# 8 Troubleshooting

**No power**
- Ensure that both plugs of the mains cord are properly connected.
- Ensure that there is power at the AC outlet.
- Check if the built-in battery is drained.

**No sound**
- Ensure that the AV cable is connected correctly.

**No response to the remote control**
- Ensure that the path between the remote control and the player is clear from obstacles.
- From a close distance, point the remote control directly at the player.
- Replace the remote control batteries.
- The function does not work for this disc. Refer to the disc instructions.

**Distorted picture**
- Clean the disc. With a clean, soft, lint-free cloth, wipe the disc outwards from the center.
- Make sure that the video output format of the disc is compatible with the TV.
- Change the video output format to match your TV or program.
- The LCD is manufactured using high precision technology. You may, however, see tiny black points and/or bright points(red, blue, green) that continuously appear on the LCD. This is a normal result of the manufacturing process and does not indicate a malfunction.

**Cannot play disc**
- Ensure the disc label is upwards.
- Clean the disc. With a clean, soft, lint-free cloth, wipe the disc outwards from the center.
- Check if the disc is defective by trying another disc.

**No response to operating commands**
- The operation is not permitted by the disc.

**The player feels warm**
- When the player is in use for a long period of time, its surface will be heated. This is normal.

**No/weak signal displayed on the screen**
- TV signal is too weak or out of TV signal covering area.
- Make sure you are in an area with sufficient coverage.
- Connect to your home TV antenna socket.
- Receiving TV in a driving car may cause signal problems.

**TV reception with Black and White picture or no sound**
- Ensure that you set the TV format correctly according to local TV broadcast specifications. If you do not know the information, contact local TV broadcast authorities for help.
