Glass Baby Bottle

Natural Response

1 Bottle

4oz/120ml

Slow Flow Nipple

0-3m

SCY930/01

Supports baby's individual drinking rhythm

A nipple that works like a breast

The Natural Response Nipple releases milk only when baby actively drinks. Babies can can drink at their own rhythm like on the breast, so easy to combine breast and bottle feeding. Finding the right nipple is important. See more info below.

Easy to combine breast and bottle feeding

- Natural latch on with breast-shaped nipple
- Nipple releases milk when baby actively drinks

Other benefits

- No-drip nipple design prevents spills and lost milk
- Choose the right nipple flow for your baby
- Pharmaceutical grade glass, purity and heat resistance
- Same products, new navigation
- Simple to use, easy to clean and quick to assemble
- Natural Response Nipples and Bottles are BPA free*
- Be patient as baby adjusts

Vents air away from your baby's tummy

- Designed to reduce colic and discomfort

Finding the right nipple is important

Highlights

Natural Response Nipple

The Natural Response Nipple works with your baby's natural feeding rhythm, making it easy to combine breast feeding and bottle feeding. The nipple has a unique opening which only releases milk when the baby actively drinks. So when they pause to swallow and breathe, the milk pauses too.

Natural latch on

The wide, soft and flexible nipple is designed to mimic the shape and feel of a breast, helping baby to latch on and feed comfortably.

Finding the right nipple is important

If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a nipple with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

Anti-colic valve

Anti-colic valve is designed to keep air away from baby's tummy during feeding, to help reduce colic and discomfort.

No-drip nipple

The nipple opening is designed to release milk only when the baby is feeding. So you can confidently avoid milk loss whether at home or on the go.

Heat resistant glass

Made of premium quality borosilicate glass, the Philips Avent glass bottle is heat and thermal shock resistant. It can therefore be safely stored in the fridge, warmed, and is also suitable for sterilization.

Find the right nipple flow

Every baby feeds differently, and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalize your bottle. All of the Natural Response Nipples are made of soft silicone.

Same products, new navigation

We have moved to a pace-based flow navigation system. Start with the nipple that comes with the bottle. Try a lower flow if milk is leaking from baby's mouth or baby is gulping. Try a higher flow if baby is playing with the nipple instead of drinking or seems frustrated. As we make this update, you may receive either style of pack.

Highlights

Simple to use and clean

Wide bottle neck makes filling and cleaning easy. Only a few parts for quick and simple assembly.

BPA free*

The Philips Avent Natural bottles and nipples are made of BPA free* material.

Be patient as baby adjusts

Our new Natural Response Baby Bottles are different from free-flow baby bottles. Just like breastfeeding, it could take a few tries to get it right. That's perfectly natural.
