Dedicated design for perfection

- With just a screwdriver

PHILIPS

Retrofit lock with keypad
Built-in Wi-Fi PIN code, fingerprint, and app, Works with wireless keypad, Auto-unlock

DDL230XI5KAK/37

Highlights

Easy installation

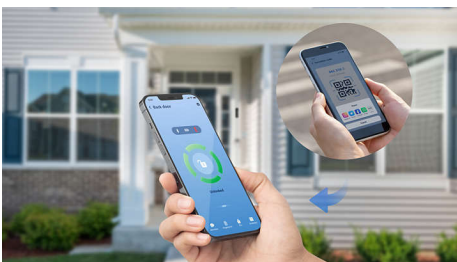

The door lock installs in minutes with just a screwdriver and is compatible with most standard deadbolts.

Upgrade your existing deadbolt

The retrofit lock is easy to install and set up. It is also compatible with most standard deadbolts in the market, and allows you to keep your original keys while enjoying the benefits of a smart lock.

Simple sharing

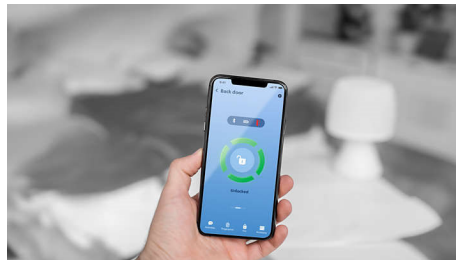

Works with the Philips Home Access App to share access with friends, family members or anyone you want anywhere and anytime. Know who is coming and leaving with instant notifications.

Fingerprint and PIN code

Stores up to 50 fingerprints and 100 PIN codes of family members, guests, or tenants. Users can choose either of the access method to unlock.

Built-in Wi-Fi

The Philips Wi-Fi retrofit lock has a built-in Wi-Fi module, and does not require an extra Wi-Fi bridge to be controlled remotely. It is easy to control your lock and securely manage user account via the Philips Home Access App. You can also remotely unlock for your family members, friends, visitors and more.

Auto-unlock

Another unique feature of the Philips retrofit lock is auto-unlock. Once auto-unlock is activated, simply arrive home with your

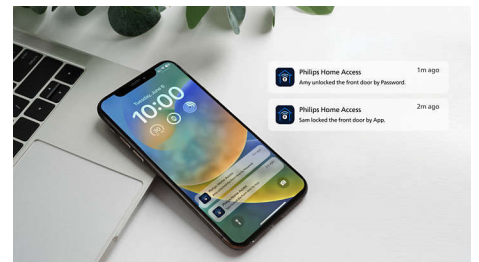

smartphone, and the door can be unlocked with just a knock at the door!

Door position sensor

The door position sensor can confirm that your door is securely closed, no more asking for help from your neighbors to check your door status.

Unlock notifications

Works with the Philips Home Access App to know who is coming through real-time notifications.

Smart home ready

Control and check your lock status with voice command through Amazon Alexa or Google Assistant.
