Product description

- · Application: Interior, positioning, trunk
- Base: W2.1X9.5D
- Designation LED Type: 168WLED-WHITE
- Homologation ECE: NO
- · Range: Ultinon LED
- Technology: LED
- Type: T10

Lifetime

• Life time: Up to 8 years

Light characteristics

- Color temperature: Up to 6000K
- Lumens [lm]: 115

Electrical characteristics

Voltage: 12 V

Ordering information

- Order entry: 168ULWX2
- Ordering code: 78721569

Packaging Data

- EAN1: 46678721564
- EAN3: 50046678721569
- · Packaging type: X2

Packed product information

- Pack Quantity: 2
- MOQ (for professionals): 10
- Length [in]: 2.68
- Width [in]: 1.1
- Height [in]: 3.62
- · Gross weight per piece [lbs]: 0.01

Outerpack information

- Length [in]: 7.68

Highlights

See more inside your car

Whether it's your phone, your keys or your child's missing left shoe, at some point we've all had to search for a misplaced item in a poorly lit car. With Philips LED interior lighting, you get a bright, white, and uniformly diffused light. So the next time you're searching around in the trunk, the glove compartment or the floor of your car, you'll be able to see exactly what you're doing and find anything with ease.

Long-lasting LED lighting

You want bright and stylish car lights. But you don't want to keep replacing failed lamps. That is a major weakness of conventional lights: the more powerful the light, the shorter its lifespan. At the same light intensity, LEDs last longer. And Philips Ultinon LED lights have additional resistance to heat and vibration, making them a perfect choice for long-lasting performance, with a lifetime of up to 8 years.

Good light diffusionPhilips LED interior lighting range is designed to ensure the light is evenly distributed in the car's interior. You'll have an easier time seeing what's inside in a faster amount of time.

Automotive grade quality

The technologically advanced Philips lighting is renowned in the automotive industry, and has been for over 100 years. The Philips Automotive Grade Quality products are designed and developed following strict quality control processes (including applicable ISO norms), leading to consistently high production standards. Major car manufacturers choose Philips lamps, because when you buy Philips, you buy quality. You get powerful bright light, and precise beam performance. You get high-end style.

Ready, steady, installed!

Designed to be easily installed in compatible vehicles, drivers with maintenance experience will be able to upgrade compatible lights with ease.

Long-lasting LED lighting

Your car is an expression of who you are. Make a statement and get noticed with durable and longlasting Philips Ultinon LEDs. They are a direct replacement for conventional bulbs, easy to install and available for a wide range of interior and exterior applications.

Excellent Light Distribution

The bright output and intense color adds more than just style. They provide superior light distribution, with a wide angle beam on the road so you can see and be seen better.
