LED-FOG [~H8/H11/H16] 6000K, +160% brighter light, Compact design for better fit

Specifications

Marketing specifications

- Expected benefits: Compact design for better fit
- Product highlight: The next level of white light

Product description

- Application: Front fog
- Base: PGJ19-1, PGJ19-2, PGJ19-3
- Designation LED Type: LED-FOG [~H8/H11/H16]
- Homologation ECE: NO
- Range: Ultinon LED
- Technical features: Inbuilt Electronic driver
- Technology: LED
- Type: H8; H11; H16

Lifetime

- Life time: Up to 8 years

Light characteristics

- Lumens: 820
- Color temperature: Up to 6000K

Electrical characteristics

- Wattage: 10 W
- Voltage: 12 V

Ordering information

- Order entry: 11366ULX2
- Ordering code: 39850231

Packaging Data

- Packaging type: X2
- EAN1: 8727900398502
- EAN3: 8727900398519

Highlights

Automotive grade quality

The technologically advanced Philips lighting is renowned in the automotive industry, and has been for over 100 years. The Philips Automotive Grade Quality products are designed and developed following strict quality control processes (including applicable ISO norms), leading to consistently high production standards. Major car manufacturers choose Philips lamps, because when you buy Philips, you buy quality. You get powerful bright light, and precise beam performance. You get high-end style. Enjoy a safer and smoother drive.

Compact design

Philips Ultinon LED uses a brand new bulb design integrating driver box electronics in the body. A driver box is the brain of an LED: it manages performance aspects such as wattage and light output. Many other LED Upgrades solutions in the market have the driver box exterior to the LED body. Philips Ultinon LED integrates it directly in the body to create an optimized design using minimal space. Optimized LED size is key because several optics are very small. Philips Ultinon LED with its compact design fits a wide range of car models and can be easily installed by specialist mechanics.

Durable LED fog light bulbs

You want bright and stylish fog lights. But you don't want to keep replacing failed lamps. That's a major weakness of conventional fog lights; the more powerful the light, the shorter its lifespan. LEDs last much longer, and Philips Ultinon LED products show superior durability: they last up to 8 years.

Pure bright white light

With a high color temperature of up to 6000 Kelvin, the Philips Ultinon LED fog lights produces a bright white, daylight-like beam. With clearer vision you're better able to spot obstacles and take the perfect driving line. And as you don't have to strain to see the terrain ahead, brighter lights make for a more comfortable and exciting night-time drive.

Ready - steady - installed!

Designed to be easily installed in compatible vehicles, drivers with maintenance experience will be able to upgrade compatible headlights with ease. However, it's recommended that you get your new Philips LED headlights installed by specialist mechanics – they will make sure you're ready to go. While these headlights are compatible with a wide range of existing car models, not all car types are supported.
