- Color: Dark blue
- Net weight: about 0.78 kg
- Quantity of airbags: 10

Main parameters

- Temperature of heating: 40-50 °C

- Battery: 5000 mAh
- Charging port: USB Type-C

Country of origin

- Made in: China

Service

- Warranty period: 2 years

Highlights

All-in-one knee massage

Dual massager design, both knees can enjoy knee care at the same time.

Hot compress function

3 levels of hot compress temperature can be adjusted to promote blood circulation, effectively relieve muscle tension, reduce local pain, let people fully relax and relieve the fatigue of the day. Built-in precise NTC temperature control system, overheating automatic power off, to achieve intelligent anti-scald.

Multiple massage modes

There are 4 preset massage modes, one button to start the massage, giving you the comfort you want.

Airbag design

There are 10 three-dimensional airbags inside, which wrap the knees in multiple angles for massage, give the knee airbags a squeeze massage, and relax the knees

FloatFit 3d knee pads

The knee part of the device is equipped with a ring-shaped air suspension, which fixes the patella by inflating the airbag and gives the patella a supporting effect. Patella massage can be achieved by switching between inflation and deflation cycles, relaxing the patella and relieving the pressure on the patella.

Timing shut-off

A timed 30-minute working time for automatically shut off, effectively avoiding excessive massage and causing discomfort of redness and swelling of the skin.

Use wireless

Built-in 5000mAh battery can be used for 120 minutes when fully charged. The device supports use in charging, so there is no worry about battery life.
