Highlights

SkinProtect blade

Our SkinProtect blade gives an extra layer of protection from nicks and cuts for sensitive armpit and pubic skin. Designed to fit every curve and corner - not-too-close for comfort!

Unique OneBlade Technology

Now our famous OneBlade technology is ready for your armpits and those intimate regions down below no matter how long you’ve let things grow. While the quick cutter mows through all that hair at a speed of 100x per second, the rounded edges and bridge of the skin protector and rounded tips protect your oh-so-tender skin under there and down below.

Dual-sided blade

Does your intimate grooming routine call for clean lines or an extra touch of styling precisely where you want? With the OneBlade Intimate dual-sided blades you can easily shave up or down and style to your heart’s desire with confidence.

Durable stainless steel blade

Our blades are made from stainless steel that’s durable enough to last up to 4 months*. That’s just 3 times a year. To make life easier, create a reminder on your phone so you know when you need to buy a new blade. Because a sharp blade makes shaving those thick and curly legs quick and easy.

Shave wet or dry

Some like it wet, others like it dry. OneBlade Intimate is fully waterproof, with an IPX7 certification (up to 1m deep for 30 minutes). So feel free to shave while bathing or showering if that’s what you prefer. Dry shaving’s OK too, even without shaving foam. Rinse to clean under running water.

Charge anytime, anywhere

Keep your OneBlade Intimate charged and ready to shave, so you can maintain your intimate grooming routine wherever you happen to be at home, in a hotel, at a friend’s.

Trim it down

Trim away pubic and armpit hair anyway you want. Our attachable 3mm body comb makes it fast and easy to simply trim those intimate hair no matter which direction you find yourself trimming.

Half hour of non-stop shaving

A single charge gives you a half hour of shaving pleasure, so you can take your time on your armpits and intimate areas. A complete recharge takes 8 hours.
