Specifications

Marketing specifications

- Expected benefits: More light
- Product highlight: Up to 150% brighter light

Product description

- Application: High beam
- Application 2: Low beam
- Application 3: Front fog
- Base: PX26d
- Designation: H7 12972 XVP 12V 55W PX26d S2
- Homologation ECE
- Range: X-tremeVision Pro150
- Technology: Halogen
- Type: H7

Lifetime

- Life time: 450 h

Light characteristics

- Color temperature: 3,400 K
- Lumens: 1,500 ±10%

Electrical characteristics

- Wattage: 55 W
- Voltage: 12 V

Ordering information

- Order entry: 12972XVPS2
- Ordering code: 01268530

Packaging Data

- EAN1: 8719018012685
- EAN3: 8719018012692
- Packaging type: S2

Packed product information

- Length: 10.6 cm
- Width: 5.6 cm
- Height: 13.0 cm
- Net weight per piece: 12 g
- Pack Quantity: 2
- MOQ (for professionals): 10

Outerpack information

- Length: 32.5 cm
- Width: 24.2 cm
- Height: 12.0 cm
- Gross weight per piece: 1.414 kg

12972XVPS2/20

Highlights

Brighter light for more safety

With Philips X-tremeVision Pro150, you enjoy up to 150% brighter light. Drive home to your loved ones knowing you can see clearly even in darkness and adverse weather conditions. Advanced filament design provides greater precision and luminance for better illumination of the road, while new Diamond Precision quartz-glass technology ensures more brightness.

A lifetime of safety

The new production technique for Philips Diamond Precision quartz glass increases light throughput as well as providing greater resistance to thermal shock and pressure. A tailor-made composition of precious gases further protects the filament from ageing. That means more brightness and a longer lifespan of up to 450 hours (refers to H7; H1: 350h), probably the longest from such a powerful bulb.

Change both bulbs at once

It simply makes more sense to change headlamp bulbs in pairs, rather than only replacing the failed one. Modern bulbs provide increased light output and superior performance, offering a safer driving experience. By replacing bulbs in pairs, you save time and cost, avoid the risk of headlight failure, benefit from a brighter and better balanced beam, but above all, you make driving safer for yourself and your loved ones.

Stay alert for longer

Driving in dark conditions can be tiring to the eyes, leading to strained sight and a greater risk of fatigue. Projecting a whiter light of up to 3,400K, Philips X-tremeVision Pro150 gives your view ahead greater contrast, which helps you identify and interpret approaching objects with increased confidence. Seeing more clearly keeps you alert for longer, making your drive safer and more enjoyable.

Highest quality car lighting

Technologically advanced Philips lighting is renowned in the automotive industry, and has been for over 100 years. The Philips Original Equipment Quality products are designed and developed following strict quality control processes (including applicable ISO norms), leading to consistently high production standards. Philips X-tremeVision Pro150 is compatible with car models of major brands, such as Audi, BMW, Ford, GM, Toyota and Volkswagen. See the product selector guide for more information.

See up to 70 meters further

Because it can throw light up to 70 meters further ahead on the road, Philips X-tremeVision Pro150 increases your ability to react to potential hazards. Extending your safety distance means you and your passengers can enjoy a safer drive.
