4.8 cm (1.9") high-contrast graphical display with white backlight

Advanced privacy settings*

Blacklist restricts calls from specific numbers or numbers starting with certain digits. You can block 4 sets of numbers. Each set of numbers can consist of 1 to 24 digits. When there is an incoming call from a number starting with one of these numbers or from one of 4 exact Caller numbers, the phone will not ring. With silence mode you can disable the ringtones at specific times. Thanks to Call barring, you can avoid expensive phone bill surprises by blocking calls to specific numbers starting with certain digits. Anonymous Call restricts incoming calls with hidden numbers. The phone will not ring.

Caller ID*

Sometimes it's good to know who's calling before you answer. And our Caller ID lets you keep track of who's on the other end of the line.

Event notifications

Event LED shows charging or call/message status

Hearing aid compatible

Hearing aid compatible - reduces unwanted noise

Instant calling

Now calling the people you care about most is easier than ever. With simple one-touch dialling, you will never have to search for their numbers again, connecting at the touch of a button.

Keypad backlight

The soft amber backlight makes keys easy to read in low light conditions and at night.

Large display and characters

Extra-large display and characters for easy reading

Two-field phonebook entries

These days most people have multiple contact numbers. Our contact list makes it easier for

you to manage your phone contacts. Simply save two phone numbers from a choice of three different field names: home, work and mobile.

Up to 16 hours talk time

Up to 16 hours of talk time on a single charge

Visual ringer

Visual ringer flashes to alert you of incoming calls

Volume boost

Do you sometimes wish a caller could speak a little louder? With the one-touch volume boost key, you can instantly increase the volume by over 12 dB* at the earpiece and over 8 dB* at the hands-free speaker. Now you can hear every word and tone loud and clear. No conversation will be misunderstood ever again. *Measurement is based on the lowest volume level to the maximum boost-up volume level. Users are advised not to put the handset close to the ear when the boost-up key is first pressed. Boost-up volume will return to normal when you end the call.

Up to 30 min. recording

With up to 30 minutes recording time, you'll never miss an important message.
