1 Important

Read and understand all instructions before you use your home theater. If damage is caused by failure to follow instructions, the warranty does not apply.

Safety

Risk of electric shock or fire!

- Never expose the product and accessories to rain or water. Never place liquid containers, such as vases, near the product. If liquids are spilt on or into the product, disconnect it from the power outlet immediately. Contact Philips Consumer Care to have the product checked before use.
- Never place the product and accessories near naked flames or other heat sources, including direct sunlight.
- Never insert objects into the ventilation slots or other openings on the product.
- Where the mains plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.
- Disconnect the product from the power outlet before lightning storms.
- When you disconnect the power cord, always pull the plug, never the cable.

Risk of short circuit or fire!

- Before you connect the product to the power outlet, ensure that the power voltage matches the value printed on the back or bottom of the product. Never connect the product to the power outlet if the voltage is different.

Risk of injury or damage to the home theater!

- For wall-mountable products, use only the supplied wall mount bracket. Secure the wall mount to a wall that can support the combined weight of the product and the wall mount. Koninklijke Philips Electronics N.V. bears no responsibility for improper wall mounting that results in accident, injury or damage.
- For speakers with stands, use only the supplied stands. Secure the stands to the speakers tightly. Place the assembled stands on flat, level surfaces that can support the combined weight of the speaker and stand.
- Never place the product or any objects on power cords or on other electrical equipment.
- If the product is transported in temperatures below 5°C, unpack the product and wait until its temperature matches room temperature before connecting it to the power outlet.
- Visible and invisible laser radiation when open. Avoid exposure to beam.
- Do not touch the disc optical lens inside the disc compartment.
- Parts of this product can be made of glass. Handle with care to avoid injury and damage.

Risk of overheating!

- Never install this product in a confined space. Always leave a space of at least four inches around the product for ventilation. Ensure curtains or other objects never cover the ventilation slots on the product.

Risk of contamination!

- Do not mix batteries (old and new or carbon and alkaine, etc.).
- Danger of explosion if batteries are incorrectly replaced. Replace only with the same or equivalent type.
- Remove batteries if they are exhausted or if the remote control is not to be used for a long time.
- Batteries contain chemical substances, they should be disposed of properly.

Risk of swallowing batteries!

- The product/remote control may contain a coin/button type battery, which can be swallowed. Keep the battery out of reach

of children at all times! If swallowed, the battery can cause serious injury or death. Severe internal burns can occur within two hours of ingestion.

- If you suspect that a battery has been swallowed or placed inside any part of the body, seek immediate medical attention.
- When you change the batteries, always keep all new and used batteries out of reach of children. Ensure that the battery compartment is completely secure after you replace the battery.
- If the battery compartment cannot be completely secured, discontinue use of the product. Keep out of reach of children and contact the manufacturer.

This is CLASS II apparatus with double insulation, and no protective earth provided.

3D health warning

If you or your family has a history of epilepsy or photosensitive seizures, consult a medical professional before exposing yourself to flashing light sources, rapid image sequences or 3D viewing.
To avoid discomfort such as dizziness, headache or disorientation, we recommend not watching 3D for extended periods of time. If you experience any discomfort, stop watching 3D and do not immediately engage in any potentially hazardous activity (for example driving a car) until your symptoms have disappeared. If symptoms persist, do not resume watching 3D without consulting a medical professional first.
Parents should monitor their children during 3D viewing and ensure they do not experience any discomfort as mentioned above. Watching 3D is not recommended for children under six

years of age as their visual system is not fully developed yet.

Care for your product

- Do not insert any objects other than discs into the disc compartment.
- Do not insert warped or cracked discs into the disc compartment.
- Remove discs from the disc compartment if you are not using the product for an extended period of time.
- Use only microfiber cloth to clean the product.

Care of the environment

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

When this crossed-out wheeled bin symbol is attached to a product it means that the product is covered by the European Directive 2002/96/EC. Please inform yourself about the local separate collection system for electrical and electronic products.

3 Connect and set up

This section helps you connect your home theater to a TV and other devices, and then set it up.

