- **Talk time:** up to 10 hours

### Network Features

- **Dialling:** Tone, Pulse
- **Antenna:** Integrated on base, Integrated on handset

### Operator Requirements

- Name and Caller ID

## Product highlights

### Phone-number display

The number of the person you want to call is displayed on the telephone display. You can verify it before seizing the telephone line.

### Keypad lock

In your pocket your DECT phone can be jolted and a key might be accidentally pressed. To prevent inadvertently calling your cousin in the US, the keypad lock is a safe way to avoid bad surprises on your next phone bill

### Paging key

Instead of looking in every corner of the house, simply call the handset from the base by pressing the dedicated key on the base station and the handset lets you know where it is hiding.

### Crystal Clear Sound Quality

The use of digital communication virtually eliminates interference, buzzing and hissing. It improves the intelligibility of messages left on the answering machine and even makes it possible for users to record and reproduce music.

### Instrumental ringtones

Instead of the traditional aggressive "buzzer" ringers, instrumental melodies are a more pleasant way to let you know when someone is calling.
