Optimise your brushing

- Optimise your brushing with SmarTimer and QuadPacer

Protects your gums

- Pressure Sensor helps protect your teeth and gums

Highlights

Helps whiten teeth every time you brush

Sonicare electric toothbrush with advanced sonic technology gently removes stains for naturally whiter teeth every time you brush.

Protects your gums

Built-in pressure sensor automatically detects the pressure you apply, warns you and reduces the toothbrush vibrations automatically to help protect your gums. The toothbrush will make a pulsing sound as a reminder to ease off the pressure. 7 out of 10 people found this feature helped them become better brushers.

Advanced Sonicare Technology

Powerful bristle vibrations drive microbubbles deep between your teeth and along your gum line for a refreshing experience. You will get

two months' worth of manual brushing in just 2 minutes.** 31,000 brush strokes per minute gently clean your teeth, break up plaque and sweep it away for an exceptional daily clean.

SmartTimer and QuadPacer

2 minute SmartTimer and 30 second QuadPacer guide you to brush for the recommended time in all areas of your mouth to ensure a complete clean.

BrushSync replacement reminder

All brush heads wear out over time, so you'll want to keep an eye on yours to make sure you're still getting a great clean. Our BrushSync technology tracks how long you've been using your brush head for and how hard you've been brushing. The BrushSync replacement reminder on your handle and a short beep remind you when it's time to replace it.

Two modes with Clean and Sensitive options

Switch between two modes to make the brushing session comfortable for you.

Long-lasting battery life

Battery life lasts up to 14 days so you can go long periods without charging.

Pulling the plug on waste

Our ambition at Philips is to reduce electronic waste. One way we do this is to minimise the number of adapters we put on the market. These products come without a power adapter because we are committed to reducing electronic waste.

Specifications

Power

Voltage: DC5V

Technical specifications

Operating time (full to empty): 14 days***