For information about the basic connections of your home theater and accessories, see the quick start guide.

> **Note**
>
> • For identification and supply ratings, see the type plate at the back or bottom of the product.
> • Before you make or change any connections, make sure that all devices are disconnected from the power outlet.

Speakers

Position, connect, and set up your speakers for best surround sound.

Position

Speaker position plays a critical role in setting up a surround sound effect.

For best results, place your speakers and the subwoofer as shown below.

> **Note**
>
> • Surround sound depends on various factors such as room shape and size, type of wall and ceiling, windows and reflective surfaces, and speaker acoustics.

Follow these general guidelines, and then set up your speakers.

1 Seating position:
   This is the center of your listening area.

2 **SPEAKER LEFT** (speaker left) and **SPEAKER RIGHT** (speaker right) speakers:
   Place the left and right speakers in the front, and equidistant from the main unit in an arc, so that the two speakers are at same distance from your seating position. For best effect, point the speakers towards the seating position and place the speakers close to the ear level (when seated).

3 **SUBWOOFER** (subwoofer):
   Place the subwoofer at least one meter to the left or right of the TV. Leave about ten centimeter clearance from the wall.

Connect

Connect your speakers and the subwoofer to your home theater as described in the quick start guide.

Connect to TV

Connect your home theater to a TV to watch videos. You can listen to audio from TV programs through your home theater speakers. Use the best quality connection available on your home theater and TV.
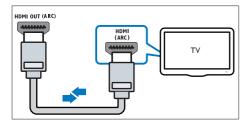

Option 1: Connect to TV through HDMI (ARC)

### Best quality video
Your home theater supports HDMI version with Audio Return Channel (ARC). If your TV is HDMI ARC compliant, connect your home theater to the TV through the HDMI ARC connection for easy and quick setup.

With HDMI ARC, you do not need an additional audio cable to play audio from TV through your home theater.

1 Using a High Speed HDMI cable, connect the **HDMI OUT (ARC)** connector on your home theater to the **HDMI ARC** connector on the TV.
The **HDMI ARC** connector on the TV might be labeled **HDMI IN** or **HDMI**. For details on TV connectors, see the TV user manual.

2 On your TV, turn on HDMI-CEC. For details, see the TV user manual.
» When you play a disc on your home theater, the video is automatically displayed on TV and the audio is automatically played on the home theater.

3 If audio from the TV does not play automatically on your home theater, set up the audio manually (see 'Set up the audio' on page 11).

Option 2: Connect to TV through HDMI
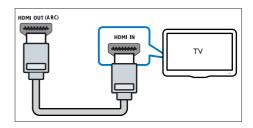

Best quality video
If your TV is not HDMI ARC compliant, connect your home theater to the TV through a standard HDMI connection.

With a standard HDMI connection, you need an additional audio cable to play the audio from the TV through your home theater.

1 Using a High Speed HDMI cable, connect the **HDMI OUT (ARC)** connector on your home theater to the **HDMI** connector on the TV.
The HDMI connector on the TV might be labeled **HDMI IN**.

2 On your TV, turn on HDMI-CEC. For details, see the TV user manual.
» When you play a disc on your home theater, the video is automatically displayed on TV and the audio is automatically played on the home theater.

3 To play audio from TV programs through your home theater, connect an additional audio cable.

4 If audio from the TV does not play automatically on your home theater, set up the audio manually (see 'Set up the audio' on page 11).

> **Note**
>
> • If your TV has a DVI connector, you can use an HDMI/DVI adapter to connect to TV.
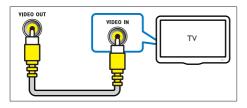

Option 3: Connect to the TV through composite video

Basic quality video

If your TV does not have HDMI connectors, connect your home theater to the TV through a composite connection. A composite connection does not support high-definition video.

With a composite connection, you need an additional audio cable to play the audio from the TV through your home theater.

1 Using a composite video cable, connect the **VIDEO OUT** connector on your home theater to the composite video connector on the TV.

