Highlights

Best value

The Philips Vision Moto lamps are the best choice for drivers looking for economical lamp solutions and not willing to compromise on security. The motorcycle bulbs offer 30% more vision on the road than a standard lamp.

ECE homologation

Philips Automotive is dedicated to producing best-in-class products and services in the Original Equipment Manufacturer market as well as in aftermarket. Our products are manufactured from high-quality materials and tested to the highest specifications to maximize the safety and driving comfort of our customers. Our entire production is meticulously tested, controlled and certified (ISO 9001, ISO 14001 and QSO 9000) to the highest ECE requirements.

Greater light-beam projection

Offering up to 30% more vision on the road, Philips VisionMoto headlamps are the perfect choice for motorcycle riders seeking for light performance and safety. With better light output, riders can react faster to obstacles and avoid accidents.

Manufacturers' choice

For 100 years, Philips has been on the forefront of the automotive lighting industry, introducing technological innovations that have become standard on modern automobiles. Today, one in two cars in Europe and one in three worldwide is equipped with Philips lighting.

High quality quartz glass

UV-Quartz glass is stronger than hard glass and highly resistant to temperature extremes and vibrations, which eliminates the risk of explosion. Philips quartz-glass lamps (filament 2 650° C and glass 800° C) are able to withstand severe thermal shock. With the capability of increased pressure inside the lamp, UV-quartz glass is able to produce a more powerful light.
