

Philips  
Micro Hi-Fi System

MCB700

## Digital Sound from DAB Stations

Enjoy superb clarity with a built-in DAB tuner with this Micro system. With a mirror-finished centre-unit that adds a touch of stylishness to any interior and wood-finished speakers that deliver high quality sound.

### Enjoy digital quality DAB radio

- Tune into digital-quality radio stations
- DAB and FM compatible for a full radio experience

### Unlimited listening pleasure

- Play MP3/WMA-CD, CD and CD-RW

### Enrich your sound experience

- Digital Sound Control for optimised music style settings
- Dynamic Bass Boost for deep and dramatic sound
- Loudness for bass and treble enhancement
- 2 x 25 W RMS/2 x 50 W Music Power

### Design that blends into your interior(s)

- High-end component design with stand
- Elegant wood-finished speakers
- High-quality remote control for comfortable use

**PHILIPS**  
sense and simplicity

# Highlights

## DAB and FM compatible

DAB (Digital Audio Broadcasting) digital radio is a new way of broadcasting radio, in addition to FM analogue transmission, via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in clear, crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can find. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no retuning on the move.

## Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classical controls

you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

## Dynamic Bass Boost

Dynamic Bass Boost maximises your music enjoyment by emphasising the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually

get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

## Loudness for bass and treble

In the sound spectrum, high and low frequencies are relatively less audible to human ears - especially at low volumes. With the Loudness feature activated, the bass and treble will be amplified so you can savour a more balanced sound perception overall.

# Specifications

## Sound

- Output Power: 2 x 25 watts RMS/2 x 50 watts music power
- Sound Enhancement: Loudness, Digital Sound Control 4 modes, Dynamic Bass Boost

## Loudspeakers

- Main Speaker: 2-way, 4" woofer, Bass Reflex Speaker System, Speaker grilles detachable