The composite video connector might be labeled **AV IN**, **VIDEO IN**, **COMPOSITE**, or **BASEBAND**.

2 On your TV, switch to the correct video input.

3 To play audio from TV programs through your home theater, connect an additional audio cable.

On your home theater, press **SOURCE** repeatedly to select the correct audio input.

Connect audio from TV and other devices

Play audio from TV or other devices through your home theater speakers.

Use the best quality connection available on your TV, home theater, and other devices.
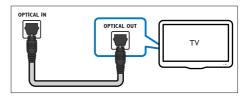

> **Note**
>
> • When your home theater and TV are connected through HDMI ARC, an audio connection is not required.

Option 1: Connect audio through a digital optical cable

Best quality audio
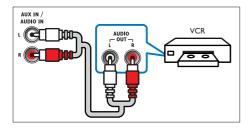

1 Using an optical cable, connect the **OPTICAL** connector on your home theater to the **OPTICAL OUT** connector on the TV or other device.

• The digital optical connector might be labeled **SPDIF** or **SPDIF OUT**.

Option 2: Connect audio through analog audio cables

Basic quality audio

1 Using an analog cable, connect the **AUX** connectors on your home theater to the **AUDIO OUT** connectors on the TV or other device.

Set up EasyLink (HDMI-CEC control)

This home theater supports Philips EasyLink, which uses the HDMI-CEC (Consumer Electronics Control) protocol. EasyLink-compliant devices that are connected through HDMI can be controlled by a single remote control.

Note

- Depending on the manufacturer, HDMI-CEC is known by many names. For information on your device, see the user manual of the device.
- Philips does not guarantee 100% interoperability with all HDMI-CEC devices.

Before you start

- Connect your home theater to the HDMI-CEC compliant device through HDMI connection.
- Make the necessary connections described in the quick start guide, and then switch the TV to the correct source for your home theater.

Enable EasyLink

1 Press ♠ (**Home**).
2 Select **[Setup]**, and then press **OK**.
3 Select **[EasyLink]** > **[EasyLink]** > **[On]**.
4 On your TV and other connected devices, turn on HDMI-CEC control. For details, see the user manual of the TV or other devices.

- On your TV, set the audio output to 'Amplifier' (instead of TV speakers). For details, see the TV user manual.

EasyLink controls

With EasyLink, you can control your home theater, TV, and other connected HDMI-CEC compliant devices with a single remote control.

- **[One Touch Play]** (One-touch play): When a video disc is in the disc compartment, press ▶ (**Play**) to wake up the TV from standby, and then play a disc.
- **[One Touch Standby]** (One-touch standby): If one-touch standby is enabled, your home theater can switch to standby with the remote control of the TV or other HDMI-CEC devices.
- **[System Audio Control]** (System audio control): If system audio control is enabled, the audio of the connected device is output through your home theater speakers automatically when you play the device.
- **[Audio Input Mapping]** (Audio input mapping):If system audio control does not work, map the connected device to the correct audio input connector on your home theater (see 'Set up the audio' on page 11).

Note

- To change the EasyLink control settings, press ♠ (**Home**), select **[Setup]** > **[EasyLink]**.

Set up the audio

If you cannot hear the audio output of a connected device through your home theater speakers, check that you have enabled Easylink on all the devices (see 'Enable EasyLink' on page 11). Then, set up the EasyLink audio control.

1 Press ♠ (**Home**).

2 Select **[Setup]**, and then press **OK**.

3 Select **[EasyLink]** > **[System Audio Control]** > **[On]**.
   - To play the audio from the TV speakers, select **[Off]**, and skip the following steps.

4 Select **[EasyLink]** > **[Audio Input Mapping]**.

5 Follow the onscreen instructions to map the connected device to the audio inputs on your home theater.
   - If you connect your home theater to the TV through an HDMI ARC connection, make sure that the TV audio is mapped to the ARC input on your home theater.

