

Philips SoundBar
Home theatre with
Ambisound

DVD playback

HTS8141

Superior surround sound without the clutter

Bring the cinema home

Indulge in cinema-like multi channel surround sound without speakers and wires all around you. Philips SoundBar with Ambisound incorporates a complete home theatre system, including DVD and CD Playback in a single unit.

Superior listening experience

- Ambisound technology for surround sound from fewer speakers
- DoubleBASS technology for fuller and deeper bass
- Clear Voice for more audible vocals in movies and music
- FullSound™ to bring your MP3 music to life

Designed to enhance your living space

- Touch screen for intuitive playback and volume control
- Flexible placement on the wall, tabletop or stand

Connect and enjoy all your entertainment

- Faroudja DCDi for incredibly sharp high-quality video
- Enjoy all your movies and music from CDs and DVDs
- Dock your iPod for media playback with on-screen control
- Simple to set up with only three cables to connect
- EasyLink controls all EasyLink products with a single remote

PHILIPS
sense and simplicity

Highlights

Ambisound technology

Ambisound technology produces truly embracing multi-channel surround sound from fewer speakers. It delivers an immersive 5.1 sound experience without the constraints of sitting position, room shape or size, and without the clutter of multiple speakers and cables. Through the combined effect of psychoacoustic phenomena, array processing and precisely angled driver positioning, Ambisound delivers more sound from fewer speakers.

Faroudja DCDi

Enjoy incredibly sharp, high-quality video on your progressive scan TV with Faroudja DCDi. The feature alleviates jagged edges that appear when standard interlaced video is viewed, especially with moving images, thus delivering natural-looking action scenes. Bring your viewing experience to the next level with clearer, smoother pictures

DoubleBASS technology

DoubleBASS ensures you hear even the deepest bass tones from compact-sized subwoofers. It captures low frequencies and recreates them in the audible range of the subwoofer - delivering sound with more boom and panache, and ensuring you get a full, uncompromised listening experience.

FullSound™

Philips' innovative FullSound technology faithfully restores sonic details to compressed MP3 music, dramatically enriching and enhancing it, so you can experience CD music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed

MP3 music in true-to-life sound that will touch your soul and move your feet.

EasyLink

EasyLink lets you control multiple devices with one remote. It uses HDMI CEC industry-standard protocol to share functionality between devices through the HDMI cable. With one touch of a button, you can operate all your connected HDMI CEC-enabled equipment simultaneously. Functions like standby and play can now be carried out with absolute ease.

Dock your iPod

The docking station included with your home theatre system lets you play movies, music and photos from your iPod. What's more, you can control the iPod and browse through its contents on your TV screen - all with the home theatre system's remote. The dock brings portable entertainment into your home - with absolute convenience and ease of use.

Specifications

Picture/Display

- Picture enhancement: High Def (720p, 1080i, 1080p), Video upscaling, Faroudja DCDi
