Highlights

Built-in desktop stand

The integrated desktop stand on the back of the case allows convenient, hands-free video viewing on any flat surface.

Wrap-around protection

The material of this case wraps around from back to front, providing protection for the corners and perimeter of your device's face.

Slim design fits in your bag

This case is designed to add protection with minimal bulk, so you can easily carry your device in your bag or backpack for protection on the go.

Interior ridges absorb shock

For even better protection, the shock-absorbing rubber case also features an internal series of ridges. This raised pattern creates air pocket that help distribute the shock within the case to lessen the impact on your device.