Connect and set up a home network

Connect your home theater to a home network with internet access and enjoy:
- YouTube leanback
- Picasa web albums
- BD-Live applications
- Software update

! **Caution**

- Familiarize yourself with the network router and networking principles. If necessary, read documentation that accompanies the network components. Philips is not responsible for lost, damaged, or corrupt data.
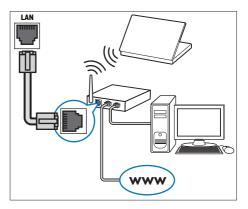

Before you start
- For software updates, make sure that the network router has access to the Internet with high-speed connection and is not restricted by firewalls or other security systems.
- Make the necessary connections described in the quick start guide, and then switch the TV to the correct source for your home theater.

Set up the wired network

What you need
- A network cable (RJ45 straight cable).
- A network router (with DHCP enabled).

1 Using a network cable, connect the **LAN** connector on your home theater to the network router.

2 Press ♠ (**Home**).

3 Select **[Setup]**, and then press **OK**.

4 Select **[Network]** > **[Network Installation]** > **[Wired (Ethernet)]**.

5 Follow the onscreen instructions to complete the setup.
   - If connection fails, select **[Retry]**, and then press **OK**.

6 Select **[Finish]**, and then press **OK** to exit.
   - To view the network settings, select **[Setup]** > **[Network]** > **[View Network Settings]**.

4 Use your home theater

This section helps you use the home theater to play media from a wide range of sources.

Before you start

*   Make the necessary connections described in the Quick start guide and the user manual.
*   Switch the TV to the correct source for the home theater.

Access the home menu

The home menu provides easy access to connected devices, setup and other useful features in your home theater.

1   Press ↟ (**Home**).
    ↳ The home menu is displayed.
2   Press the **Navigation buttons** and **OK** to select the following:
    *   **[play Disc]**: Start disc play.
    *   **[browse USB]**: Access the USB content browser
    *   **[Picasa]**: Access Picasa web albums.
    *   **[YouTube]**: Access YouTube Leanback page.
    *   **[browse PC]**: Access the computer content browser.
    *   **[Setup]**: Access menus to change video, audio and other settings.
3   Press ↟ (**Home**) to exit.

Discs

Your home theater can play DVDs, VCDs, CDs, and Blu-ray discs. It can also play discs that you've made at home, such as CD-R discs of photos, videos, and music.

1   Insert a disc into the home theater.

2   If the disc does not play automatically, press **DISC** or select **[play Disc]** from the home menu.
3   Use the remote control to control play (see 'Remote control' on page 6).
    *   It is normal to hear a little noise when you play a Blu-ray disc. This does not mean that your home theater is faulty.

Smartphone control

Use your mobile device such as iPhone (iOS 3.1.3 and above), Android phone (2.1 and above), iPad, or tablet to:

- Control your home theater
- Browse a data disc or USB storage device
- Personalize your sound settings
- Stream and share content from the devices on your home network

Before you start

- Connect your home theater, mobile device, and other DLNA-compatible devices to the same home network (see 'Connect and set up a home network' on page 12).
  - For better video quality, use wired connection whenever possible.
- Personalize the network name for your home theater.
- Download Philips **MyRemote** application on your mobile device.
  - For iPhone or iPad, search for the app in **App Store** (App Store).
  - For Android based phone or tablet, search for the app in **Market** (Market).

Control your home theater

1 On the mobile device, access **MyRemote** application.

2 Select your home theater (by its network name) from the home screen.
   - » A browsing bar is displayed at the bottom of the screen.
   - If your home theater is not found, check the network connection or tap the **Devices** tab on your mobile device to search again.

4   Follow the onscreen instructions to select an option or complete the set up.

Browse PC through DLNA

Access and play the pictures, audio and video files from a computer or media server on the home network through your home theater.

Before you start
- Install a DLNA-compliant media server application on your device. Make sure that you download an application that works best for you. For example,
  - Windows Media Player 11 or higher for PC
  - Twonky Media Server for Mac or PC
- Enable media sharing of files. For ease of use, we have included the steps for the following applications:
  - Windows Media Player 11 (see 'Microsoft Windows Media Player 11' on page 20)
  - Windows Media Player 12 (see 'Microsoft Windows Media Player 12' on page 21)
  - Twonky Media for Mac (see 'Macintosh OS X Twonky Media (v4.4.2)' on page 21)

Note

- For additional help on these applications or other media servers, check the user manual of the media server software software.

