More comfort, more milk*. Anytime, anywhere

Single electric breast pump with massage cushion

Sit comfortably without leaning forward as our soft massage cushion gently stimulates your milk flow. Use our quiet pump anytime, anywhere, even with batteries. It's easy to set up, personalise, use and clean

Gently stimulates let-down and milk flow

- Soft massage cushion with massaging petals

Easy to set up, express and clean

- Few separate parts and intuitive design
- Closed system, designed for hygienic expression
- Includes our Natural bottle and teat for natural latch-on

Quiet pump for discreet expression, anytime

- Designed to let you express quietly

Clinically proven less leaning forward*

- More comfortable pumping position due to unique design

1 stimulation mode and 3 expression settings

- Choose the setting that is effective and comfortable for you

Highlights

Relaxing position

The breast pump has a unique design, so your milk flows directly from your breast into the bottle or container, even when you are sitting up straight. This means you can sit more comfortably when pumping: there's no need for you to lean forward to make sure all your milk ends up in the bottle. Sitting comfortably and being relaxed when pumping helps your milk to flow more easily.

Simple settings to choose from

When switched on, the pump automatically starts in gentle stimulation mode to get your milk flowing. Then choose from 3 pumping settings to make milk flow comfortable for you.

Soft massage cushion

Our massage cushion has a soft, velvety texture that gives a warm feel to the skin for comfortable, gentle stimulation of your milk flow. The iconic petal cushion is designed to mimic baby suckling, intended to gently help stimulate let-down.

No milk spillage in the tubes

No milk spillage in the tubes.

Easy to set up, express and clean

Few separate parts and intuitive design. Easily express milk for your baby, anytime.

Includes our Natural bottle

The wide, breast-shaped teat promotes natural latch-on similar to the breast, making it easy for your baby to combine breast and bottle feeding.

Quiet pump

Designed for discreet expression.

Development stages

Stage: 0–6 months

* Clinically proven comfort: In a test carried out on 110 mothers in the USA, UK, China and Russia in March 2016, mothers awarded an average score of 8.6/10 for Philips Avent performance on comfort.

* More milk: Independent research has shown that there may be a link between stress levels and milk production. see www.philips.com/Avent

* BPA-free breast pump: Only associated with the bottle and other parts that come into contact with breast milk. Following EU regulation, 10/2011
