- Always know the door status
- Control your doorway with voice command

Dedicated design for perfection

- With just a screwdriver

PHILIPS

Retrofit lock

Built-in Wi-Fi App unlock , Works with wireless keypad, Built-in alerts

Highlights

Upgrade your existing deadbolt

The retrofit lock is easy to install and set up. It is also compatible with most standard deadbolts in the market, and allows you to keep your original keys while enjoying the benefits of a smart lock.

Simple sharing

Works with the Philips Home Access App to share access with friends, family members or anyone you want anywhere and anytime. Know who is coming and leaving with instant notifications.

Built-in Wi-Fi

The Philips Wi-Fi retrofit lock has a built-in Wi-Fi module, and does not require an extra Wi-Fi

bridge to be controlled remotely. It is easy to control your lock and securely manage user account via the Philips Home Access App. You can also remotely unlock for your family members, friends, visitors and more.

Auto-unlock

Another unique feature of the Philips retrofit lock is auto-unlock. Once auto-unlock is activated, simply arrive home with your smartphone, and the door can be unlocked with just a knock at the door!

Door position sensor

The door position sensor can confirm that your door is securely closed, no more asking for help from your neighbors to check your door status.

DDL230X15KTW/37

Smart home ready

Control and check your lock status with voice command through Amazon Alexa or Google Assistant.

Built-in alerts

A built-in sensor will sense the vibration of the door and alert homeowners with notifications to the Philips Home Access App. Two alert modes let you know when someone is pounding at your door or knocking on your door.

Easy installation

The door lock installs in minutes with just a screwdriver and is compatible with most standard deadbolts.