Set up media server software

To enable media sharing, set up the media server software.

Before you start
- Connect your home theater to a home network (see 'Connect and set up a home network' on page 12). For better video quality, use wired connection whenever possible.
- Connect the computer and other DLNA-compatible devices to the same home network.
- Make sure that your PC firewall allows you to run Media Player programs (or the firewall's exemption list has the media server software included).
- Switch on your computer and the router.

Microsoft Windows Media Player 11

1   Start Windows Media Player on your PC.

2   Click the **Library** tab, and then select **Media Sharing**.

3   The first time you select **Media Sharing** on your PC, a pop-up screen appears. Check the **Share my media box** and click **OK**.
    ↳ The **Media Sharing** screen is displayed.

4   In the **Media Sharing** screen, make sure that you see a device marked as **Unknown Device**.
    ↳ If you don't see an unknown device after a minute or so, check that your PC firewall is not blocking the connection.

5   Select the unknown device and click **Allow**.
    ↳ A green tick appears next to the device.

6 By default, Windows Media Player shares from these folders: **My Music**, **My Pictures**, and **My Videos**. If your files are in other folders, select **Library** > **Add to Library**.
   » The **Add to Library** screen is displayed.
   • If necessary, select **Advanced options** to display a list of monitored folders.

7 Select **My folders and those of others I can access**, and then click **Add.**

8 Follow the onscreen instructions to add the other folders that contain your media files.

Microsoft Windows Media Player 12

1 Start Windows Media Player on your PC.

2 In Windows Media Player, click the **Stream** tab, and then select **Turn on media streaming.**
   » The **Media streaming options** screen is displayed.

3 Click **Turn on media streaming**.
   » You return to Windows Media Player screen.

4 Click the **Stream** tab and select **More streaming options**.
   » The **Media streaming options** screen is displayed.

5 Make sure that you see a media program in the **Local network** screen.
   » If you don't see a media program, check that your PC firewall is not blocking the connection.

6 Select the media program and click **Allowed**.
   » A green arrow appears next to the media program.

7 By default, Windows Media Player shares from these folders: **My Music**, **My Pictures**, and **My Videos**. If your files are in other folders, click the **Organize** tab and select **Manage libraries** > **Music**.
   » The **Music Library Locations** screen is displayed.

8 Follow the onscreen instructions to add the other folders that contain your media files.

Macintosh OS X Twonky Media (v4.4.2)

1 Visit www.twonkymedia.com to purchase the software, or download a free 30-day trial to your Macintosh.

2 Start Twonky Media on the Macintosh.

3 In the Twonky Media Server screen, select **Basic Setup** and **First Steps**.
   » The First steps screen is displayed.

4 Type a name for your media server, and then click Save changes.

5 Back in the Twonky Media screen, select **Basic Setup** and **Sharing.**
   » The **Sharing** screen is displayed.

6 Browse and select folders to share, and then select **Save Changes**.
   » Your Macintosh rescans the folders automatically so that they are ready to share.

Play files from your PC

Note

• Before you play multimedia content from the computer, make sure that the home theater is connected to the home network, and the media server software is properly set up.

1 Press 🏠 (**Home**).

2 Select **[browse PC]**, and then press **OK**.
   » A content browser is displayed.

3 Select a device on the network.
   » The folders in the selected device are displayed. Depending on the media server, the folder names may vary.
   • If you cannot see the folders, check that you have enabled media sharing on the selected device so that the content is available for sharing.

4 Select a file, and then press **OK**.
  - Some media files may not play due to compatibility issues. Check the file formats supported by your home theater.

5 Press the play buttons to control play (see 'Play buttons' on page 13).

8 Troubleshooting

To keep the warranty valid, never try to repair the product yourself.

If you have problems using this product, check the following points before you request service. If you still have a problem, get support at www.philips.com/support.

