- 5-inch HD touch screen: Easy operation for the whole family

Smarter chip knows more about you

- ARM quad-core processor: Assure stable system
- AI human motion detection:

Smart life never stops here

- Intensive metal body: With anti-prying alarm
- Local & Cloud storage: Allow viewing records via app anytime
- The magnetic stand: Enable easy disassembly and charging
- Big Lithium battery: Up to 90-day standby
- Link with the smart door lock: For much secure assurance

PHILIPS

Smart door viewer

Big wide-angle HD night vision PIR human body detection, Remote intelligent monitoring, Mutual link with smart lock

Highlights

The 170° lens & HD display

Features with a monitoring-level 170 ° lens, the smart door viewer can absorb a high volume of light, together with four bright infrared supplement lights and a professional infrared lampshade, it offers better night vision, even under insufficient lighting environments.

Two-way audio call

When you ring the doorbell or press the [call] button on the screen, you can start the real-time audio call with the built-in microphone and speaker. It can offer you a perfect calling experience.

5-inch HD touch screen

The 5-inch IPS multi-touch HD screen adopts 2.5D full lamination curved glasses, which make everything look terrific. The interactive design is easy for children and the elderly to operate.

ARM quad-core processor

Adopt the quad-core ARM processor, the product shows strong performance with lower power consumption, which runs multi-task easier and makes the alert control system of the door to be more swift and stable.

AI human motion detection

Adopted a PIR infrared sensor, when someone appears within three meters outside the door, the smart door viewer will identify through the AI human body detection algorithm and instantly captures a photo or video. Meanwhile, it pushes notifications to the mobile app via the Cloud encryption server to monitor the situation at the door.

Intensive metal body

Adopted with the intensive metal body design and built-in anti-prying sensor, when the smart door viewer recognizes abnormal dynamics and offline from the Internet, the product will trigger an alarm to warn the strangers and

DDA131FBW/97

remind your family, then the mobile app will receive push notifications in the real-time.

Local and Cloud storage

The 4G local storage could satisfy your daily requirement, it could save the records even offline from the Internet. Any encrypted photo or video uploads to the Cloud server can be saved for 3 days, and you could view the records via the Philips app at any time.

The magnetic stand

To simply use the four built-in magnets to install the product and remove the display to disassemble the product. With the reinforced cable, the product could be much durable.

Big Lithium battery

With standby time up to 90 days, the built-in high-density polymer lithium battery has power-saving functionality. When the remaining battery level is 10%, the indicator in the upper left corner of the host's screen turns red and there will be a low battery level alert.
