn't stop there

- Patented full auto mortise: Unlock and open at one go
- Auto locking: Enjoy the reassurance after you close the door
- Intuitive fingerprinting: Unlock swiftly at one go
- Multiple alarming: Protect home security at all times

### Multiple protection in one for overall home safety

- Dual verification unlocking: Security is never forgotten
- C grade lock cylinder: Better reliability and security
- Fake PIN code: Protect your password security in real time
- Outside forced lock: Instant alarm upon inside unlocking
- Safe handle: Eliminates safety risks and keep you reassured

# Highlights

## Auto locking function

The push-pull smart door lock employs full automatic mortise. Without the need for any extra action, the deadbolt will spontaneously pop out after you close the door. If the door is not locked properly, the mortise will give an alarm to remind you of the door lock status.

## Dual verification unlocking

In dual verification mode, you can use a combination of any two factors (fingerprint, password and card) as the unlocking solution to ensure doubled security for your home.

## Fake PIN code

Philips EasyKey comes with the feature of Fake PIN Code technology which allows you to enter random number combinations to successfully get identified as long as there is

consecutive input of the real password. This feature can effectively prevent peeping and safeguard your real password.

## Intuitive fingerprinting

The fingerprint sensor is integrated in the push-pull handle so that when you hold the handle, your finger will naturally fall on the sensor. You can simply reach out and intuitively touch the sensor, then push to open after a successful fingerprint verification. The one-step unlocking feature will definitely bring you a fast and convenient door opening experience.

## Multiple alarming function

Philips 9200 series is featured with all-around alarm functions which not only improves the anti-theft level of your home and safeguard you and your family in real time, but also reminds you of the door lock status to create convenience for use.

## One-key outside forced lock

Before leaving home, you can touch the outside forced lock key to enable the function so that opening the door from inside the room

will trigger an alarm. This feature can effectively warn you of security risks and upgrade the level of home security.

## Patented full auto mortise

The upgraded full automatic mortise makes it possible for instant unlocking right after a successful verification. Once you are recognized, you can directly push or pull the handle to open the door, which greatly simplifies the use of your door lock and brings you a fast and convenient in and out experience.

## Safe handle switch

You can enable the safe handle function before you leave home. After the door is locked, the indoor handle will be fixed to ensure that nobody could open the door by pushing the indoor handle. This feature can effectively prevent unlocking from indoor, thus eliminating security risks and improves anti-theft performance.

# Specifications

## Access Solution

Bluetooth  
Card/Key Tag  
Fingerprint  
Mechanical Key  
Password/PIN Code

## Smart Lock Functions

**Alarm Function:** Anti-prying alarm, Outside forced lock alarm  
**Locking Function:** Electronic deadlock, System locking  
**Mortise:** Full auto mortise  
**Safety Function:** Dual verification, Fake PIN code, Outside forced lock function, Safe handle function

## Easy Operation

**Indicator:** Door locks status prompt, Low battery prompt, Mute status prompt, Outside forced lock prompt, System locking prompt  
**Voice Guide:** Human voice guide

## Design & Appearance

**Color:** Red copper  
**Emergency Escape Design:** Indoor fast opening mortise

**Ergonomic Design:** Push-pull handle design  
**Handle:** Push-pull handle  
**Main Material:** Zinc alloy  
**Surface Processing:** Electroplating  
**Fingerprint Sensor:** Semiconductor

## Lock Capacity

**Card/Key Tag:** Up to 100  
**Master PIN Code:** 1  
**One-time PIN Code:** 1

## Mode

**Operating Mode:** Auto mode, Manual mode  
**System Setup Mode:** Dual verification mode, Normal mode

## Power Specification

**Battery Type:** Alkaline Batteries  
**Emergency Power Supply:** 5V power bank  
**Maximum Batteries Capacity:** 8 batteries  
**Power Supply:** 4 AA batteries  
**Time of Use:** 10 months\*  
**Working Voltage:** 4.5-6V

## Installation

**Door Opening Direction:** Left inward opening, Left outward opening, Right inward opening, Right outward opening  
**Door Thickness:** 38-60 mm, 60-90 mm, 90-120 mm, Other range\*  
**Door Type:** Antitheft door, Copper door, Wooden door  
**Multi-lock Point:** No

## Accessory Parts

**Accessory Battery:** 4 AA alkaline batteries  
**Certificate**  
**Drilling Template**  
**Installation Accessories**  
**Mechanical Key:** 2 keys  
**Mortise**  
**Mounting Plate**  
**Cleaning Pad**  
**Smart Key Tag:** 2 cards  
**User Manual**  
**Warranty Card**