Main unit

The buttons on the home theater do not work.

• Disconnect the home theater from the power supply for a few minutes, then reconnect.

Picture

No picture.

• Make sure that the TV is switched to the correct source for the home theater.

No picture on a TV connected through HDMI.

• Make sure that you use a High Speed HDMI cable to connect the home theater and TV. Some Standard HDMI cables do not display properly for some images, 3D video, or Deep Color.
• Make sure that the HDMI cable is not faulty. If it is faulty, replace it with a new cable.
• Press 🏠 (**Home**) and then **731** on the remote control to restore the default picture resolution.
• Change the HDMI video setting, or wait for 10 seconds for auto recovery.

Disc does not play high-definition video.

• Make sure that the disc contains high-definition video.
• Make sure that the TV supports high-definition video.
• Use an HDMI cable to connect to the TV.

Sound

No sound from home theater speakers.

• Connect the audio cable from your home theater to your TV or other devices. You do not need a separate audio connection when the home theater and TV are connected through an **HDMI ARC** connection.
• Set up the audio for the connected device (see 'Set up the audio' on page 11).
• Reset your home theater to its factory settings (see 'Apply factory settings' on page 26), then switch it off and switch on again.
• On your home theater, press **SOURCE** repeatedly to select the correct audio input.

Distorted sound or echo.

• If you play audio from the TV through the home theater, make sure that the TV is muted.

Audio and video are not synchronized.

• 1) Press ♪ **SOUND SETTINGS**.
   2) Press the **Navigation buttons** (left/right) to select **AUD SYNC**, and then press **OK**.
   3) Press the **Navigation buttons** (up/down) to synchronize the audio with the video.

Play

Cannot play a disc.

• Clean the disc.
• Make sure that the home theater supports the type of disc (see 'Media formats' on page 29).

- Make sure that the home theater supports the region code of the disc (see 'Region codes' on page 29).
- If the disc is a DVD±RW or DVD±R disc, make sure that it is finalized.

Cannot play a DivX file.
- Make sure that the DivX file is encoded according to the 'Home Theater Profile' with the DivX encoder.
- Make sure that the DivX file is complete.

DivX or RMVB/RM subtitles do not display correctly.
- Make sure that the subtitle file name is the same as the movie file name (see 'Subtitles' on page 15).
- Select the correct character set:
  1) Press ☰ OPTIONS.
  2) Select [Character Set].
  3) Select the supported character set.
  4) Press OK.

Cannot read the contents of a USB storage device.
- Make sure that the format of the USB storage device is compatible with the home theater.
- Make sure that the file system on the USB storage device is supported by the home theater.

'No entry' or 'x' sign appears on the TV.
- The operation is not possible.

EasyLink does not work.
- Make sure that the home theater is connected to a Philips brand EasyLink TV, and the EasyLink option is on.

When you switch on the TV, the home theater automatically switches on.
- This behavior is normal when you are using Philips EasyLink (HDMI-CEC). To make the home theater work independently, switch off EasyLink.

Cannot access BD-Live features.
- Make sure that the home theater is connected a home network with internet access (see 'Connect and set up a home network' on page 12).
- Make sure that the network is set up. Use a wired network installation (see 'Set up the wired network' on page 12).
- Make sure that the Blu-ray disc supports BD-Live features.
- Clear memory storage (see 'BD-Live on Blu-ray' on page 14).

My 3D video played in 2D mode.
- Make sure that your home theater is connected to a 3D TV through an HDMI cable.
- Make sure that the disc is a Blu-ray 3D disc, and the Blu-ray 3D video option is on (see 'Play Blu-ray 3D disc' on page 14).

TV screen is black when you play a Blu-ray 3D video or a DivX copy protected video.
- Make sure that the home theater is connected to the TV through an HDMI cable.
- Switch to the correct HDMI source on the TV.

Poor playback on YouTube Leanback or Picasa.
- Make sure that the home theater is connected to a home network and is properly set up (see 'Connect and set up a home network' on page 12).
- Make sure that the internet connection speed is higher than 2 MBPS to obtain optimum performance.
