

Philips
Clock Radio

Recordable alarm

AJ3138

Wake up easy

with this clock radio

Have your child wake up to his/her favorite sound or voice with the Philips AJ3138/12 clock radio. Exchangeable rings and buttons add personality while the nap timer lets you program the clock without having to change the alarm settings.

Start the day your way

- Backlight blinking effect for wake up indication
- Exchangeable color rings and knobs to match your personality
- Wake up to your favorite recorded sound or voice

Designed for your convenience

- Digital tuning with preset stations for extra convenience
- Large backlit LCD display for easy viewing in low light
- Mains or battery operated for flexible placement
- Nap timer for a short nap without changing alarm settings

Everything you need

- Weekday/ weekend alarm setting to complement your lifestyle
- Gentle wake for a pleasant wake up experience
- Adjustable repeat alarm for flexible extra snooze time
- Sleep timer for easy falling asleep to your favorite music

PHILIPS
sense and simplicity

Highlights

Backlight blinking effect

When the alarm sounds, the backlight will blink at the same time. For young children, it is an easy way to indicate when they should get up even if they do not yet have any concept of time. The light will blink for one minute and then turn off until the alarm sounds again.

Weekday/ weekend alarm

Designed with modern day lifestyles in mind, this clock radio has a dual alarm feature, allowing you to set different alarm times for weekdays and weekends or even vary the alarm settings for couples. The alarm settings can be tailored for the same alarm times for the entire week from Monday to Sunday. Or you can set the alarm for an early start on weekdays from Monday to Friday, and lazy lie-ins for Saturday and Sundays. Whichever you choose, this convenient features saves you from the hassle of fiddling with different alarm times every single night.

Exchangeable color rings

Exchangeable blue and pink color rings and button add fun and personality to the clock radio. Create your own identity or match it to your room's style. Options include the two ear knobs on top and the ring in front.

Digital tuning with presets

Simply tune into the station that you want to preset, press and hold the preset button to

memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Gentle wake

Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

Large backlit LCD display

Backlit LCD display ensures easy viewing and operation in low light conditions, and provides clear information at a glance.

Mains or battery operated

Power your Philips radio set with batteries or a direct mains supply, and enjoy great convenience and flexibility. When a power socket is not available or when you don't want unsightly wires trailing, simply operate the set with batteries. When you need a continuous and stable power supply, connect the set directly to a wall socket. Now you can truly enjoy the freedom of listening wherever you like.

Nap timer

Numerous studies have shown that taking a nap during the day is good for your health. The nap timer helps you get into this healthy habit by letting you take a brief nap without worrying about oversleeping or having to reset your alarm each time. Simply press one button to enjoy a healthy nap from 15 minutes to two hours before you head back to your busy day. The nap timer will automatically count down to zero and a buzzer will sound at the pre-set time to wake you up.

Adjustable repeat alarm

To counter oversleeping, the Philips Clock radio has an adjustable snooze feature. Should the alarm ring and you wish to continue sleeping a bit longer, simply press the Repeat alarm button once and go back to sleep. Five minutes later the alarm will ring again. If you want to get more sleep than that, press the Snooze button twice for 10 minutes or three times for 15 minutes.

Specifications

Convenience

- Alarms: 24 hour alarm reset, buzzer alarm, radio alarm, repeat alarm (snooze), dual alarm
