

PHILIPS

2-pack brush heads

One For Kids by
Sonicare

BH1022/30

Buddy up, brush together, build great habits

The first step to better brushing

With Philips One For Kids by Sonicare, your little one can learn how to brush every part of their mouth for the recommended 2 minutes. The gentle pulse reminders and fun design help them to switch easily from manual to electric brushing.

Designed around your child

- Comfortable cleaning as they learn to brush
- Specially designed to protect kids' teeth and gums

Highlights

Gentle micro-vibrations

Philips One For Kids uses gentle micro-vibrations to clean your child's teeth while they brush. It helps them to transition comfortably and smoothly from manual to electric brushing.

Soft bristles and brush head

Our brush head's soft mini-bristles help protect tooth enamel and gums and the rubber backing feels gentler for little mouths. Don't forget to change the brush head every 3 months for best results!
