# Highlights

## Big button

The buttons are larger on the remote to help read the labels better. Additionally, pressing the button becomes more convenient, as the size has increased by 2 mm compared to the standard button size.

## Extra protection rim

The extra protection provided by the special rubber rim decreases the chance of dropping or breaking the remote. In addition, it improves the grip of the remote in your hand, thereby improving comfort.

## Glow in the dark

A special translucent coating is added on the rubber part to have a glow in the dark effect. This is to ensure you can easily find the product in the dark.

## Pre-programmed for Philips

If you have Philips equipment, you can use your universal remote control without programming it because all keys are pre-set for Philips.
