- Talk time: Up to 12 hours

Highlights

HD sound

Enjoy high quality conversation, with a level of clarity rarely heard before. Thanks to a high-quality speaker and to a real acoustic chamber, the audio spectrum reaches far beyond what's normally heard on a telephone.

Speakerphone - Talk handsfree

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or take notes during a call.

SMS text messaging

SMS (Short Message Service) lets you send and receive messages of limited length.
