With effortless setup to save your time

Featuring a sleek and compact design, Philips DDL502-13HBS allows for fast and simple setup with no mortise required. Perfect for home, studios, offices, or stores. Ditch the keys and enjoy easy access to your space with this product.

### Smart life "locked" with excellence

- Instant unlock with one touch
- Manage your locks with our all-in-one solution

### Secure protection, smart embedded

- Automatic locking upon door closed
- Safeguarding your home

### Easy life goes beyond this

- Say goodbye to the key-only era
- Effortlessly meet your diverse needs

# Highlights

## Semiconductor fingerprint

Unlock the door with a single touch of your fingertip using the semiconductor fingerprint sensor of the DDL502-13HBS. With a recognition speed no more than 0.5 seconds\*, enjoy a fast and convenient door-opening experience.

## App\* control

By connecting the DDL502-13HBS lock to the Philips EasyKey Plus App, you can access information such as battery level and activity history, and even unlock the door with a single touch on your phone from up to 10 meters\* away.

## Hall sensor

Our lock comes with Hall sensor technology to automatically lock the door as soon as it's closed in auto mode. The deadbolt pops up instantly, providing you with peace of mind as you leave.

## Multiple alerts

Our DDL502-13HBS smart lock comes with multiple alerts including anti-disassembly, system lockout, abnormal deadbolt, and privacy mode alerts. It not only provides constant protection for your home, but also keeps you updated on the condition of the door lock in real time for your convenience.

## 3 unlocking methods

Our DDL502-13HBS smart lock supports three unlocking methods: fingerprint, PIN code, and mobile app. This allows you to effortlessly and securely unlock your door in any situation, meeting your various unlocking needs. With our smart and convenient unlocking experience, you'll enjoy the ultimate peace of mind.

## Switch between 5 languages

Philips DDL502-13HBS smart lock features real human voice navigation\*, supporting five languages including Chinese, English, Spanish, Portuguese, and Indonesian. With simple operation and easy language switching, it can meet the diverse needs of users.

## Easy Operation

Voice Guide: Human voice guide

\* 0.5S data source: Internal test report.

\* App: refers to the "Philips EasyKey Plus" app. (Note: The lock information can only be uploaded to the app when the lock is connected to the app.)

\* 10 meters: the distance is based on internal laboratory testing and may vary slightly depending on usage environment and network signal. For more accurate results, please be subject to the actual usage.

\* Real human voice navigation: defaulting to English and can be easily switchable to other languages through the lock's settings.

\* These are experimental data, and the battery-lasting time is subject to actual using scenarios.

\* The effect of the digital keypad showed in the photos of this product may be inconsistent with the actual display effect. Please be subject to the digital keypad displaying status under the actual usage scenarios.
